

ERRATUM

D. de Wied: Behaviourally active ACTH analogues. *Biochem. Pharmac.* **24**, 1463–1468 (1975).

The author regrets that an error occurred in lines 2–7 in the second column of p. 1465. This should read:

Replacement of tryptophan by phenylalanine in position 9, which causes a marked decrease in steroidogenic potency in 5-Gln, 9-Phe-ACTH 1-20-NH₂ [21], did not damage the behavioural activity and in the presence of 8-D-Lys. induced a hundred-fold increase (Table 4).
