

ANNOUNCEMENTS

A Symposium on **Antibiotics and Newer Synthetic Drugs** will be held on Saturday, February 10th, 1962, at the Bradford Institute of Technology, Great Horton Road, Bradford 7.

Anyone wishing to participate should contact:

Dr. R. P. SHELDON,
The Bradford Institute of Technology,
Great Horton Road,
Bradford 7.

Periodically BIOCHEMICAL PHARMACOLOGY will publish an editorial which deals critically with current trends in special areas of biochemical pharmacology. The function of the editorial is to summarize the present position and to indicate lines along which further investigations might profitably be pursued. These editorials are intended to provoke thought and cannot fail to be controversial, but will not be polemical. We hope that established workers will contribute such editorials. It is suggested, however, that contact be made with the Regional Editors before a manuscript is actually submitted.
