

BIOCHEMICAL PHARMACOLOGY

SUBJECT INDEX FOR VOLUME 26
1977

PREPARED BY W. COCKS

- Acebutolol,
 effect on rat heart sarcolemma, 2055
- Acetaldehyde,
 in CSF during ethanol oxidation, 237
 distribution in liver, brain, blood
 and breath during ethanol
 oxidation, 241
 in liver, regulation during ethanol
 oxidation, 249
 effect on noradrenaline metabolism
 in rat brain, 1147
 effect on pyruvate oxidation by
 mitochondria from liver, kidney,
 brain and muscle, 1349
 effect of sulphhydryl compounds on
 toxicity of, 1529
- Acetaldehyde dehydrogenase,
 in liver mitochondria, inhibition of
 low K_m enzyme by pargyline, 1151
- Acetaminophen,
 effect on liver microsomal drug-
 metabolizing enzymes in vitro, 893
- Acetate,
 incorporation into cholesterol in
 liver, effect of drugs affecting
 microsomal drug metabolism, 481
 incorporation into liver triglycer-
 ide, effect of 3-amino-1,2,4-
- Acetate(contd.)
 triazole, 1255
- Acetone,
 effect on NADH synergism of
 microsomal aniline metabolism, 137
- 2-Acetylaminofluorene N-hydroxylase,
 induction by polycyclic hydrocarbons
 in regenerating liver, 1501
- Acetylcholine,
 in brain, effect of S1432, 1517
 content and release in brain regions,
 effect of pentobarbital, 609
 inhibition of brain aryl acylamidase,
 2163
 in monkey placenta, 1281
 in ponto-medullary region of brain
 in rats treated with armin and
 obidoxime, 601
 release from brain, effect of lead,
 397
 synthesis and distribution in brain,
 effects of acute and chronic
 cholinesterase inhibition, 633
 turnover in brain, effect of
 cholinergic drugs, 1607
- Acetylcholine receptors,
 noradrenergic neurons, 259
- Acetylcholinesterase,

- Acetylcholinesterase,
 in blood, methods for measuring,
 inhibition by carbamates, 1263
 in brain, effect of phencyclidine
 derivatives, 1671
 in Electrophorus electrophoresis,
 effect of Soman, 337
 from honey bee and cotton leaf worm,
 inhibition by carbamates, 2187
 inhibition by tricyclic antidepress-
 ants, 1559
 interaction with carbamates, 757
 phosphorylated,
 effect of imidazoles and pH on
 aging of, 656
 new reactivators of, 439
 in rat tissues, effects in vivo and
in vitro of thioureas, 313
 in retina, separation from butyryl-
 cholinesterase by affinity
 chromatography, 1441
- Acetyl-CoA carboxylase,
 in liver,
 effect of clofibrate, 1401
 effect of salicylate, 898
- N-Acetylcysteine,
 effect on cyclophosphamide-induced
 toxicity and immunosuppression,
 1015
- N-Acetyl- β -glucosaminidase,
 distribution in rainbow trout liver,
 1395
- N-Acetyltransferase,
 in cultured chick embryo muscle,
 recovery from paraoxon, 1955
 in liver, effect of sex and Freund's
 adjuvant, 69
- N-Acetyltransferase(contd.)
 in pineal gland, effect of
 desmethylinipramine, 904
- Acid phosphatase,
 distribution in rainbow trout liver,
 1395
 release from liver lysosomes, effect
 of γ -hexachlorohexane, 1377
 release from lysosomes, effect of
 tinoridine, 11
- Acid protease,
 kinin-forming in mouse fibroblasts,
 purification, 1187
- Acronycine,
 effect on surface properties of
 murine leukemia cells, 1077
- Acrylamide,
 effect on pyridine nucleotide
 concentrations and functions in
 rat brain, 2151
- Adenine translocase,
 in ethanol-induced fatty liver, 1229
- Adenosine,
 elevation of cyclic AMP in murine
 neuroblastoma cells, 37
 toxicity in L cells treated with
 adenosine deaminase inhibitors, 71
 toxicity in relation to deoxy-
 nucleoside triphosphate pools,
 2371
 transport in platelets,
 effect of dipyridamole and its
 monoglucuronide, 906
 effect of reserpine, 1657, 1667
 effect of thio reagents, 319
- Adenosine analogues,
 effect on purine metabolism in

Adenosine analogues(contd.)

intact Schistosoma mansoni, 1849

Adenosine deaminase,

in lymphoid cells, effect of

adenosine, 2371

parameters of inhibition, 359

Adenosine deaminase inhibitors,

specificity of, 1967

effect on toxicities of adenosine

and 2'-deoxyadenosine in L-cells,
71

Adenosine diphosphate,

induced platelet aggregation, effect

of dipyridamole and its

monoglucuronide, 906

Adenosine monophosphate,

inhibition of orotidine-5'-phosphate

decarboxylase, 2291

5'-Adenosine monophosphate deaminase,

in muscle, inhibition by coformycin

and deoxycorformycin, 663

Adenosine-3',5'-monophosphate,

accumulation in fat cells,

effect of dimethylsulfoxide, 775

thyroid hormone induced, effect

of pyruvate, 1783

effect on allylisopropylacetamide-

induced porphyrin biosynthesis in

chick embryo liver cells, 1389

effect of β -blockers on synthesizing

system in vascular smooth muscle,

171

in C-1300 murine neuroblastoma cells,

effect of adenosine, 37

effect on calcium accumulation and

release in submandibular

microsomes, 125

Adenosine-3',5'-monophosphate(contd.)

dependent and independent protein

kinases, inhibitory effects of

cordycepin, 1287

dopamine-induced accumulation in

retina, effect of lithium, 167

in Ehrlich ascites tumour cells,

elevation by quercetin, 1259

in liver, effect of clofibrate, 1401

in liver fluke, effect of phospho-

diesterase inhibitors, 2325

in lung,

effect of anaphylaxis, release

of prostaglandins and histamine,

181

pertussis-vaccinated mice,

pharmacologic blockade of effect

of histamine, 529

effect of Sch 15280 and amino-

phylline, 951

effect on phagocytosis by and

release of lysosomal enzymes from

neutrophils, 2001

in rat peritoneal macrophages,

effect of adrenergic stimulants

and blocking agents, 1813

in regulation of gastric secretion,

991

role in action of opiates, 1183

role in trans-synaptic induction of

tyrosine hydroxylase, 817

Adenosine-3',5'-monophosphate binding

proteins,

interaction with 4-alkyl-2,6,7-

trioxa-1-phosphabicyclo[2,2,2]

octanes, 887

interaction of cyclophosphamide and

BIOCHEMICAL PHARMACOLOGY

- Adenosine-3',5'-monophosphate binding proteins(contd.)
 its metabolites, 1469
- Adenosine-3',5'-monophosphate/guanosine 3',5'-monophosphate ratio,
 in brain, effect of caffeine and theobromine, 1723
- Adenosine triphosphatase,
 in brain,
 effect of catecholamines, 1221
 effect of local anaesthetics and cholesterol, 791
 effect of morphine, 89
 effect of piperidines and fire ant venom, 983
 in synaptosomes, effect of neurotransmitters, 2029
 in erythrocytes, irreversible inactivation by tetracaine, 2241
 in ethanol-induced fatty liver, 1229
 in gastric mucosa, inhibition by phenylbutazone and indomethacin, 1241
 in heart, influence of unsaturated phosphatidylcholine on effects of cardioactive drugs, 381
 in heart sarcolemma, effects of acebutolol, practolol and propranolol, 2055
 inhibition by Palythoa caribaeorum extracts, 589
 in kidney cortex and medulla, effect of inhibitors, 711
 in liver microsomes, effect of Δ^9 -tetrahydrocannabinol, 1797
 in liver mitochondria,
 effect of anti-inflammatory drugs,
- Adenosine triphosphatase,
 in liver mitochondria(contd.) 2101
 inhibition by kepone, 1155
 effect of narasin, 1373
 mitochondrial, inhibition by bromosulfophthalein, 825
 in myocardium, effect of P13, 1021
 in synaptosomes, effect of cannabinoids, 1327
- Adenosine triphosphate,
 effect of bikaverin on synthesis, 1973
 in heart, effect of disophenol perfusion, 2297
 metabolism in ethanol-induced fatty liver, 1229
 synthesis in liver, inhibition by tri-n-butyltin derivatives, 1997
 synthesis in pig myocardium, effect of P13, 1021
 transport in platelets, effect of reserpine, 1657, 1667
- S-Adenosyl-L-methionine,
 effect on hyperammonemia syndrome, 2397
- S-Adenosyl methionine decarboxylase,
 in placenta, 121
 in spleen cells, effect of methylglyoxal-bis(guanylhydrazone), 723
- Adenylate cyclase,
 dopamine sensitive,
 action of antipsychotic drugs, 1719
 in brain, action of neuroleptic drugs, 1741
 in retina, effect of lithium, 167

Adenylate cyclase(contd.)

in heart,
 catecholamine hypersensitivity
 after chemical denervation, 1448
 effects of chlorpromazine and
 molindone, 1315
 linked dopamine receptors in
 synaptic membranes, 2011
 noradrenaline sensitive in mouse
 limbic forebrain, 1877
 in stomach mucosa, effect of
 pentagastrin, 2083

Adenylosuccinate synthetase,

in E.coli, effect of alanosine and
 hadacidin, 1353

Adipose tissue,

effect of pyruvate on thyroid
 hormone induced lipolysis, 1783

Adrenal,

actions of angiotensins in cortex, 93
 inhibition of dopamine β -hydroxylase
 by anti-thyroid agents, 1092
 effect of organophosphate insect-
 icides on cholesteryl ester and
 steroid metabolism, 1901
 effect of prostaglandin E_2 and
 phenylephrine on catecholamine
 release, 351
 trans-synaptic induction of tyrosine
 hydroxylase, 817

Adrenalectomy,

effect on rat heart monoamine
 oxidase, 407

Adrenaline,

in brain, effect of 2,3-dichloro- α -
 methylbenzylamine, 2087
 effect on calcium accumulation and

Adrenaline(contd.)

release in submandibular
 microsomes, 125
 effect on cyclic AMP in sensitized
 and anaphylactic lungs, 181
 effect on 5-hydroxytryptamine from
 mast cells induced by N-(2-ethyl-
 hexyl)-3-hydroxybutyramide, 197
 induced hyperglycaemic response in
 rats, contribution of
 gluconeogenesis, 2231
 metabolic responses in the rabbit,
 influence of nourishment, alloxan
 diabetes and propranolol, 1065
 effect on phosphatidylcholine in
 fat cells, 1475
 plus morphine, effect on lipolysis
 in fat pads, 143
 subcutaneous injection, effect on
 monoamine oxidase in human
 platelets, 2065
 α -Adrenergic activation,
 effect on catecholamine release from
 adrenal, 351
 β -Adrenoceptor blocking drugs,
 mechanism of action in hypertension,
 171
 effect on protein synthesis in
 chick embryo liver cells, 867
 effect on rat heart sarcolemma, 2055
 α -Adrenoceptors,
 interaction of angiotensin, 1
 noradrenergic neurons, 259
 β -Adrenoceptors,
 noradrenergic neurons, 259
 β_2 -Adrenoceptors,
 mediation in increase in cyclic AMP

β_2 -Adrenoceptors (contd.)

in rat peritoneal macrophages by
catecholamines, 1813

Adrenomimetic agents,

effect on phagocytic release of
lysosomal enzymes from neutro-
phils, 2001

Adriamycin,

effect on DNase I from bovine
pancreas, 1953
membrane interactions using liposome
system, 2319
transport and binding in Ehrlich
ascites tumour cells, 215

Aflatoxins B₁ and G₁,

effect of functional groups on
interaction with polysaccharides,
863

Alanosine,

effect on enzymes using aspartic
acid as a metabolite, 1353

Albumin,

bovine serum,
1-benzyl-3-indazoleoxyacetate
interaction, 659
concentration-dependent effects
of fatty acids on warfarin
binding, 1143

human serum,

1-benzyl-3-indazoleoxyacetate
interaction, 659
concentration-dependent effects
of fatty acids on warfarin
binding, 1143
diazepam binding, effect of
oleic acid, 2157
effect of heparin and fatty acids

Albumin,

human serum (contd.)

on binding of quinidine and
warfarin, 229

peroxide-catalysed irreversible
binding of morphine, 1267
salicylate binding, circular
dichroism studies, 283

rat, human, sheep, dog, pig, rabbit,
and horse plasma, warfarin
binding, 2439

secretion in parenchymal liver cells
effect of xanthines, 553

Alcohol dehydrogenase,

in liver, effect of chronic ethanol
administration, 441

Alcohol preference,

in relation to biogenic aldehyde
metabolizing enzymes in rats, 841

Aldehyde dehydrogenase,

in brain, effects of disulfiram and
chloral hydrate, 741

isoenzymes in rats in relation to
alcohol preference, 841

in liver,

correlation with acetaldehyde
concentration, 249
effects of disulfiram and chloral
hydrate, 741

Aldehyde reductase,

in rat liver, substrates and
properties, 1117

Aldrin,

epoxidation by liver microsomes and
armyworm gut, steric factors in
effect of imidazoles, 1039

Aldrin epoxidase,

BIOCHEMICAL PHARMACOLOGY

- Aldrin epoxidase,
in liver microsomes, effect of amino acid deficiencies, 667
- Alkyl phosphates,
effect on β -glucuronidase release from liver microsomes into serum, 881
- 4-Alkyl-2,6,7-trioxa-1-phosphabicyclo[2,2,2]octanes,
interaction with phosphodiesterase and cyclic AMP-binding proteins, 887
- Allopurinol,
inhibition of urate production, 355
ribonucleotide derivatives, inhibition of human erythrocyte orotidylate decarboxylase, 1947
- Alloxan diabetes,
effect on metabolic responses to isoproterenol and adrenaline, 1065
- Allylisopropylacetamide,
induced porphyrin biosynthesis in chick embryo liver cells, effect of hydrocortisone and cyclic AMP, 1389
- Amethopterin,
hepatic uptake, intracellular protein binding and biliary excretion, 1235
- Amidopyrine,
demethylation in liver microsomes, combined effects of low doses of DDT and phenobarbital, 1299
- Amine oxidases,
cardiovascular, inhibition by pargyline, 2107
in liver, sex differences and developmental aspects, 2449
- Amines,
 $^{18}\text{O}_2$ in measuring the formation of, 1271
- Amino acids,
uptake by liver, effect of nafenopin, 939
- Amino acid deficiencies,
changes in mixed function oxidase enzymes, 667
- p-Aminobenzoic acid,
decreased conjugation in the icteric Gunn rat, 535
- γ -Aminobutyric acid,
metabolism in brain, regional effects of ethanolamine-0-sulphate, 1569
release from synaptosomes, effect of pentobarbital, 159
synaptosomal uptake, effect of cannabinoids, 1327
system in brain, effects of pentobarbital, 699
- γ -Aminobutyric acid aminotransferase,
in brain, effect of structural analogues of L-glutamic acid, 345
- p-Aminohippurate,
kinetics of transport in renal cortical slices from neonatal and adult rats, 1809
- 2-Amino(4-isothiourelyl methylene)-thiazol di HCl,
effect on platelet aggregation and transport processes, 319
- δ -Aminolevulinic acid,
in chick embryo liver cells, effect of hydrocortisone and cyclic AMP on allylisopropylacetamide

- §-Aminolevulinic acid(contd.)
 - induction, 1389
 - lack of effect of phenobarbitone on metabolism and brain uptake, 802
- §-Aminolevulinic acid dehydratase,
 - in liver, effect of ascorbic acid deficiency, 797
- §-Aminolevulinic acid synthetase,
 - in liver, effect of ascorbic acid deficiency, 797
- Aminomethanesulphonic acid,
 - inhibition of taurocholic acid synthesis in liver, 1175
- p-Aminophenol,
 - effect on glucose-6-phosphatase in kidney microsomes, 2069
- Aminophylline,
 - effect on cyclic AMP in lung, 951
 - effect on valine incorporation into protein and albumin secretion in liver cells, 553
- Aminopyrine,
 - metabolism by liver microsomes, effects of FSH and LH, 66
- Aminopyrine demethylase,
 - in fetal liver, induction of, 567
 - in liver microsomes,
 - effect of dietary lipid peroxides, sterols and oxidized sterols, 1417
 - effect of dimethylsulfoxide in phenobarbital pretreated rats, 902
 - effect of griseofulvin treatment of mice, 1125
 - effect of progesterones, 1495
- 2-Aminotetralins,
 - inhibition of noradrenaline N-methyl transferase, 446
- 3-Amino-1,2,4-triazole,
 - effect on catalase activity and triglyceride level in fatty liver, 625
 - effect on in vivo formation of liver triglyceride, 1255
- Amitriptyline,
 - antimuscarinic activity, 1559
- Ammonia,
 - effect on glutamate-ammonia system in brain, 2397
- Amobarbital,
 - binding to hepatic microsomes, 988
- Amphetamine,
 - effect on amine uptake by synaptosomes, 1435
 - effect on 5-hydroxytryptamine uptake and release by platelets, 647
 - effect on seizure threshold and brain catecholamines in mice, 799
- Amphotericin B,
 - ergosterol-conferred sensitivity to in L1210 leukemia cells, 177
 - sensitivity of mammalian cells, 705
- Anaesthetics,
 - effect on glycerol and K⁺ translocation across red cell membrane, 779
 - membrane interactions using liposome system, 2319
 - effect on phospholipid bilayer membranes, 51
- Anaphylaxis,
 - release of prostaglandins and histamine from lung, changes in cyclic AMP, 181
- Androgen,

- Androgen,
induced imprinting of rat hepatic
microsomal monooxygenases, 1979
- Angiotensin receptors,
noradrenergic neurons, 259
- Angiotensins,
central vasopressor actions, 1
comparative actions, characteristics
of cellular receptors, 93
- O²:2'-Anhydro-1-β-D-arabinofuranosyl-
cytosine,
binding to polyanionic matrices, 2375
- Aniline,
metabolism by liver microsomes,
effect of acetaminophen, 893
effects of FSH and LH, 66
NADH synergism in the presence of
enhancing agents, 137
effect of nitromethane on kinetics
of, 963
- Aniline hydroxylase,
in liver microsomes,
effect of dimethyl sulfoxide in
phenobarbital pretreated rats, 902
puffin, effect of DDE, 1000
- Anthracycline antibiotics,
transport and binding in Ehrlich
ascites tumour cells, 215
- Antibiotics,
effect on mitochondrial respiration,
433
- Antibody forming cells,
effects of methylglyoxal-bis(guanyl-
hydrazone) on development of, 723
- Anticholinergic activity,
of tricyclic antidepressants, 1559
- Anticonvulsant drugs,
inhibition of in vitro hydroxylation
of diphenylhydantoin, 1929
- Antidepressant drugs,
antimuscarinic activity, 1559
effect on depletion of brain
catecholamines, 1083
- Antigen-sensitized lung,
prostaglandin and histamine release,
changes in cyclic AMP level, 181
- Antihistaminic drugs,
effect on feline brain monoamine
metabolism, 133
- Anti-inflammatory drugs,
in vitro inhibition of prostaglandin
synthetase, 1051
effect on lysosome stability, 11
mechanism of action of diflumidone
and R-805, 307
effect on oxidative phosphorylation
in liver mitochondria, 2101
effect on reduction of 2,6-dichloro-
phenol indophenol by bovine
methemoglobin reductase, 685
- Anti-inflammatory proteins,
endogenous, 693
- Antilysin,
effect on collagenolytic activity
of cathepsin B1, 2121
- Antipsychotic drugs,
effect on adenylate cyclase from
various dopaminergic areas of
brain, 1719
- Antirheumatic drugs,
effect on collagenolytic activity
of cathepsin B1, 2121
- Antithyroid drugs,

BIOCHEMICAL PHARMACOLOGY

- Antithyroid drugs,
 - glucuronide conjugation by liver microsomes, 617
 - inhibition of dopamine β -hydroxylase 1092
- Antiviral activity,
 - of Q'-methylated derivatives of ara-A, 794
- Aorta,
 - prevention of immun-arteriosclerosis by calcitonin, 2129
 - effect of reserpine on platelet adherence, 149
- Apomorphine,
 - effect on adenylate cyclase in median eminence, 1719
 - hydrolysis of diester prodrugs of, 1749
- Aprobarbital,
 - binding to hepatic microsomes, 988
- 9- β -D-Arabinofuranosyl-adenine,
 - antiviral activity of Q'-methylated derivatives, 794
- 1- β -D-Arabinofuranosylcytosine,
 - retention in vitro, 477
- 9- β -D-Arabinofuranosyl-2-fluoroadenine,
 - biological activity, 2193
- Arabinosylcytosine 5'-methylphosphonate,
 - synthesis and biological properties, 1291
- Armin,
 - effect on acetylcholine and cholinesterase in ponto-medullary region of rat brain, 601
- Armyworm(Spodoptera eridania),
 - epoxidase in gut, steric factors in
- Armyworm(contd.)
 - effect of imidazoles, 1039
- Aroclor 1254,
 - effect on metabolism and hepatotoxicity of chloroethylenes, 369
- Arteparon,
 - effect on collagenolytic activity of cathepsin B1, 2121
- Arteriosclerosis,
 - K-elastin induced, effect of calcitonin, 2129
- Aryl acylamidase,
 - in brain, inhibition by 6-hydroxytryptamine and acetylcholine, 2163
- Arylhydrocarbon hydroxylase,
 - in cultured human lymphocytes, 3-methylcholanthrene inducibility 1831
 - in fetal and maternal extra-hepatic tissues, transplacental induction by 2,3,7,8-tetrachlorodibenzo-p-dioxin, 1383
 - in liver microsomes,
 - effect of pentachlorophenol, 1549
 - regenerating liver, induction by polycyclic hydrocarbons, 1501
 - in ovary, genetic differences, 909
- Aryl sulphatase,
 - release from lysosomes, effect of tinoridine, 11
- Ascorbic acid,
 - effect of dietary supplementation on hepatic drug metabolism, 2037
- Ascorbic acid deficiency,
 - effect on heme synthesis in guinea pig liver, 797
- Asparagine synthetase inhibitors,

- Asparagine synthetase inhibitors,
effects on asparaginase resistant
tumours, 1405
- Aspartate,
induced convulsions and activation
of epileptic foci, 253
metabolizing enzymes, effects of
alanosine and hadacidin, 1353
- Aspartate + glutamate,
effect on glutamate, glutamine and
aspartate in brain, serum and
retina, 443
- Aspartate transcarbamylase,
inhibition by N-(phosphonacetyl)-L-
aspartate, 81
- β -Aspartyl methylamide,
effect on asparaginase resistant
tumours, 1405
- Aspirin,
binding to human serum albumin,
circular dichroism studies, 283
effect on oxidative phosphorylation
in rat liver mitochondria, 2101
- Atropine,
inhibition of rat brain and heart
monoamine oxidase, 871
effect on phosphatidylinositol
metabolism in sympathetic
ganglia, 448
- AY-9944,
plus zuclophene, effect on neural
sterol biosynthesis, 1169
- 22-Azacholesterol,
inhibition of cholesterol side-
chain cleavage, 1109
- 5-Azacytidine,
as substrate for uridine-cytidine
- 5-Azacytidine(contd.)
kinase, 64
- 5-Azacytidine-5'-triphosphate,
kinetic interaction with DNA-
dependent RNA polymerases, 403
- Azide,
inhibition of cytochrome c oxidase,
effect of methemoglobin, 2247
- Azodyes,
inhibition of protein synthesis and
carcinogenic potency, 929
- Azoreductase,
in human tissues, 1715
- Baclofen,
effect on plasma prolactin in male
rats, 645
- Barbiturate-induced narcosis,
involvement of GABA system, 699
- Barbiturates,
binding to hepatic microsomes, 988
K_s values, relationship between
lipophilicity and metabolic
clearance, 2117
- Basal metabolic rate,
effects of clofibrate, 301
- Bencyclane,
effect on oxidative phosphorylation
in heart and liver mitochondria,
2125
- Benserazide,
effect on tryptophan metabolism in
the mouse, 1619
- Benzamidine derivatives,
inhibition of haemolytic complement
activity, 325
- Benzene,

- Benzene,
 effect of toluene on metabolism
 and toxicity of, 293
- Benzimidazole,
 N-methylation by catechol-O-
 methyltransferase, 377
- Benzodiazepines,
 effect on nucleic acid and protein
 synthesis in E.coli, 1205
- Benzo(a)pyrene,
 differences in metabolism in lung
 and liver homogenates, 671
 genetic differences in mouse ovarian
 metabolism, 909
 metabolism in fetal tissues, trans-
 placental induction by 2,3,7,8-
 tetrachlorodibenzo-p-dioxin, 1383
 metabolism in liver microsomes,
 effect of dietary lipids, 1423
 effect of ketamine, 2445
 regenerating liver, effect of
 polycyclic hydrocarbons, 1501
 metabolism by short-term organ
 cultures of hamster lung, 1481
- Benzo(a)pyrene hydroxylase,
 distribution in rainbow trout liver,
 1395
 in fetal and neonatal rat liver,
 induction of, 567
 in liver microsomes of pregnant rats,
 induction, 577
- Benzo(a)pyrene, phenols, dihydrodiols
 and quinones,
 enzymatic conversion to sulphate
 conjugates, 1825
- Benzo[a]pyren-9yl hydrogen sulphate,
 formation from 9-hydroxybenzo[a]-
- Benzo[a]pyren-9yl hydrogen sulphate
 (contd.)
 pyrene, 551
- Benzphetamine,
 metabolism by liver microsomes,
 effect of ketamine, 2445
- Benzphetamine demethylase,
 in puffin liver microsomes, effect
 of DDE, 1000
- Benztropine,
 interaction with phosphatidyl-
 cholines, 2441
- Benzyl alcohol,
 effect on ATPase, 791
 1-Benzyl-3-indazoleoxyacetate,
 interaction with serum albumin, 659
- Betamethasone-17-valerate,
 effect on collagen synthesis
in vitro, 875, 1961
- BHK cells,
 sensitivity to amphotericin B and
 the cholesterol:phospholipid
 ratio of, 705
- Bikaverin,
 effect on purine nucleotide synth-
 esis and catabolism in Ehrlich
 ascites tumour cells, 1973
- Bile acids,
 effect of cholestatic steroids on
 uptake, 2433
- Biliary excretion,
 of amphotericin, 1235
 of bucolome, 2453
 of heavy metals, effect of
 spironolactone, 279
- Biliary excretory function,
 effect of kepone on hepatic

- Biliary excretory function(contd.)
 mitochondrial ATPase, 1155
- Bilirubin,
 hepatic glucuronidation and
 clearance in clofibrate-treated
 rats, 547
- 1-(4-Biphenyl)pentyl hydrogen
 fumarate,
 effect on serum cholesterol, 2443
- 1-(4-Biphenyl)pentyl hydrogen
 3-hydroxy-3-methylglutarate,
 effect on serum cholesterol, 2443
- 1-(4-Biphenyl)pentyl hydrogen
 maleate,
 effect on serum cholesterol, 2443
- 1-(4-Biphenyl)pentyl hydrogen
 succinate,
 effect on serum cholesterol, 2443
- 4-[1-(4-Biphenyl)pentyl]oxy]butyric
 acid,
 effect on serum cholesterol, 2443
- Bismuth,
 binding in kidney, 257
- Blood flow,
 liver, effect on bromosulphophthalein
 transport, 1867
- Blood pressure,
 mechanism of action of β -blockers, 171
 in relation to glucocorticoid
 sulfation, 1033
- Bone,
 organ culture, lead transport in, 650
- Bone marrow,
 benzene metabolites in, 293
 sensitivity to phenylbutazone,
 oxyphenbutazone and γ -hydroxy-
 phenylbutazone, 847
- Brain,
 ethanol-induced conformational
 changes in microsomal membranes,
 2181
 nicotine binding, 1631
 effect of Δ^1 -tetrahydrocannabinol
 perfusion on EEG, 2307
- Bromocryptine,
 effect on noradrenaline-sensitive
 adenylate cyclase in mouse
 limbic forebrain, 1877
- Bromosulphophthalein,
 inhibition of biliary excretion of
 its glutathione conjugate, 1951
 inhibition of mitochondrial
 respiration, 461
 effect on mitochondrial ion
 transport, 825
 transport in carbon tetrachloride-
 intoxicated rats, pharmacokinetic
 aspects, 1867
 uptake by liver mitochondria, 457
- Bronchodilator,
 activity of Sch 15280 and effect on
 phosphodiesterase, 951
- Bucolome,
 biliary excretion in the rat, 2457
- Butaclamol,
 sites of action, 1741
- Butylated hydroxyanisole,
 inhibition of mixed-function oxidase
 system and increase in potency of
 carbaryl in the housefly, 2315
- Butylated hydroxytoluene,
 effects on biomembranes, 2145
 interaction with phospholipid
 bilayer membranes, 2259

- 2,tert-Butyl,4-methoxyphenol,
effects on biomembranes, 2145
- γ -Butyrolactone,
effect on plasma prolactin in male
rats, 645
- Butyrophenones,
sites of action, 1741
- Butyrylcholinesterase,
in retina, 1441
- Cadmium,
biliary excretion, effect of
spironolactone, 279
binding to metallothionein, effect
effect of selenium, 2191
- Cadmium-thionein,
toxicity and metabolism, 25
- Caffeine,
enhancement of growth inhibitory
effects of antimetabolites in
lymphoma L5178Y cells, 1533
effect on locomotive activity and
brain cyclic GMP/cyclic AMP
ratio in mice, 1723
effect on valine incorporation into
proteins and albumin secretion in
liver cells, 553
- Calcitonin,
prevention of immun-arteriosclerosis,
2129
- Calcium,
accumulation and release in sub-
mandibular microsomes, effect of
autonomic agents and cyclic AMP,
125
in aorta extracts from α -elastin and
calcitonin-treated rabbits, 2129
- Calcium(contd.)
binding to rat heart plasma membr-
ane, effect of dl-propranolol
analogues, 2283
binding in rat heart sarcolemma,
effects of acebutolol, practolol
and propranolol, 2055
in brain, role in morphine action,
1183
dependent secretion of noradrenaline
and GABA, effect of pentobarbital
159
movement through mitochondrial
membranes, effect of P13, 1775
protein kinase-stimulated transport,
effect of ethanol, 393
effect on renal gluconeogenesis, 1085
transport by chondrocyte mitochondr-
ia, effect of tetracycline, 595
transport of metabolically active
forms of vitamin D, 563
transport in pancreatic β -cells,
effects of verapamil, 735
- D,L-Camphor,
induction of hydroxylase in liver
microsomes, 1885
- Cannabinoids,
effect on neurotransmitter uptake,
ATPase activity and morphology
of synaptosomes, 1327
- Cannabis extract,
effect on uterine glycogen
metabolism, 859
- Carbamates,
inhibition of acetylcholinesterases
from honey bee and cotton
leafworm, 2187

Carbamates(contd.)

interaction with acetylcholinesterase, 757

methods for measuring inhibition of acetylcholinesterase in blood, 1263

Carbamyl-DL-aspartate,

effect on toxicity and antitumour activity of N-(phosphonacetyl)-L-aspartate, 81

Carbaryl,

increase in potency by butylated hydroxytoluene in the housefly, 2315

mechanism of teratogenic effect in chicken embryo, 2251

Carbohydrate,

metabolism in cultured glial cells, effect of pentobarbital, 1307

 β -Carbolines,

inhibition of monoamine oxidase in brain and liver, 1991

Carbon disulphide,

effect on 1,2-dimethylhydrazine metabolism in vivo, 1763

effect of subacute exposure on mouse liver, 1521

effect on turnover of blood glucose and free fatty acids in the rat, 1625

Carbon tetrachloride,

effect on bromosulphophthalein transport, 1867

effect on extrahepatic drug metabolism, 749

induced fatty liver, effect of 3-amino-1,2,4-triazole on catalase and triglycerides in, 625

Carbon tetrachloride(contd.)

induced lipid peroxidation in liver microsomes in vitro, 2275

Carboxylesterases,

in liver, inhibition by triorthotolyl phosphate, 1791

DD-Carboxypeptidases-transpeptidases, bacterial, interaction with penicillin, properties, 2203

Cardiac glycosides,

influence of unsaturated phosphatidyl-choline on effects of, 381

Carnitine acetyltransferase,

in liver, absence of increase with proliferation of smooth endoplasmic reticulum, 1451

in liver peroxisomes, mitochondria and microsomes from clofibrate-fed rats, 1697

Carrageenin granuloma,

effect of cycloheximide on vascular permeability, 1131

effects of prostaglandin $F_{2\alpha}$ on vascular permeability and collagen and non-collagen protein synthesis, 2049

Catalase,

in fatty liver, effect of 3-amino-1,2,4-triazole, 625

Catechol,

synthesis in brain, control by tyrosine concentration, 1137

Catecholaminergic transmission,

presynaptic receptor systems in, 259

Catecholamines,

effect on ATPase in brain microsomes, 1221

Catecholamines(contd.)

effect on ATPase in synaptosomes,
2029

in brain,
effect of (-)-amphetamine induced
changes in seizure threshold, 799
effect of intraventricular
injection of 6-hydroxydopamine on
regional levels, 2211

catabolism in brain, effect of
thyrotropin-releasing hormone, 1817

depletion from rat brain in vivo,
effect of antidepressants, 1083

effect on 5-hydroxytryptamine release
from mast cells induced by N-(2-
ethylhexyl)-3-hydroxy-butylamide,
197

hypersensitivity to adenylate cyclase
after chemical denervation in
rat heart, 1448

induced hyperglycaemia, relative
contribution of gluconeogenesis,
2231

interaction with sulphur in brain,
1251

metabolic responses in rabbits,
effects of nourishment and
alloxan diabetes, 1065

metabolism in liver and brain, effect
of disulfiram and chloral
hydrate, 741

$^{18}\text{O}_2$ in measuring the formation of,
1271

release from adrenal, effect of
prostaglandin E_2 and phenyl-
ephrine, 351

release in brain, role of

Catecholamines(contd.)

p-hydroxyamphetamine, 1367

role in mechanism of action of
inosine and uridine in heart, 1585

role of pterins in synthesis of, 1009

synaptosomal uptake, effect of
phencyclidine, 1435

Catechol-O-methyltransferase,
N-methylation of benzimidazole, 377

Cathepsin B1,
effect of antirheumatic drugs on
collagenolytic activity of, 2121

Cathepsin D,
in bovine spleen, 2237

Caulosides,
effect on protein synthesis in cells
from rat marrow, 2113

Cellulose,
interactions with aflatoxins A_1 and
 G_1 , 863

Cerebellum,
effect of harmaline and its sulphur
analogue on cyclic GMP in, 1303

Cerebrospinal fluid,
acetaldehyde in during ethanol
oxidation, 237

effect of antihistaminic drugs on
monoamine metabolites in, 133

effect of probenecid on acidic
metabolites of amines, 629

Cerium,
biliary excretion, effect of
spironolactone, 279

Ceruloplasmin,
human, effect of histamine on
activity of, 975

Chelating agents,

- Chelating agents,
effect on noradrenaline storage in synaptic vesicles in vitro, 1703
- Chick embryo,
kynurenine formamidase inhibition as a possible mechanism for teratogenic effects of insecticides, 2551
- Chick embryo liver cells,
allylisopropylacetamide-induced porphyrin biosynthesis, effects of hydrocortisone and cyclic AMP, 1389
effect of β -blockers on protein synthesis, 867
- Chick embryo muscle,
acetylcholinesterase recovery from paraoxon treatment, 1955
- Chick embryo tendon cells,
effect of anti-inflammatory drugs on collagen synthesis, 875, 1961
- Chloral hydrate,
effect on catecholamine metabolism in liver and brain, 741
- Chlorambucil,
inhibition of thymidylate synthetase of Walker carcinoma, 1027
- Chlorhexidine,
effect on anaerobic fermentation and protein release of Saccharomyces cerevisiae, 2365
- Chlorimipramine,
effects on depletion of biogenic amines from rat brain in vivo, 1083
membrane interactions, fluorescence studies, 511
- Chlorinated dibenzo-p-dioxins,
hepatic effects, 1549
- 6-Chloro-2-aminotetralin,
effect on 5-hydroxytryptamine metabolism in brain, 1333
- p-Chloroamphetamine,
analogues, effect on 5-hydroxytryptamine metabolism in brain, 1333
effect on 5-hydroxytryptamine uptake and release by blood platelets, 497
induced monoamine depletion in brain and heart, effect of 4-(3-indolyl-alkyl)piperidine derivatives, 505
- N-(2-Chloroethyl-N'-cyclohexyl-N-nitrosourea,
properties of metabolites of, 2331
- Chloroethylenes,
metabolism and hepatotoxicity, 369
- p-Chloromercuribenzene sulphonate,
effect on platelet aggregation and transport processes, 319
- 2-Chlorophenothiazine,
effect on nucleic acid and protein synthesis in E. coli, 1205
- p-Chlorophenoxyisobutyrate,
effect on mitochondrial respiration 301
- p-Chlorophenylalanine,
effect on brain catechol synthesis, 1137
- Chloroquine,
membrane absorption and internalization by cultured human fibroblasts, 7
- Chlorpromazine,
effect on adenylate cyclase in

Chlorpromazine(contd.)

heart and on myocardial
contractility, 1315

effect on dopamine-sensitive
adenylate cyclase, 1719

effect on glycerol and K^+ translocat-
ion across red cell membrane, 779

inhibition of dopamine-stimulated
ATPase activity in synaptosomes,
2029

membrane interactions, fluorescence
studies, 511

effect on L-methionine transport in
rat intestine, 1411

effect on nucleic acid and protein
synthesis in E.coli, 1205

and quaternary analogue, asymmetric
distribution over erythrocyte
membrane, 2411

sites of action, 1741

Chlorpropamide,

effect on ketogenesis from
endogenous lipids, 789

Chlorpyrifos oxon,

effect on adrenal cholesteryl ester
and steroid metabolism, 1901

Chlortetracycline,

effect on mitochondrial respiration,
433

Choleresis,

bucolome induced, mechanism, 2453

Cholestatic steroids,

effect on taurocholate uptake into
hepatocytes, 2433

Cholesterol,

effect on ATPase, 791

biosynthesis in brain, effect of

Cholesterol(contd.)

AY-9944 and zuclophene,
1161, 1169

biosynthesis in liver, effect of
drugs affecting microsomal drug
metabolism, 481

dietary,
effect on benzo[a]pyrene
metabolism by liver microsomes,
1423

effect on oxidative drug metabol-
ism in liver, 1417

inhibition of side-chain cleavage
by 22-azacholesterol, 1109

membrane interactions using
liposome system, 2319

in serum, lowering activity of
 β -hydroxy- β -methylglutaryl
coenzyme A reductase inhibitors,
2449

Cholesterol hydroperoxides,

dietary, effect on oxidative drug
metabolism in liver, 1417

Cholesterol:phospholipid ratio,

of mammalian cells, relationship
with sensitivity to polyenes, 705

Cholesteryl ester,

metabolism in adrenal, effect of
organophosphate insecticides,
1901

Choline,

in blood, effect of cholinergic
drugs, 1607

in brain,

effect of cholinergic drugs, 1607

effect of S 1432, 1517

incorporation into 2-methylthiamine

- Choline(contd.)
- like substance in nerve tissue, 1321
 - effect on tetraethylammonium transport in mouse kidney cortex slices, 1935
 - transport in brain, effect of lead, 397
- Choline acetyltransferase,
- inhibition in vitro and protection against organophosphate poisoning in vivo, 1821
 - in monkey placenta, 1281
 - in striatum, effect of alcohol, 653
- Cholinergic drugs,
- effect on acetylcholine and choline in mouse brain, 1607
- Cholinergic receptor,
- role in tolerance to oxotremorine, 1681
 - role in tolerance to phencyclidine derivatives, 1671
- Cholinesterase,
- acute and chronic inhibition, effect on synthesis and distribution of acetylcholine, 633
 - in ponto-medullary region of brain in rats treated with armin and obidoxime, 601
- Cholinomimetic agents,
- effect on phagocytosis by and release of lysosomal enzymes from neutrophils, 2001
- Chondrocytes,
- effect of tetracycline on calcium transport in mitochondria, 595
- Ciclazindol,
- Ciclazindol, binding by human plasma, 1361
- Circular dichroism,
- inhibitory effect of oleic acid on binding of diazepam to human serum albumin, 2157
 - salicylate binding to human serum albumin, 283
- Citrovorum factor,
- reversal of methotrexate-induced immunosuppression in mice, 203
- Clofibrate,
- effect on biochemistry in normal and thyroidectomized rats, 301
 - effect on carnitine acetyltransferase in liver, 1451,1697
 - effect on ethanol and sorbital metabolism in rats, 331
 - effect on fatty acid chain elongation synthesis, 1401
 - effect on fatty acid oxidation by liver mitochondria, 2225
 - effect on hepatic glucuronidation and clearance of bilirubin, 547
 - influence on metabolic effects of ethanol, 425
- Clomipramine,
- effects on amine uptake and release by synaptosomes and platelets, 497
 - effect on 5-hydroxytryptamine turnover in brain, 505
- Clophen A,
- effect on drug metabolism in rabbits and rats, 783
- Clorgyline,
- inhibition of monoamine oxidase in

BIOCHEMICAL PHARMACOLOGY

Clorgyline(contd.)

beef brain mitochondria, 1637
inhibition of monoamine oxidase in
mouse brain and liver, 1991
inhibition of monoamine oxidase in
rat liver, 2269
interaction with pethidine in
rabbits, 806

Clozapine,

effect on dopamine-sensitive adenylyl-
ate cyclase, 1719
sites of action, 1741

CoA-SH,

and its derivatives in liver, effect
of clofibrate, 425

Cobalt chloride,

effect on cholesterol biosynthesis
in liver, 481

Cockroach,

effect of fire ant venom on respirat-
ion and oxidative phosphorylation
of muscle mitochondria, 1179

Coformycin,

effect on adenosine toxicity in
lymphoid cells, 2371
inhibition of muscle 5'-AMP deaminase
663
effect on purine metabolism in intact
Schistosoma mansoni, 1849
effect on purine metabolism in
mammalian cells, 1967

Collagen,

effect of reserpine on platelet
adherence, 149
synthesis in carrageenin granuloma,
effect of prostaglandin $F_{2\alpha}$, 2049
synthesis in chick embryo tendon

Collagen(contd.)

cells, effect of anti-inflamm-
atory steroids, 875, 1961

Collagen galactosyltransferase,
in liver and skin, effect of
prednisolone, 1295

Collagen glucosyltransferase,
in liver and skin, effect of
prednisolone, 1295

Collateral sensitivity,
problems of demonstration in murine
leukemia cells, 1094

Contaminating inhibitors,

in radioactive substrates, 1525

Contraceptive steroids,

effects of neomycin on biliary
excretion and enterohepatic
circulation, 943

Convulsions,

induced by glutamate and related
compounds, 253

Cordycepin,

inhibition of protein kinases, 1287

Corticosteroids,

effect on phagocytic release of
lysosomal enzymes from neutro-
phils, 2001

Corticosterone,

in plasma, effect of organophosphate
insecticides, 1901

Cortisol sulfotransferase,

in liver, effects of hypertension
in rats, 1033

Cotinine,

detection of nicotinamide nucleotide
analogues formed in vitro, 1841
formation of NAD and NADP analogues

- Cotinine(contd.)
1853
- Cotton leafworm(Spodoptera littoralis),
acetylcholinesterase inhibition by
carbarnates, 2187
- Coumarin 3-hydroxylase,
in liver microsomes, effect of
progesterones, 1495
- Creatine kinase,
in pig myocardium, effect of P13,1021
- Cyanamide,
effect on acetaldehyde in CSF during
ethanol oxidation, 237
- Cyanide,
inhibition of cytochrome c oxidase,
effect of methemoglobin, 2247
- Cyclic nucleotide phosphodiesterase,
in fat cells, effect of dimethyl-
sulfoxide, 775
- interaction with 4-alkyl-2,6,7-trioxa
-1-phosphabicyclo[2,2,2]octanes,
887
- in liver fluke, 2325
- in lung, effect of Sch 15280 and
aminophylline, 951
- in Walker carcinoma cells, effect of
cyclophosphamide and its
metabolites, 1469
- Cyclic nucleotides,
role in action of opiates, 1183
- Cyclohexamine,
tolerance in mice, in vivo and
in vitro studies, 1671
- Cyclohexane,
induction of hydroxylase in liver
microsomes, 1885
- Cycloheximide,
Cycloheximide,
effect on gastric secretion in rats,
979
- inhibition of vascular permeability
in granulomatous inflammation,
1131
- Cyclophosphamide,
and its metabolites, interaction
with cyclic AMP binding proteins,
1469
- a mixed hepatocyte-fibroblast
culture system as a test for
toxicity, 969
- toxicity and immunosuppression,
effect of N-acetylcysteine, 1015
- Cyproheptadine,
induced alterations in rat insulin
synthesis, 2021
- Cyproterone acetate,
effect on proteinase in testis and
epididymus, 5
- Cysteamine,
inhibition of mouse brain
glutamate decarboxylase, 345
- Cysteine,
effect on alcoholic liver injury,
1529
- Cysteine,
inhibition of mouse brain
glutamate decarboxylase, 345
- Cysteine oxidase,
in rat muscle, 1101
- Cytochrome b₅,
in liver microsomes,
effect of amino acid deficiencies
667
- effect of griseofulvin, 1125

BIOCHEMICAL PHARMACOLOGY

- Cytochrome c oxidase,
inhibition by cyanide, sulfide or
azide, effect of methemoglobin,
2247
- Cytochrome c reductase,
in cultured glial cells, effect of
pentobarbital, 1307
distribution in rainbow trout liver,
1395
in liver microsomes,
effect of carbon disulphide, 1521
fetal and neonatal rats, 567
effect of griseofulvin, 1125
effect of ketamine, 2445
pregnant rats, induction, 577
in lung and kidney microsomes, effect
of factors known to affect
hepatic activity, 749
- Cytochrome P-450,
in adrenal mitochondria, effect of
22-azacholesterol on optical
and magnetic properties, 1109
barbiturate affinity, 2117
catalysed NADH-dependent N-oxide
reduction, 489
in fetal liver, induction, 567
effect of inhibition on electron
transport chain, 389
a kinetic model for the determination
of the multiple forms, 549
in liver microsomes,
effect of acetaminophen, 893
effect of amino acid deficiencies,
667
effect of androgens on turnover
of, 1979
effect of carbon disulphide, 1521
- Cytochrome P-450,
in liver microsomes(contd.)
effect of carbon tetrachloride-
induced lipid peroxidation, 2275
combined effects of low doses of
DDT and phenobarbital, 1299
effect of cyclohexane and camphor,
1885
effect of dietary lipid peroxides,
sterols and oxidized sterols, 1417
effect of dimethyl sulfoxide in
phenobarbital pretreated rats, 902
fluroxene mediated destruction,
1601
effects of FSH and LH, 66
effect of griseofulvin, 1125
interaction with pilocarpine, 2072
effect of ketamine, 2445
lack of effect of dietary
ascorbic acid, 2037
effect of pentachlorophenol, 1549
effect of polychlorinated
biphenyls, 783, 2043
pregnant rats, 577
effect of steric factors on
imidazole binding, 1039
in lung and kidney microsomes,
effect of factors known to affect
hepatic activity, 749
in reconstituted microsomal
systems, 2061
reduced, interaction with
nitromethane, 963
reduction of nitroxide to hydroxyl-
amine, 675
a reverse type I spectral change
observed with hemin, 1543

- Cytochrome P-450(contd.)
 role in mutagenicity of 2,4-diamino-
 anisole in vitro, 729
- Cytochrome P-450 reductase,
 in liver microsomes, role in mixed-
 function oxidase activity, 1803
- D-600,
 effect on renal gluconeogenesis, 1089
- Daunomycin,
 effect on DNase I from bovine
 pancreas, 1953
 interaction with tRNA, spectroscopic
 studies, 1729
- Daunorubicin,
 transport and binding in Ehrlich
 ascites tumour cells, 215
- Daunorubicin reductase,
 in rat liver, 1117
- DDE,
 effect on hepatic microsomal mixed-
 function oxidases in the puffin,
 1000
- DDT,
 plus phenobarbital in low doses,
 induction of drug metabolism, 1299
- 7-Deaza-adenosine,
 effect on purine metabolism in
 intact Schistosoma mansoni, 1849
- Decarbofuran,
 interaction with acetylcholinesterase
 757
- Demethylation,
 in liver microsomes, effect of
 dietary lipid peroxides, sterols
 and oxidized sterols, 1417
- 2'-Deoxyadenosine,
 enhancement by caffeine of growth
 inhibitory effects in lymphoma
 L1578Y cells, 1533
 toxicity in L-cells treated with
 adenosine deaminase inhibitors,
 71
- Deoxycoformycin,
 inhibition of adenosine deaminase,
 359
 inhibition of muscle 5'-AMP
 deaminase, 663
 effects on purine metabolism, 1967
 effect on toxicities of adenosine
 and 2'-deoxyadenosine in L-cells,
 71
- Deoxyribonuclease I,
 from bovine pancreas, effect of
 daunomycin, adriamycin and its
 congener AD 32, 1953
- Deoxyribonucleic acid,
 cross linking in furazolidone
 treated Vibrio cholerae cell, 1453
 liver, repair of damage caused by
 ethylene dibromide, 1941
 synthesis in E. coli, effect of
 tranquilizer drugs, 1205
 synthesis in human lymphocytes,
 effect of phytohemagglutinin and
 1-tetramizole, 1358
 synthesis in liver, effect of
 nafenopin, 939
 utilization of deoxyuridine and
 thymidine for synthesis in rat
 organs, 59
- Deoxyribonucleoside triphosphate pools
 in relation to adenosine toxicity,

- Deoxyribonucleoside triphosphate
pools (contd.)
2371
- Deoxyribonucleoside triphosphates,
in human lymphocytes, effects of
2,4-diamino-5-(3',4'-dichloro-
phenyl)-6-methylpyrimidine and
2,4-diamino-5-(3',4'-dichloro-
phenyl)-6-ethylpyrimidine, 543
- Deoxyuridine,
incorporation of label into
macromolecules in rat organs, 59
- Deprenyl,
inhibition of monoamine oxidase in
beef brain mitochondria, 1637
inhibition of monoamine oxidase in
human platelets, 853
inhibition of monoamine oxidase in
mouse brain and liver, 1991
interaction with pethidine in
rabbits, 806
- Desipramine,
effect on noradrenaline-sensitive
adenylate cyclase in mouse limbic
forebrain, 1877
effect on uptake of mescaline by
cortical synaptosomes, 207
- Deslanatoside C,
subcellular distribution in heart
and liver of conscious guinea
pigs, 2437
- Desmethylinipramine,
effects on depletion of biogenic
amines from rat brain in vivo,
1083
effect on 6-hydroxytryptamine
induced changes in cerebral
- Desmethylinipramine (contd.)
catecholamines, 2211
effect on melatonin production by
pineal gland, 904
- Development,
estrogen binding protein in liver,
923
effect of ethanol on ornithine
decarboxylase in heart and brain,
523
gastric histamine metabolism, 585
kinetics of p-aminohippurate
transport in kidney slices, 1809
monoamine oxidase in heart, effect
of adrenalectomy, 407
- Dexamethasone,
effect on collagen synthesis
in vitro, 1961
- Dexamethasone acetate,
effect on phagocytic release of
lysosomal enzymes from neutro-
phils, 2001
- Diacridines,
effect on nucleolar RNA synthesis,
269
inhibition of processing of precur-
sor rRNA and inhibition of
methylation of E. coli tRNA, 275
- Diamine oxidase,
in placenta, 121
- 2,4-Diaminoanisole,
role of cytochrome P-450 metabolism
in mutagenicity in vitro, 729
- 2,4-Diamino-5-(3',4'-dichlorophenyl)-
6-ethyl pyrimidine,
effect on deoxyribonucleoside tri-
phosphate in human cells, 543

- 2,4-Diamino-5-(3',4'-dichlorophenyl)-
6-methylpyrimidine,
effects on deoxyribonucleoside
triphosphate in human cells, 543
- Diazepam,
binding to human serum albumin,
effect of oleic acid, circular
dichroism studies, 2157
- Diazinon,
mechanism of teratogenic effect in
chick embryos, 2251
- N,N-Di(2-bromo-n-propyl)amino-3-methyl
-2'-carboxy-azobenzene,
clinical pharmacology, 1715
- Dibucaine,
effect on glycerol and K^+ translocat-
ion across red cell membrane, 779
interaction with phospholipid
bilayer membranes, 51
- Dibutyryl cyclic AMP,
stimulation of dopamine synthesis
by striatal slices, effect of
ethanol, 559
- 2,2'-Dichlorobiphenyl,
interaction with rabbit liver
monooxygenase, 2043
- Dichloromethane,
effect on hemoglobin function, 557
- 2,3-Dichloro- α -methylbenzylamine,
effect on adrenaline in rat brain,
2087
- 2,6-Dichlorophenol indophenol,
reduction by bovine methemoglobin
reductase, effect of non-steroidal
anti-inflammatory compounds, 685
- Dichlorvos,
effect on adrenal cholesteryl ester
- Dichlorvos(contd.)
and steroid metabolism, 1901
effect on glutathione in liver, 997
- cis-Dicrotophos,
mechanism of teratogenic effect in
chick embryos, 2251
- Diethyldithiocarbamate,
effect on 1,2-dimethylhydrazine,
metabolism in vivo, 1763
- Diflumidone,
mechanism of action, 307
- Digitoxin,
influence of unsaturated phosphat-
idylcholine on cardiac effect of,
381
subcellular distribution in heart
of conscious guinea pigs, 2427
- 7,8-Dihydro-7,8-dihydroxybenzo(a)-
pyrene,
metabolism by short-term organ
cultures of hamster lung, 1481
- 9,10-Dihydro-9,10-dihydroxybenzo(a)-
pyrene,
metabolism by short-term organ
cultures of hamster lung, 1481
- 7,8-Dihydrofolate,
biosynthesis in bacteria, inhibition
by sulphonamido-trimethoprin
combinations, 451
- Dihydrofolate reductase,
in rabbit brain, 1507
in Walker carcinoma, effect of
chlorambucil, 1027
- 1,6-Dihydro-6-hydroxymethyl purine
ribonucleoside,
inhibition of adenosine deaminase,
359

- 3,4-Dihydroxyphenylacetic acid,
in brain in rabbits made tolerant
to E.coli lipopolysaccharide, 1613
in CSF of schizophrenics, effect of
probenecid, 629
in plasma, effects of nigrostriatal
pathway stimulation and tropolone,
2197
- Dimaprit,
inhibition of histamine N-methyl-
transferase and histaminase, 2075
- N,N-Dimethylaniline,
hepatic microsomal N-oxidation, 2449
- N,N-Dimethylaniline N-oxide,
reduction by liver microsomal
cytochrome P-450, 489
- 1,2-Dimethylhydrazine,
effects of disulfiram and related
compounds on metabolism in vivo,
1763
- 2-(2,2-Dimethylhydrazino)-4-(5-nitro-
2-furyl)thiazole,
mutagenicity in Salmonella, 896
- Dimethylnitrosamine,
metabolism by rat liver, 809
- Dimethylsulfoxide,
effect on drug metabolizing enzymes
in phenobarbital pretreated rats,
902
effect on fat cell metabolism, 775
- Dioxane,
metabolism in vivo,
identification of p-dioxane-2-one
as the major urinary metabolite,
1535
effect of inducers and inhibitors
on excretion of p-dioxane-2-one,
- Dioxane(contd.)
1539
- Diphenylhydantoin,
in vitro hydroxylation, 1929
- Diphenylhydramine,
effect on brain monoamine
metabolism, 133
- Dipyridamole,
effect on cyclic AMP-elevating
action of adenosine, 37
and its monoglucuronide, effect on
adenosine uptake by human
platelets and ADP-induced
platelet aggregation, 906
- Disophenol,
effects on isolated perfused rat
heart, 2297
- Disulfiram,
effect on catecholamine metabolism
in liver and brain, 741
effect on 1,2-dimethylhydrazine
metabolism in vivo, 1763
effect on α -naphthylisothiocyanate
hepatotoxicity, 1857
- 5',5-Dithiobisnitrobenzoic acid,
effect on platelet aggregation and
transport processes, 319
- Dithiothreitol,
effect on platelet aggregation and
transport processes, 319
- Dog,
papaverine-induced metabolic
alterations in perfused liver,
1339
- Dopa,
formation from phenylalanine in
human brain, 900

BIOCHEMICAL PHARMACOLOGY

Dopa(contd.)

synthesis in brain, effect of brain
tyrosine concentration, 1137

Dopamine,

acidic metabolites in CSF, effect of
probenecid, 629

activation of synaptosomal ATPase,
2029

effect on ATPase in brain
microsomes, 1221

binding sites in synaptic membranes,
2011

in brain,

effect of (-)-amphetamine induced
changes in seizure threshold, 799

effect of intraventricular

injection of 6-hydroxydopamine on
regional levels, 2211

in rabbits made tolerant to E.coli
lipopolysaccharide, 1613

effect of thyrotropin-releasing
hormone on depletion induced by
 α -methyltyrosine, 1817

depletion from rat brain in vivo,
effect of antidepressants, 1083

formation from phenylalanine in
human brain, 900

induced accumulation of cyclic AMP
in retina, effect of lithium, 167

metabolism in brain,

effect of antihistaminic drugs, 133
effect of disulfiram and chloral
hydrate, 741

metabolism in liver, effect of
disulfiram and chloral hydrate,
741

metabolism in rats in relation to

Dopamine(contd.)

alcohol preference, 841

$^{18}O_2$ in measuring the formation of,
1271

in striatum, effect of ethanol and
reserpine, 653

synapse-blocking actions of
neuroleptics, 1741

synaptosomal uptake,
effect of cannabinoids, 1327

effect of phencyclidine, 1435

synthesis by striatal slices, effect
of ethanol, 559

Dopamine β -hydroxylase,

in adrenal, inhibition by anti-
thyroid agents, 1092

endogenous inhibitors in rat liver,
1985

release from adrenal, effect of
prostaglandin E_2 and phenyl-
ephrine, 351

in serum, rapid changes and half-
life, effect of glucagon, 986

Dopamine receptors,

on dopaminergic neurons, 259

noradrenergic neurons, 259

Dopaminergic agonists,

effect on noradrenaline-sensitive
adenylate cyclase in mouse
limbic system, 1877

Dopaminergic areas of brain,

action of antipsychotic drugs on
adenylate cyclase in, 1719

Dopaminergic neurons,

functional activity reflected in
DOPAC concentration in plasma,

2197

- Dopaminergic neurons(contd.)
 effect of picrotoxin on γ -hydroxy-
 butyrate action, 2079
 presynaptic receptors, 259
- Drug-membrane interactions,
 characterization using the liposome
 system, 2319
- Drug-receptor interaction, 913
- Drug resistance,
 collateral sensitivity, 1094
- EDTA,
 effect on rate of NADPH oxidation,
 389
- Ehrlich ascites tumour cells,
 metabolism and effects of dialdehyde
 derivatives of inosine, 1197
 specificity of adenosine deaminase
 inhibitors, 1967
 transport and binding of anthra-
 cycline antibiotics, 215
- α -Elastin,
 effect of calcitonin on immun-
 arteriosclerosis, 2129
- Electrophorus electricus,
 soman and receptor-ligand interaction
 in electroplaques, 337
- Ellipticine,
 hydroxylation by liver microsomes,
 2126
- Energy state,
 in brain, effect of hyperammonemia,
 2397
- Epileptic foci,
 activation by glutamate and related
 compounds, 253
- Epididymal fat pads,
 Epididymal fat pads,
 effects of morphine on lipolysis,
 143
- Epididymis,
 effect of cyproterone acetate on
 proteinase activity, 5
- Epilepsy,
 role of folates, 1009
- Epoxidase,
 in liver microsomes and armyworm
 gut, steric factors in effect of
 imidazoles, 1039
- Epoxide hydrazide,
 in liver microsomes, effect of
 phenobarbital and 3-methyl-
 cholanthrene, 891
- Epoxide hydratase,
 in fetal and maternal tissues,
 transplacental induction by
 2,3,7,8-tetrachlorodibenzo-p-
 dioxin, 1383
- in rat organs, 603
- Ergocornine,
 effect on noradrenaline-sensitive
 adenylate cyclase in mouse limbic
 forebrain, 1877
- Ergosterol,
 conferred sensitivity to amphoteric-
 in B in L1210 leukemia cells, 177
- Erythrocytes,
 effect of anaesthetics on glycerol
 and K^+ translocation, 779
 asymmetric distribution of chlor-
 promazine and its quaternary
 analogue over the membrane, 2411
 inhibition of orotidylate
 decarboxylase, 1947

Erythrocytes(contd.)

irreversible inactivation of ATPase
activity by tetracaine, 2241

effect of monocyclic compounds, 2145

Erythro-9-(hydroxy-3-nonyl)adenine,

inhibition of adenosine deaminase,
359

effect on purine metabolism, 1967

effect on toxicities of adenosine
and 2'-deoxyadenosine in L-cells,
71

Escherichia coli,

effect of diacridines in methylation
of tRNA, 275

effect of tranquilizer drugs on
protein and nucleic acid synthesis
1205

Escherichia coli enterotoxin,

assay, mechanism of action,
pharmacology, 1103

Estradiol,

biliary excretion and enterohepatic
circulation, effects of
neomycin, 943

specific macromolecular binding in
mammalian liver supernatant,
919, 923

effect on taurocholate uptake into
hepatocytes, 2433

treated rats, effects of cannabis
extract on uterine glycogen
metabolism, 859

Estrogen receptor,

in mammalian liver, 923

Ethacrynic acid,

effect on sodium and potassium
transport in kidney, 711

Ethanol,

effect on acetaldehyde in CSF, 237

acetaldehyde distribution in liver,
brain, blood and breath during
oxidation of, 241

acetaldehyde regulation in liver
during oxidation of, 249

effect on alcohol dehydrogenase in
mouse liver, 441

effect on catecholamine-induced
changes in glucose homeostasis,
2231

effect on dibutyryl cyclic AMP and
theophylline stimulation of
dopamine biosynthesis in striatal
slices, 559

effect on dopaminergic and cholin-
ergic striatal systems, 653

induced conformational changes in
rat brain microsomal membranes,
2181

induced fatty liver,

effect of 3-amino-1,2,4-triazole
on catalase and triglycerides in,
625

effect of aminotriazole on
triglyceride formation, 1255
mechanism of effect of clofibrate
425

liver metabolism in clofibrate-
treated rats, 331

effect on neonatal rat brain and
heart ornithine decarboxylase, 523

effect on noradrenaline metabolism
in rat brain, 1147

possible protective role for
sulphydryl compounds against

- Ethanol(contd.)
 toxicity, 1529
 effect on propranolol metabolism by
 rat liver microsomes, 2447
 effect on protein kinase-stimulated
 calcium transport, 393
- Ethanolamine-O-sulphate,
 effect on GABA metabolism in regions
 of mouse brain, 1569
- Ethinyl estradiol,
 effect on oleate incorporation into
 triglyceride and ketone bodies
 by liver, 77
 effect on plasma renin substrate
 levels, 923
- Ethionine,
 induced fatty liver, effect of
 3-amino-1,2,4-triazole on catalase
 and triglycerides in, 625
- Ethosuximide,
 inhibition of in vitro hydroxylation
 of diphenylhydantoin, 1929
- 7-Ethoxycoumarin deethylase,
 in liver microsomes, effect of
 carbon disulphide, 1521
- 2-(N-Ethylcarnamoylhydroxymethyl)furan,
 toxicity and covalent binding, 1909
- Ethylene dibromide,
 repair of liver DNA damage, 1941
- N-(2-Ethylhexyl)-3-hydroxybutyramide,
 induced release of 5-hydroxytrypt-
 amine from mast cells, 197
- 1-Ethyl-4-(isopropylidenehydrazino)-
 1H-pyrazolo-(3,4-b)pyridine-5-
 carboxylic acid, ethyl ester, HCl,
 inhibition of phosphodiesterase in
 liver fluke, 2325
- N-Ethylmaleimide,
 effect on platelet aggregation and
 transport processes, 319
 effect on sodium and potassium
 transport in kidney, 711
- Ethylmorphine,
N-demethylation by liver microsomes,
 effect of acetaminophen, 893
 effects of FSH and LH, 66
 effect of nitromethane on
 kinetics of, 963
- Ethylmorphine N-demethylase,
 in fetal and maternal rat liver,
 induction of, 567
 in liver microsomes,
 androgen-induced imprinting, 1979
 kinetics at low substrate
 concentrations, 1803
 pregnant rats, induction of, 577
- Ethylumbelliferone dealkylase,
 relative activity characterizing
 the effect of inducers on
 hydroxylase system in liver
 microsomes, 1885
- bis(Ethylxanthogen),
 effect on 1,2-dimethylhydrazine
 metabolism in vivo, 1763
- Extrahepatic drug metabolism,
 alteration by factors known to
 affect hepatic activity, 749
- Fat cells,
 effect of adrenaline on phosphatidyl-
 choline synthesis, 1475
 effects of dimethylsulfoxide on
 metabolism of, 775
- Fatty acids,

- Fatty acids,
 effect on binding of quinidine and warfarin in plasma, 229
 chain elongation synthesis in liver microsomes, reduction in clofibrate-fed rats, 1401
 concentration-dependent effects on warfarin binding to albumin, 1143
 dietary,
 effect on benzo[a]pyrene metabolism by liver microsomes, 1423
 effect on oxidative drug metabolism in liver, 1417
 oxidation by liver mitochondria, effect of clofibrate, 2225
 in plasma, effect of carbon disulphide on turnover of, 1625
 release from fat pad, effect of morphine, 143
 in serum, effect of aminotriazole, 1255
- Fatty acid desaturase,
 in liver microsomes, effect of griseofulvin, 1125
- Fatty acid synthetase,
 in liver, effect of clofibrate, 1401
- Fatty liver,
 ethanol induced,
 ATP metabolism in, 1299
 effects of clofibrate, 425
 ethanol, carbon tetrachloride or ethionine induced, effect of aminotriazole on catalase activity and triglyceride level, 625
- Fenclorac,
in vitro inhibition of prostaglandin synthetase, 1051
- Ferrochelatase,
 in liver, effect of ascorbic acid deficiency, 797
- Fetal placenta,
 biosynthesis and metabolism of putrescine, 121
- Fetus,
 induction of hepatic mono-oxygenase systems in rats, 567
 transplacental induction of mixed-function oxygenases in extra-hepatic tissues by 2,3,7,8-tetrachlorodibenzo-p-dioxin, 1383
- Fever,
 response in lipopolysaccharide-treated rabbits, biogenic amines in brain, 1613
- Fibroblasts,
 human, cultured, membrane adsorption and internalization of chloroquine, 7
 mouse, cultured, purification of kinin-forming acid protease from, 1187
 toxicities of adenosine and 2'-deoxyadenosine after treatment with adenosine deaminase inhibitors, 71
 rat cultured, effect of pentobarbital on carbohydrate metabolism, 1307
- Fire ant venom,
 effect on ATPase from brain, 983
 effect on respiration and oxidative phosphorylation of cockroach muscle, 1179
- Fish,

- Fish,
fractionation and subcellular localization of marker enzymes in liver, 1395
- Flavomycin,
effect on mitochondrial respiration, 433
- Flufenamic acid,
effect on collagenolytic activity of cathepsin B1, 2121
effect on oxidative phosphorylation in rat liver mitochondria, 2101
- 9 α -Fluoro-11 β ,17 α ,21-trihydroxy-pregn-4-ene-3,20-dione,
cortisol sulfation and hypertension, 1033
- Flupenthixol,
sites of action, 1741
- Fluphenazine,
effect on dopamine-sensitive adenylate cyclase, 1719
sites of action, 1741
- Flurbiprofen,
effect on collagenolytic activity of cathepsin B1, 2121
- Fluoxetine,
metabolism and degradation of cytochromes P-450 in vitro, 1601
- Folate analogues,
incorporation of sulphonamido compounds in bacteria, 451
- Folates,
role in neurotransmitter metabolism, 1009
- Follicle stimulating hormone,
effect on hepatic drug metabolism in gonadectomized rats, 66
- Formycin,
effect on purine metabolism in intact Schistosoma mansoni, 1849
- Freund's adjuvant,
effect on liver N-acetyltransferase activity and elimination of sulphadimidine in urine, 69
- Furans,
toxicity and covalent binding of 2-(N-ethylcarbamoylhydroxymethyl) furan, 1909
- Furazolidone,
treated Vibrio cholerae cell, cross linking of DNA, 1453
- Ganglia,
muscarinic and nicotinic effect on phosphatidylinositol metabolism, 448
- Gastric mucosa,
inhibition of ATPase by phenylbutazone and indomethacin, 1241
- Gastric secretion,
correlation with gastric protein kinase, 991
inhibitory effect of cycloheximide, 979
- Gastrointestinal flora,
importance in metabolism of estrogens, 943
- Genetic mechanisms,
in trans-synaptic induction of tyrosine hydroxylase, 817
- Glial cells,
cultured, effect of pentobarbital on carbohydrate metabolism in, 1307

- Glutamate dehydrogenase,
in cultured glial cells, effect of
pentobarbital, 1307
- Glutamine,
production in brain, effect of
hyperammonemia, 2397
- Glutarate,
inhibition of mouse brain glutamate
decarboxylase, 345
- Glutathione,
in liver,
effect of dichlorvos, 997
paracetamol induced depletion, 31
effect of sulphhydryl compounds
on ethanol toxicity, 1529
- Glutathione S-aryl transferase,
in liver, effects of dietary
ascorbic acid, 2037
- Glutathione S-transferase B,
in rat liver, induction by pheno-
barbital and 3-methylcholanthrene,
555
- Glutathione S-transferases,
as a possible detoxification system
of rat intestinal epithelium, 2359
- Glycerol,
in plasma, effect of isoproterenol
and adrenaline, 1065
translocation across red cell
membrane, effect of anaesthetics,
779
- Glycine,
effect of folates on metabolism in
nervous system, 1009
- Glycogen,
in heart, effect of disophenol
perfusion, 2297
- Glycogen(contd.)
metabolism in uterus, effect of
cannabis extract, 859
- Glycoprotein,
in human plasma, ciclazindol
binding, 1361
- Glycosides,
subcellular distribution in heart
and liver of conscious guinea
pigs, 2427
- Glycyrrhizin,
protective action against saponin
toxicity, 643
- Gold,
binding in kidney, 1819
distribution in rat liver cells
after administration of sodium
aurothiomalate, 2417
- Granulocyte/monocyte precursor cells,
sensitivity to phenylbutazone,
oxyphenbutazone and γ -hydroxy-
phenylbutazone, 847
- Griseofulvin,
alteration of hepatic microsomal
enzymes in mice, 1125
- Grollman hypertension,
effect on cortisol sulfotransferase
in rat liver, 1033
- Guanosine-3',5'-monophosphate,
in cerebellum, effect of harmaline
and its sulphur analogue, 1303
effect on phagocytosis by and
release of lysosomal enzymes from
neutrophils, 2001
- Guanylate kinase,
interaction with 6-thioguanosine
5'-phosphate, 1573, 1577

- Gunn rats,
 p-aminobenzoic acid conjugation in,
 535
- Hadacidin,
 effect on enzymes using aspartic
 acid as a metabolite, 1353
- Hageman factor,
 inhibition of formation by peptide
 fragments from kininogen, 115
- Haloperidol,
 sites of action, 1741
- Halothane,
 biotransformation and hepatotoxicity,
 2091
- Harmaline,
 inhibition of monoamine oxidase in
 beef brain mitochondria, 1637
 inhibition of monoamine oxidase in
 brain and liver, 1991
 and its sulphur analogue, effect on
 monoamine oxidase in brain and
 liver and cyclic GMP in cerebellum
 1303
- Harman,
 inhibition of monoamine oxidase in
 brain and liver, 1991
- Heart,
 effect of acebutolol, practolol and
 propranolol on sarcolemma, 2055
 effect of bencyclane on mitochondrial
 function, 2125
 calcium binding to plasma membranes,
 effect of propranolol analogues,
 2283
 catecholamine hypersensitivity of
 adenylate cyclase after chemical
- Heart(contd.)
 denervation, 1448
 effects of chlorpromazine and
 molindone on adenylyl cyclase
 activity and contractility, 1315
 effect of disopphenol perfusion, 2297
 influence of unsaturated phosphatid-
 ylcholine on effects of cardio-
 active drugs, 381
 mechanism of action of β -blockers
 in hypertension, 171
 metabolic effects of inosine and
 uridine, 1585
 ornithine decarboxylase in, effect
 of perinatal exposure to
 ethanol, 523
 effect of pargyline on amine
 oxidases in, 2107
 effect of PL3 on energy stores in,
 1021
 uptake and distribution of
 glycosides in situ, 2427
- Hederaginins,
 effect on protein synthesis in
 cells from rat marrow, 2113
- HeLa cells,
 effect of diacridines on nucleolar
 RNA synthesis, 269
 effect of diacridines on processing
 of precursor rRNA, 275
 sensitivity to amphotericin B and
 the cholesterol:phospholipid
 ratio of, 705
- Heme,
 lysis of bloodstream forms of
 Trypanosoma brucei, 1923
 synthesis in liver of ascorbic acid

BIOCHEMICAL PHARMACOLOGY

- Heme(contd.)
 deficient guinea pigs, 797
- Hemin,
 reverse type I spectral change
 observed with, significance with
 respect to cytochrome P-450,1543
- Hemoglobin,
 effect of dichloromethane on
 function of, 557
- Hemolytic complement activity,
 inhibition by benzamidine derivatives
 325
- Heparin,
 effect on binding of quinidine and
 warfarin in plasma, 229
 release of histaminase from intest-
 inal cells and vasculature, 2343
- Hepatocytes,
 effect of cholestatic steroids on
 taurocholate uptake, 2433
 ketogenesis from endogenous lipids,
 789
- Hepatocyte-fibroblast culture systems,
 a test for metabolism-mediated
 cytotoxicity, 969
- Hepatoma-specific alkylating agent,
 CB10-252, clinical pharmacology,1715
- Hexachlorobenzene,
 effect on metabolism and hepato-
 toxicity of chloroethylenes, 369
- Hexachlorobiphenyl,
 interaction with rabbit liver
 monooxygenase, 2043
- γ -Hexachlorocyclohexane,
 effect on rat liver lysosomes, 1377
- Hexamethylmelamine,
in vitro studies, 2385
- Hexobarbital,
 binding to hepatic microsomes, 988
 pregnant rats, 577
 metabolism by liver microsomes,
 effect of microsomal enzyme
 inducers, 467
 effect of pilocarpine, 2072
 sleeping time,
 effect of microsomal enzyme
 inducers, 467
 effect of polychlorinated
 biphenyls in rabbits and rats,783
- Hexobendine,
 effects of bis(p-nitrophenyl)-
 phosphate on disposition and
 metabolism, 223
- Histaminase,
 ileum, inhibition by dimaprit,2075
 localization in rat small intestinal
 mucosa, site of release by
 heparin, 2343
- Histamine,
 lack of effect on oxidative
 properties of ceruloplasmin, 975
 effect on lung cyclic AMP levels in
 pertussis-vaccinated mice, 529
 metabolism in stomach of aging rat,
 585
 release from mast cells induced by
 N-(alkyl)-3-hydroxybutyramide,197
 release from sensitized and anaphyl-
 actic guinea pig lungs, changes
 in cyclic AMP, 181
- Histamine N-methyltransferase,
 in brain, inhibition by dimaprit,
 2075
- Homovanillic acid,

- Homovanillic acid,
 in brain of rabbits made tolerant to
E.coli lipopolysaccharide, 1613
 in CSF, effect of antihistaminic
 drugs, 133
 in CSF of schizophrenics, effect of
 probenecid, 629
- Honey bee (Apis mellifera),
 acetylcholinesterase inhibition
 by carbamates, 2187
- Housefly,
 inhibition of mixed-function oxidase
 system by butylated hydroxyanisole
 2315
- Hydrocortisone,
 effect on allylisopropylacetamide-
 induced porphyrin biosynthesis in
 chick embryo liver cells, 1389
 effect on collagen synthesis
in vitro, 1961
- Hydrocortisone hemisuccinate,
 effect on phagocytic release of
 lysosomal enzymes from neutro-
 phils, 2001
- N-Hydroxy-2-acetylaminofluorene,
 role of sulfotransferase from rat
 liver on mutagenicity in
Salmonella typhimurium, 1356
- p-Hydroxyamphetamine,
 accumulation by brain homogenates,
 role in release of catecholamines
 1367
- 3-Hydroxybenzo(a)pyrene,
 enzymatic formation and properties
 of a conjugate of sulphate, 679
- 7- and 9-Hydroxybenzo(a)pyrenes,
 organic solvent soluble sulphate
 7- and 9-Hydroxybenzo(a)pyrenes(contd.)
 ester conjugates of, 551
- β -Hydroxybutyrate,
 incorporation into neural lipids of
 zuclophene treated rats, 1161
- γ -Hydroxybutyrate,
 effect of picrotoxin on action on
 dopaminergic neurons, 2079
 effect on plasma prolactin in male
 rats, 645
- 2-Hydroxy-3-deoxyestradiol,
 metabolism by rat liver microsomes,
 769
- 3-(2'-Hydroxy-4',5'-diethoxybenzoyl)-
 propionic acid,
 effect on cyclic AMP dependent
 protein kinase in smooth muscle,
 994
- 6-Hydroxydopamine,
 effect on catecholamine sensitivity
 of adenylate cyclase in heart,
 1448
 induced monoamine depletion in
 brain and heart, effect of 4-(3-
 indolyl-alkyl)piperidine
 derivatives, 505
 intraventricular injection, effect
 on catecholamine levels and
 tyrosine hydroxylase activity in
 brain regions, 2211
- Hydroxyethylhydrazide of cyanoacetic
 acid,
 modification of brain mitochondrial
 monoamine oxidase activity, 1059
- Hydroxyethyl-9',purinyl 6'-1-benzhydryl-4-piperazine dihydrochloride
 action on cholinergic system, 1517

- 5-Hydroxyindoleacetic acid,
 in brain, effect of LSD, 1085
 in CSF, effect of antihistaminic
 drugs, 133
- Hydroxylamine,
 oxidation by microsomes to nitroxide
 675
- Hydroxylase system,
 in liver microsomes, relative ethyl-
 umbelliferone dealkylase activity
 characterizing effect of inducers,
 1885
- p-Hydroxymandelic acid,
 in CSF of schizophrenics, effect
 of probenecid, 629
- β -Hydroxy- β -methylglutaryl coenzyme A
 reductase inhibitors,
 serum cholesterol lowering activity
 in rats, 2443
- N-Hydroxyphenacetin,
 generation of reactive metabolites
 by glucuronidation and sulfation,
 189
- Hydroxyphenobarbital,
 conjugation by rat liver microsomes,
 induction by phenobarbital, 1345
- p-Hydroxyphenylacetic acid,
 in CSF of schizophrenics, effect
 of probenecid, 629
- γ -Hydroxyphenylbutazone,
 sensitivity of human bone marrow,
 847
- Hydroxyphenylhydantoin,
 conjugation in rat liver microsomes,
 induction by phenobarbital, 1345
- 5-Hydroxytryptamine,
 effect on adenine nucleotide
- 5-Hydroxytryptamine(contd.)
 metabolism and glucose oxidation
 in platelets, 1667
 in brain, effect of LSD, 1085
 effect on cyclic AMP formation in
 liver fluke, 2325
 cytoplasmic and vesicular compart-
 ments in platelets, 517
 deamination in rat skeletal muscle,
 45
 effect of 4-(3-indolyl-alkyl)piper-
 idine derivatives on uptake and
 release by synaptosomes, heart
 and platelets, 497
 inhibition of brain aryl acylamidase
 2163
 metabolism in brain,
 effect of antihistaminic drugs,
 133
 effects of 6-chloro-2-amino-
 terralin and Org 6582, 1333
 metabolism in rats in relation to
 alcohol preference, 841
 $^{18}\text{O}_2$ in measuring the formation of,
 1271
 release from mast cells induced by
 N-(2-ethylhexyl)-3-hydroxy-
 butyramide and catecholamines,
 197
 synaptosomal uptake,
 effect of cannabinoids, 1327
 effect of phencyclidine, 1435
 transport in platelets, 1645
 effect of methoxyamphetamines, 647
 effect of thio reagents, 319
 turnover in brain, effect of 4-(3-
 indolyl-alkyl)piperidine

5-Hydroxytryptamine(contd.)

derivatives, 505

Hydroxyurea,

enhancement by caffeine of growth
inhibitory effects in lymphoma
L5178Y cells, 1533

Hyperammonemia,

effect on metabolism and cerebral
energy state in beagle dog, 2397

Hypertension,

central vasopressor action of
angiotensin, 1
effect on cortisol sulfotransferase
in rat liver, 1033
mechanism of action of β -blockers,
171
renal prostaglandin metabolism in
rats, 485

Hypothalamus,

ethanolamine-O-sulphate binding, 1569

Hypoxia,

prostaglandin-glucocorticoid
interaction in perfused cat liver
1463

Ibuprofen,

effect on oxidative phosphorylation
in rat liver mitochondria, 2101

Imidazoles,

effect on aging of phosphorylated
acetylcholinesterase, 656
inhibitory interaction with micro-
somal enzymes, steric factors,
1039

Imipramine,

antimuscarinic activity, 1559
effect on 5-hydroxytryptamine

Imipramine(contd.)

transport and storage in
platelets, 1645

Imipramine N-oxide,

reduction by liver microsomal
cytochrome P-450, 489

Immun-arteriosclerosis,

prevention by calcitonin, 2129

Immunosuppression,

methotrexate-induced, reversal by
citrovorum factor, 203

Indocyanine green,

effect of phenobarbital on factors
responsible for hepatic
clearance of, 1247

4-(3-Indolyl-alkyl)piperidine

derivatives,

effect on amine uptake and release
by synaptosomes, heart and
platelets, 497

effects on brain 5-hydroxytryptamine
turnover and cardiac and brain
noradrenaline depletion, 505

Indomethacin,

binding to human serum albumin,
circular dichroism study, 283

effect on collagenolytic activity
of cathepsin B1, 2121

inhibition of gastric K^+ -ATPase, 1241
in vitro inhibition of prostaglandin
synthetase, 1051

effect on lysosome stability, 11

effect on oxidative phosphorylation
in rat liver mitochondria, 2101

effect on reduction of 2,6-dichloro
phenol indophenol by bovine
methemoglobin reductase, 685

BIOCHEMICAL PHARMACOLOGY

- Induction of drug metabolism,
by natural diets, 1299
- Inflammation,
inhibition of vascular permeability
by cycloheximide, 1131
stimulation of biosynthesis of
anti-inflammatory proteins, 693
- Inosine,
dialdehyde derivative, metabolism
in Ehrlich ascites tumour cells,
1197
metabolic effects in rabbit heart
and rat skeletal muscle, 1585
- Insulin,
effect of cyproheptadine on
synthesis of, 2021
suppression of release, effect on
metabolic response to isoproteren-
ol and adrenaline, 1065
- Insulin/glucagon ratio,
decrease in clofibrate-treated rats,
425
- Insulin protease,
in rat liver, inhibitors of, 2349
- Intestinal loop,
absorption and metabolism of
perazine, 1275
- Intestinal mucosa,
incorporation of ^3H from deoxyuridine
and thymidine into RNA, 59
transport of monoquaternary ammonium
compounds, 99
- Intestine,
cellular localization of histaminase
site of release by heparin, 2343
effect of chlorpromazine on
methionine transport, 1411
- Intestine(contd.)
N-methyl-scopolamine transport, 763
role of glutathione S-transferases
in detoxification, 2359
- Iodoacetate,
effect on platelet aggregation and
transport processes, 319
- Ionophorus properties,
of narasin in rat liver
mitochondria, 1373
- Iron,
incorporation into red cells, effect
of benzene, 293
inhibition of ATPase, effect of
catecholamines, 1221
- Isethionic acid,
inhibition of taurocholic acid
synthesis in liver, 1175
- 3-Isobutyl-1-methyl-xanthine,
effect on allylisopropylacetamide-
induced porphyrin biosynthesis
in chick embryo liver cells, 1389
elevation of ornithine decarboxylase
and RNA polymerase I in liver,
2379
inhibition of phosphodiesterase in
liver fluke, 2325
- Isoleucine deficiency,
effect on mixed function oxidase
enzymes, 667
- Isopropylmethylphosphonylated
acetylcholinesterase,
effect of imidazoles and pH on
aging of, 656
- Isoproterenol,
effect on calcium accumulation and
release in submandibular

BIOCHEMICAL PHARMACOLOGY

Isoproterenol(contd.)

- microsomes, 125
- induced hyperglycemic response in rats, contribution of gluconeogenesis, 2231
- metabolic response in the rabbit, influence of nourishment, alloxan diabetes and propranolol, 1065

Jejunal epithelium,

- N-methyl-scopolamine transport, 763

Kallikrein,

- human urine, kinin-generating esterolytic activity, 1893
- in urine from rabbits infected with Trypanosoma brucei, 417

Kepone,

- inhibition of hepatic mitochondrial Mg^{2+} -ATPase, 1155

Ketamine,

- induction of hepatic microsomal drug metabolism, 2451

Ketogenesis,

- from endogenous lipids, effect of oleate and chlorpropamide, 789

Ketones,

- in liver, effect of ethinyl estradiol on incorporation of oleate, 77
- as substrates for rat liver aldehyde reductase, 1117

Kidney,

- effect of p-aminophenol on microsomal glucose-6-phosphatase, 2069
- binding of bismuth, role of metallothionein-like proteins, 257
- binding of gold, 1819

Kidney(contd.)

- effect of choline on tetraethylammonium transport, 1935
- drug metabolism in, effect of factors known to affect hepatic activity, 749
- kinetics of p-aminohippurate transport in slices during development, 1809
- mercury accumulation, effect of spironolactone, 1823
- effect of neomycin on phospholipid metabolism in, 1769
- nicotine binding, 1631
- prostaglandin metabolism in spontaneously hypertensive rats, 485
- relationship between trichlorophenoxyacetate and organic base transport system, 1709
- sodium and potassium transport in cortex and medulla, 711
- stimulation of gluconeogenesis by verapamil and D-600, 1089
- Kinin-forming acid protease, from mouse fibroblasts L-929, purification and characterization 1187
- Kininogen, high molecular weight, role of peptide fragments from, 115
- Kynureninase, in liver, inhibition by benzerazide, 1619
- Kynurenine formamidase, inhibition by organophosphorus and methylcarbamate insecticides, 2251

BIOCHEMICAL PHARMACOLOGY

- Labetalol,
effect on metabolism of noradrenaline released from cat spleen by nerve stimulation, 2137
- β -Lactam antibiotics,
mechanism of action at molecular level, 2203
- Lactate,
in heart, effect of disophenol perfusion, 2297
- Lactate dehydrogenase,
in cultured glial cells, effect of pentobarbital, 1307
- Lamprane,
inhibition of mushroom tyrosinases, 1345
- L cells,
sensitivity to amphotericin B and the cholesterol:phospholipid ratio of, 705
- Lead,
transport in bone marrow culture, 650
- Lead acetate,
induced alteration of central cholinergic function, 397
- lecithin,
soya, effect on lipolytic enzymes in the rabbit, 2393
- Leukemia cells,
human, isolation and characterization of uridine-cytidine kinase, 64
- L1210,
effect of acronycine on surface properties, 1077
adenosine toxicity, 2371
effect of 9- β -D-arabinofuranosyl-2-fluoroadenine, 2193
- Leukemia cells,
L1210(contd.)
ergosterol-conferred sensitivity to amphotericin B, 177
- L5187Y,
effect of acronycine on surface properties, 1077
adenosine toxicity, 2371
collateral sensitivity to methotrexate, 1094
inhibition of proliferation by Virazole, 1071
- L5178Y/A, collateral sensitivity to methotrexate, 1094
- Librium,
effect on nucleic acid and protein synthesis in E.coli, 1205
- Lidocaine,
effect on protein synthesis in chick embryo liver cells, 867
- Linoleate,
dietary, effect on oxidative drug metabolism in liver, 1417
- Lipid peroxidation,
in kidney, effect of p-aminophenol, 2069
in liver,
effect of anti-inflammatory drugs, 11
carbon tetrachloride induced in vitro, 2275
effect of phenobarbital, 164
effect of Silymarin, 2405
effect of subacute carbon disulphide exposure, 1521
effect of Δ^9 -tetrahydrocannabinol, 1797

BIOCHEMICAL PHARMACOLOGY

- Lipid peroxides,
 - dietary, effect on oxidative drug metabolism in liver, 1417
- Lipids,
 - effects of benztropine and trihexylphenidyl on phase transition temperature, 2441
 - dietary, effect on 3,4-benzo[a]pyrene metabolism in liver, 1423
 - metabolism in alcoholic fatty liver, effects of clofibrate, 425
 - in serum, effect of clofibrate in normal and thyroidectomized rats, 301
- Lipolysis,
 - in adipose tissue, inhibition by suloctidil, 1429
 - effects of morphine, 143
 - in fat cells, effect of dimethylsulfoxide, 775
 - thyroid hormone induced, effect of pyruvate, 1783
- Lipolytic enzymes,
 - in rabbit serum, aorta and liver, effect of intravenous phosphatidylcholine preparations, 2393
- Lipopolysaccharide,
 - E.coli, tolerance in rabbits, febrile response and biogenic amines in brain, 1613
- Liposomes,
 - effect of butylated hydroxytoluene on sodium transport, 2259
 - characterization of drug-membrane interactions, 2319
 - chlorpromazine and chlorpromazine methiodide binding, 2411
- Liposomes(contd.)
 - dibucaine and propranolol interaction, 51
 - Liposomes-nitrogen mustard mixture, effect on RNA and protein synthesis in mitochondria, 85
- Lithium,
 - inhibition of cyclic AMP accumulation induced by dopamine in retina, 167
- Liver,
 - nafenopin-induced growth, biochemical changes associated with, 939
- Liver blood flow,
 - effect of inducing agents, 1247
 - role in sulfobromophthalein transport, 1867
- Liver fluke(Fasciola hepatica),
 - phosphodiesterase in, 2325
- Local anaesthetics,
 - effect on ATPase, 791
- Locomotive activity,
 - effects of caffeine and theobromine, cyclic GMP/cyclic AMP ratio in brain, 1723
- Loxapine,
 - effect on dopamine-sensitive adenylate cyclase, 1719
- Lumazine,
 - pteridine metabolite in urine, 2217
- Lung,
 - benzo(a)pyrene metabolism by, 671
 - benzo(a)pyrene metabolism by short-term cultures, 1481
 - drug metabolism in, effect of factors known to affect hepatic activity, 749

BIOCHEMICAL PHARMACOLOGY

Lung(contd.)

fetal and maternal, transplacental
induction of mixed-function
oxidases by 2,3,7,8-tetrachloro-
dibenzo-*p*-dioxin, 1383
monoamine oxidase in mitochondria,
935
nicotine binding, 1631
perfused, effect of ventilation on
removal of mescaline, 1444
prostaglandin and histamine release
in anaphylaxis, changes in
cyclic AMP levels, 181
retinoid acid esterase in, 947
effect of Sch 15280 and aminophylline
on cyclic AMP in, 951
effect of thioureas on acetylcholin-
esterase activity, 313

Luteinizing hormone,

effect on hepatic drug metabolism in
gonadectomized rats, 66

Lymphocytes, human,

effects of 2,4-diamino-5-(3',4'-
dichlorophenyl)-6-methyl(ethyl)-
pyrimidines, 543

3-methylcholanthrene induction of
aryl hydrocarbon hydroxylase, 1831
phytohemagglutinin-stimulated,
effect of 1-tetramizole, 1358
effect of trimethoprim on blasto-
genic transformation, 1593

Lymphoma L5178Y cells,

asparagine-independent subline,
effect of asparaginase synthetase
inhibitors, 1405
enhancement by caffeine of growth
inhibitory effects of anti-

Lymphoma L5178Y cells(contd.)

metabolites, 1533
specificity of adenosine deaminase
inhibitors, 1967

Lysergic acid diethylamide,

effect on 5-hydroxytryptamine and
5-hydroxyindoleacetic acid in
brain regions, 1085

Lysosomal enzymes,

phagocytic release from neutrophils,
2001

Lysosomal membrane stabilizing proteins,

role in inflammation, 693

Lysosomes,

kidney, effect of tinoridine on
stability of, 11

liver,

effect of γ -hexachlorocyclo-
hexane, 1377

effect of tinoridine on
stability of, 11

Lysyl hydroxylase,

in liver and skin, effect of
prednisolone, 1295

Macrophages,

peritoneal, modulation of cyclic AMP
contents mediated by β_2 -adrenerg-
ic receptors, 1813
effect of platinum(IV) ion on
superoxide radical production, 473

Malate,

inhibition of mouse brain glutamate
decarboxylase, 345

Malate dehydrogenase,

in cultured glial cells, effect of
pentobarbital, 1307

BIOCHEMICAL PHARMACOLOGY

- Marrow cells,
 - sensitivity to pentacyclic triterp-
inoids, 2113
- Mast cells,
 - release of 5-hydroxytryptamine
induced by N-(2-ethylhexyl)-3-
hydroxybutyramide and catechol-
amines, 197
- Mastocytoma cells P-815,
 - release of 5-hydroxytryptamine
induced by N-(2-ethylhexyl)-3-
hydroxybutyramide and
catecholamines, 197
- Mecamylamine,
 - effect on phosphatidylinositol
metabolism in sympathetic ganglia,
448
- Median eminence,
 - action of antipsychotic drugs on
dopamine-sensitive adenylate
cyclase, 1719
- Melatonin,
 - production by pineal glands, effect
of desmethylinipramine, 904
- Membranes,
 - erythrocytes, interactions of
chlorpromazine and chlorimipramine
511
 - effects of monocyclic compounds, 2145
- Mephentermine,
 - metabolism in vitro, 1455
- β -Mercaptoethylamine-HCl,
 - effect on alcoholic liver injury,
1529
- 3-Mercaptopicolinic acid,
 - effect on catecholamine-induced
changes in glucose homeostasis,
- 3-Mercaptopicolinic acid(contd.)
2231
- α -Mercaptopropionylglycine,
effect on hepatotoxicity of
paracetamol in mice, 31
- Mercury,
 - biliary excretion, effect of
spironolactone, 279
 - biliary excretion and renal
accumulation, effect of
spironolactone, 1823
 - binding to metallothionein, effect
of selenium, 2191
- Mescaline,
 - uptake by cortical synaptosomes,
effect of desipramine, 207
 - effect of ventilation on removal by
by perfused rabbit lung, 1444
- Mesenteric artery,
 - effect of pargyline on amine
oxidases in, 2107
- Mestranol,
 - biliary excretion and enterohepatic
circulation, effects of neomycin,
943
- Metallothionein,
 - preparation and toxicity, 25
 - effect of selenium on cadmium and
mercury binding, 2191
- Metallothionein-like proteins,
in kidney, increase following
bismuth administration, 257
- Methemoglobin,
 - effect on inhibition of cytochrome
c oxidase by cyanide, sulfide or
azide, 2247
- Methemoglobin reductase,

BIOCHEMICAL PHARMACOLOGY

- Methemoglobin reductase,
 - reduction of 2,6-dichlorophenol indophenol, effect of anti-inflammatory drugs, 685
- Methimazole,
 - glucuronide conjugation by guinea pig liver microsomes, 617
 - inhibition of dopamine β -hydroxylase 1092
- Methionine,
 - effect on alcoholic liver injury, 1529
 - effect of chlorpromazine on intestinal transport, 1411
- D,L-Methionine hydroxamate,
 - inhibition of mouse brain glutamate decarboxylase, 345
- Methotrexate,
 - collateral sensitivity of murine leukemic cells, 1094
 - comparison with effects of 2,4-diamino-5-(3',4'-dichlorophenyl)-6-methyl(ethyl)pyrimidines, 543
 - enhancement by caffeine of growth inhibitory effects in lymphoma L5178Y cells, 1533
 - induced immunosuppression in mice, reversal by citrovorum factor, 203
- Methotrexate diglutamate,
 - accumulation in human liver during methotrexate therapy, 2311
- Methoxyamphetamines,
 - effect on 5-hydroxytryptamine uptake and release by human platelets, 647
- 3-Methoxy-4-hydroxyphenylglycol sulphate,
 - 3-Methoxy-4-hydroxyphenylglycol sulphate,
 - in brain regions, effect of morphine 2335
 - 6-Methoxy-1,2,3,4-tetrahydro- β -carboline,
 - inhibition of monoamine oxidase in brain and liver, 1991
 - N-Methylamphetamines,
 - metabolism by liver homogenate, 1043
 - Methylcarbamate insecticides,
 - kynurenine formamidase inhibition as a possible mechanism for teratogenic effects in chick embryos, 2251
 - 3-Methylcholanthrene,
 - effect on cytochrome P-450 in fetal and neonatal rat liver, 567
 - effect on enzymes in regenerating liver, 1501
 - effect on epoxide hydrolase in liver microsomes, 891
 - effect on extrahepatic drug metabolism, 749
 - genetic differences in effect on ovarian aryl hydrocarbon hydroxylase, 909
 - induction of aryl hydrocarbon hydroxylase in cultured human lymphocytes, 1831
 - induction of drug metabolism, effect of polychlorinated biphenyls, 783
 - induction of hepatic glutathione β -transferase B, 555
 - induction of hepatic mono-oxygenase systems of pregnant rats, 577
 - effect on metabolism and hepato-

3-Methylcholanthrene(contd.)

- toxicity of chloroethylenes, 369
- effect on metabolism of warfarin enantiomers, 109
- effect of α -naphthylisothiocyanate hepatotoxicity, 1857
- effect on nitromethane induced difference spectra, 963
- effect on 45S rRNA in liver, 955
- 3'-Methyl-4-dimethylaminoazobenzene, inhibition of in vitro cell-free protein synthesis, 929

α -Methyldopa,

- stereochemical requirements for decarboxylation in brain in vivo, 1757

4-Methyl- α -ethylmetatyramine,

- induced monoamine depletion in brain and heart, effect of 4-(3-indolyl-alkyl)piperidine derivatives, 505

Methylglyoxal-bis(guanyldiazide),

- effect on development of anti-body forming cells in mice, 723

Methyl iodide,

- effect on dichlorvos toxicity, 997

Methylmelamines,

- structure-activity relationships, 2385

6-Methylmercaptopurine ribonucleoside,

- enhancement by caffeine of growth inhibitory effects in lymphoma L5178Y cells, 1533

N'-Methylnicotinamide,

- intestinal transport, 99

Methylphenidate,

- effect on amine uptake by synaptosomes, 1435

Methylphenidate(contd.)

- effect on lead-induced alteration of central cholinergic function, 397

3,5-Dimethyl piperidine,

- effect on respiration and oxidative phosphorylation of cockroach muscle, 1179

5[4-(N-Methyl)-piperidylidene]5H-(1)-benzopyrano(2,3,b)pyridine maleate,

- effect on cyclic AMP in lung, 951

Methylprednisolone,

- effect on prostaglandin production during simulated shock conditions in perfused cat liver, 1463

Methylprednisolone hemisuccinate,

- effect on phagocytic release of lysosomal enzymes from neutrophils, 2001

N-Methyl-scopolamine,

- intestinal transport, 99, 763

2-Methylthiamine,

- formation in nerve tissue, 1321

α -Methyltyrosine,

- induced depletion of brain catecholamines, effect of thyrotropin-releasing hormone, 1817

Methylxanthines,

- antagonism of cyclic AMP-elevating effect of adenosine, 37
- elevation of ornithine decarboxylase and RNA polymerase I in liver, 2379

- induced lipolysis, effect of pyruvate, 1783

Metiamide,

BIOCHEMICAL PHARMACOLOGY

- Metiamide,
 - effect on gastric protein kinase, 991
- Metyrapone,
 - effect on cholesterol biosynthesis in liver, 481
- Mevalonic acid,
 - inhibition of neural sterol formation by AY-9944 and zuclophene, 1161, 1169
- Miconazole,
 - effects on rat liver mitochondria, 541
- Microsomes,
 - brain, ethanol-induced conformational changes in membranes, 2181
- Mitochondria,
 - brain, heterogeneity of monoamine oxidase in distinct populations, 289
 - effect of bromosulfophthalein on ion transport, 825
 - chondrocyte, effect of tetracycline on calcium transport, 595
 - heart, effect of bencyclane on function of, 2125
 - liver,
 - effect of anti-inflammatory drugs on oxidative phosphorylation, 2101
 - effect of bencyclane on function of, 2125
 - bromosulfophthalein uptake, 457
 - ionophorus properties of narasin, 1373
 - effects of Miconazole, 541
 - effect of nutritive antibiotics on respiration of, 433
 - effects of phenylethylbiguanide on respiration, 717
 - Mitochondria,
 - liver(contd.)
 - effect of phthalic esters on respiration, 19
 - respiratory inhibition by bromosulfophthalein, 461
 - effect of tributyltin derivatives on function of, 1997
 - Mitochondria-lysosome suspensions,
 - effects of monocyclic compounds, 2145
 - Mixed-function oxidase system,
 - changes in enzyme activities in amino acid deficiencies, 667
 - lack of effect of dietary ascorbic acid, 2037
 - in puffin liver microsomes, effect of DDE, 1000
 - species differences in induction after polychlorinated biphenyl treatment, 783
- Mobam,
 - interaction with acetylcholinesterase, 757
- Molindone,
 - effect on adenylate cyclase in heart and on myocardial contractility, 1315
- Monensin,
 - ionophorus properties, comparison with narasin, 1373
- Monkey, rhesus,
 - cholinergic system in placenta, 1281
- Monoamine,
 - metabolism in brain, effect of antihistaminic drugs, 133
- Monoamine oxidase,
 - in brain,

- Monoamine oxidase,
 in brain,
 bovine, 1637
 effect of harmaline and its
 sulphur analogue, 1303
 heterogeneity in distinct populations of mitochondria, 289
 inhibition by atropine, 871
 inhibition by β -carbolines, 1991
 modification of activities, 1059
 effect of β -propiolactone and
 β -nitropropionic acid, 62
 regional effects of morphine, 211
 subcellular localization of
 types A and B, 2337
 in heart,
 influence of age and adrenalectomy, 407
 inhibition by atropine, 871
 pargyline sensitivity, 2107
 in human platelets,
 effect of subcutaneous injection
 of adrenaline, 2065
 substrate and inhibitor related
 characteristics, 853
 in human whole blood fractions, 353
 in human whole blood, particle bound,
 properties, 1444
 in liver,
 inhibition by β -carbolines, 1991
 inhibition by clorgyline, 2269
 neonatal androgen-induced
 imprinting, 1979
 in mouse lung mitochondria, 935
 radiorespirometry for determination
 in vivo, 1917
 in skeletal muscle, 45
- Monoamine oxidase inhibitors,
 interaction with pethidine, 806
 Monocyclic compounds,
 effect on biomembranes, 2145
 Mono-oxygenase systems,
 induction in fetal and neonatal
 rats, 567
 induction in pregnant rats, 577
 in liver, effect of polychlorinated
 biphenyls, 2043
 role of glycerol in reconstruction
 by means of self-assembly, 2061
 Monosomes,
 production in vivo by sparsomycin,
 255
 Morphine,
 effect on ATPase in mouse brain, 89
 effect on carbohydrate metabolism
 in cultured glial cells, 1307
 effect on lipolysis in rat
 epididymal fat pads, 143
 effect on monoamine oxidase in
 brain regions, 211
 effect on noradrenaline turnover in
 rat brain regions, 2355
 effect on ^{32}P i and [^3H]choline
 incorporation into synaptic
 plasma membrane phospholipids,
 1087
 peroxide-catalysed irreversible
 binding to protein, 1267
 role of brain calcium in action of,
 1183
 Morphine receptors,
 noradrenergic neurons, 259
 Muscarine,
 effect on choline and acetylcholine

BIOCHEMICAL PHARMACOLOGY

- Muscarine(contd.)
 - in brain, 1607
- Muscarinic receptor,
 - in brain,
 - binding of antidepressant drugs, 1559
 - role of phospholipids, 1689
 - on dopaminergic neurons, 259
- Muscle,
 - skeletal,
 - characterization of monoamine oxidase, 45
 - cysteine oxidase in, 1101
 - metabolic effects of inosine and uridine, 1585
 - smooth, effect of 3-(2'-hydroxy-4', 5'-diethoxybenzoyl)propionic acid on cyclic AMP dependent protein kinase in, 994
- Mushrooms,
 - inhibition of tyrosinases by lamprane and thiambutosine, 1345
- Myocardial membranes,
 - polyflavane P13 binding, 1775
- Myocardium,
 - effect of P13 on energy stores, 1021
- Mycophenolic acid,
 - enhancement by caffeine of growth inhibitory effects in lymphoma L5178Y cells, 1533
- NAD⁺,
 - in brain of acrylamide intoxicated rats, 2151
- NADH,
 - synergistic effect on metabolism of aniline, 137
- NADH-dependent N-oxide,
 - reduction by liver microsomal cytochrome P-450, 489
- NADPH oxidation,
 - in liver microsomes, analysis of effects of inhibitors, 389
- Nafenopin,
 - induced liver growth, biochemical changes associated with, 939
- Naloxone,
 - effect on ATPase activity in brain, 89
- α -Naphthylisothiocyanate,
 - hepatotoxicity and irreversible binding to rat liver microsomes, 1857
- 4-(α -Naphthylvinyl)pyridinium hydrochloride,
 - protection against organophosphate poisoning in vivo and inhibition of choline acetyltransferase in vitro, 1821
- Narasin,
 - ionophorous properties in rat liver mitochondria, 1373
- Neomycin,
 - effects on biliary excretion and enterohepatic circulation of estradiol and mestranol, 943
 - effect on polyphosphoinositide metabolism in guinea pig kidney, 1769
- Neuroblastoma cells,
 - elevation of cyclic AMP by adenosine 37
 - effect of pentobarbital on carbohydrate metabolism, 1307

- Neuroleptic drugs,
 membrane receptor sites of action,
 1741
 specific in vivo binding in rat
 brain, 1003
- Neurotransmitters,
 catecholamines, presynaptic receptor
 systems, 259
 roles of folate and pteridine
 derivatives in metabolism of, 1009
 effect on synaptosomal ATPase, 2029
 synaptosomal uptake, effect of
 cannabinoids, 1327
- Neutrophils,
 phagocytic release of lysosomal
 enzymes, 2001
- Nicotinamide nucleotide analogues,
 detection by radioimmunoassay in
 tissues of rabbits injected with
 nicotine and cotinine, 1841
 of cotinine and nicotine, character-
 ization, 1853
- Nicotine,
 factors affecting tissue binding in
 various species, 1631
 metabolism by hepatic microsomes,
 effect of pilocarpine, 2072
- Nicotine receptors,
 on dopaminergic neurons, 259
- Nigrostriatal pathway,
 effects of stimulation on plasma
 concentration of 3,4-dihydroxy-
 phenylacetic acid, 2197
- p-Nitroanazole demethylase,
 in housefly, inhibition by butylated
 hydroxyanisole, 2315
- Nitrofurans,
 Nitrofurans,
 mutagenicity in Salmonella
typhimurium, 896
N-(4-(5-Nitro-2-furyl)-2-thiazolyl)
 formamide,
 mutagenicity in Salmonella, 896
- Nitrogen mustard,
 activation by liposomal transport,
 85
- Nitromethane,
 interaction with reduced hepatic
 microsomal cytochrome P-450, 963
 4-Nitro-2-phenoxy methane sulfonamide
 mechanism of action, 307
- p-Nitrophenylphosphatase,
 in gastric mucosa, inhibition by
 phenylbutazone and indomethacin,
 1241
- bis-(p-Nitrophenyl)-phosphate,
 effects on disposition and metabol-
 ism of hexobendine, 223
- β -Nitropropionic acid,
 effect on monoamine oxidase in
 rat brain, 62
- Nitroxide radical,
 formation and reduction by liver
 microsomes, 675
- Noradrenaline,
 acidic metabolites in CSF, effect of
 probenecid, 629
 activation of synaptosomal ATPase,
 2029
 effect on ATPase in brain microsomes
 1221
 in brain,
 effect of (-)-amphetamine induced
 changes in seizure threshold, 799

Noradrenaline,

in brain(contd.)

- effect of intraventricular injection of 6-hydroxydopamine on regional levels, 2211
- in rabbits made tolerant to E.coli lipopolysaccharide, 1613
- effect of thyrotropin-releasing hormone on depletion induced by α -methyltyrosine, 1817
- effect on calcium accumulation and release in submandibular microsomes, 125
- depletion from rat brain in vivo, effects of antidepressants, 1083
- metabolism in brain,
 - effect of acute ethanol or acetaldehyde administration, 1147
 - effect of disulfiram and chloral hydrate, 741
 - using a double label technique, 1251
- metabolism in liver, effect of disulfiram and chloral hydrate, 741
- release from brain, relationship with p-hydroxyamphetamine uptake, 1367
- release from cat spleen by nerve stimulation, effect of labetalol, 2137
- release from synaptosomes, effect of pentobarbital, 159
- sensitive adenylate cyclase in mouse limbic forebrain, 1877
- storage by synaptic vesicles, effect of metal chelating agents, 1703
- synaptosomal uptake,

Noradrenaline,

synaptosomal uptake(contd.)

- effect of cannabinoids, 1327
- effect of desipramine, 207
- effect of phencyclidine, 1435
- turnover in rat brain regions,
 - effect of morphine, 2355
- Noradrenaline N-methyltransferase,
 - in brain, effect of 2,3-dichloro- α -methylbenzylamine, 2087
 - inhibition in vitro by 2-amino-tetralins, 446
- Noradrenaline oxidase,
 - in cardiovascular tissue, 2107
- Noradrenergic neurons,
 - presynaptic receptors, 259
- Norethandrolone,
 - effect on taurocholate uptake into hepatocytes, 2433
- Norharman,
 - inhibition of monoamine oxidase in brain and liver, 1991
- Nortriptyline,
 - antimuscarinic activity, 1559
- Nourishment,
 - effect on metabolic responses to isoproterenol and adrenaline, 1065
- Nucleotides,
 - transport in murine leukemia cells, effects of acronycine, 1077
- Obidoxime,
 - effect on acetylcholine and cholinesterase in pons-medullary region of rat brain, 601
- Octopamine,
 - acidic metabolites in CSF, effect

BIOCHEMICAL PHARMACOLOGY

Octopamine(contd.)

of probenecid, 629

[¹¹]Octylamine,

radiorespirometry for determination

of monoamine oxidase activity

in vivo, 1917

Oleandomycin,

effect on mitochondrial respiration,

433

Oleate,

incorporation into triglyceride and
ketone bodies in liver, effect of
ethynyl estradiol, 77

effect on ketogenesis from endogenous
lipids, 789

Oleic acid,

effect on binding of diazepam to
human serum albumin, circular
dichroism studies, 2157

Oocyte,

strain differences in 3-methyl-
cholanthrene toxicity, 909

Org 6582,

effects on depletion of biogenic
amines from rat brain in vivo,
1083

effect on 5-hydroxytryptamine
metabolism in brain, 1333

Organophosphates,

effect on adrenal cholesteryl ester
and steroid metabolism, 1901

kynurenine formamidase inhibition as
a possible mechanism for terato-
genic effects in chick embryos,
2251

effect on membrane function in

Electrophorus electrophagus, 337

Organophosphates(contd.)

protection against poisoning in vivo
and inhibition of choline acetyl-
transferase in vitro, 1821

Ornithine decarboxylase,

in developing rat placenta, 121

in liver,

effect of nafenopin, 939

regulation of RNA polymerase I,
2379

in neonatal rat brain and heart,

effect of maternal ethanol
injection, 523

Orotate phosphoribosyltransferase,

in Ehrlich ascites cells, inhibitors
of, 2291

Orotidine-5'-phosphate decarboxylase,

in Ehrlich ascites cells, inhibitors
of, 2291

Orotidylate decarboxylase,

in human erythrocytes, inhibition
of, 1947

Ouabain,

influence of unsaturated phosphat-
idylcholine on effect on heart,
381

effect on sodium and potassium
transport in kidney cortex and
medulla, 711

subcellular distribution in heart
and liver of conscious guinea
pigs, 2427

Ovary,

genetic differences in metabolism
of benzo[a]pyrene, 909

Oxidative phosphorylation,

in brain mitochondria, effect of

BIOCHEMICAL PHARMACOLOGY

BIOCHEMICAL PHARMACOLOGY

- Paraoxon(contd.)
 administration on cholinergic mechanisms, 633
- Parathyroid hormone,
 effect on lead transport in bone organ culture, 650
- Parenchymal cells,
 liver, effect of tinoridine on stability of, 11
- Pargyline,
 inhibition of amine oxidases in heart and mesenteric artery, 2107
 inhibition of monoamine oxidase in beef brain mitochondria, 1637
 inhibition of monoamine oxidase in brain and liver, 1991
 inhibition of monoamine oxidase in human platelets, 853
 inhibition of monoamine oxidase in vivo, radiorespirometry for determination of, 1917
 effect on monoamine oxidase in heart of adrenalectomized rats, 407
 preferential inhibition of low K_m aldehyde dehydrogenase, 1151
- Parietal cells,
 stomach, accumulation of salicylate derivatives during absorption, 1735
- D-Penicillamine,
 inhibition of mouse brain glutamate decarboxylase, 345
- Penicillin binding components,
 bacterial, properties of, 2203
- Pentachlorophenol,
 hepatic effects, 1549
- Pentacyclic triterpenoids,
 Pentacyclic triterpenoids,
 effect on protein synthesis in cells from rat marrow, 2113
- Pentagastrin,
 effect on gastric protein kinase, 991
 stimulated gastric secretion, effect of cycloheximide, 979
 stimulation of adenylate cyclase in rat gastric mucosa, 2083
- Pentobarbital,
 binding to hepatic microsomes, 988
 effect on carbohydrate metabolism of cultured glial cells, 1307
 depression of stimulus-secretion coupling in brain, 159
 effect on GABA system in brain, 699
 effect on phospholipid synthesis in brain regions, 2095
 effect on ^3H -Pi and ^3H -choline incorporation into synaptic plasma membrane phospholipids, 1087
 effect on regulation of acetylcholine content and release in brain regions, 609
- Pentylenetetrazol,
 effect of (-)-amphetamine on seizure threshold and catecholamines in brain, 799
- Pepstatin,
 inhibition of pseudorenin, 639
- Perazine,
 intestinal metabolism, 1275
- Perchloroethylene,
 enhancement of metabolism and hepatotoxicity, 369
- Peroxidase,

- Peroxidase,
catalysed irreversible binding of
morphine to protein, 1267
- Peroxisomes,
liver,
effect of clofibrate on carnitine
acyltransferases in, 1697
drug-induced proliferation, effect
on carnitine acetyltransferase
in liver, 1451
- Pertussis-vaccinated mice,
pharmacologic blockade of the effects
of histamine on lung cyclic AMP
levels, 529
- Pethidine,
interaction with monoamine oxidase
inhibitors, 806
- Phagocytosis,
by neutrophils, effect of cortico-
steroids, autonomic neurohormones
and cyclic nucleotides, 2001
by polymorphonuclear leukocytes,
TCA cycle and cytochrome system
as energy sources, 1489
- Phencyclidine,
effect on catecholamine and 5-hydroxy-
tryptamine uptake by synaptosomes
1435
- Phencyclidine derivatives,
tolerance in mice, in vivo and
in vitro studies, 1671
- Phenelzine,
interaction with pethidine in
rabbits, 806
- Phenindamine,
effect on brain monoamine metabolism,
133
- Phenobarbital,
binding to hepatic microsomes, 988
effect on cholesterol biosynthesis
in liver, 481
effect on dimethylsulfoxide action
on drug metabolizing enzymes, 902
effect on enzymatic and non-enzymat-
ic lipid peroxidation in liver
microsomes, 164
effect on epoxide hydrazase in liver
microsomes, 891
effect on extrahepatic drug
metabolism, 749
effect on hepatic clearance of
indocyanine green, 1247
induction of glutathione S-trans-
ferase B in liver, 555
induction of glutathione S-trans-
ferases in intestinal epithelium,
2359
induction of hepatic mono-oxygenase
systems in fetal and neonatal
rats, 567
induction of hepatic mono-oxygenase
systems of pregnant rats, 577
induction of hydroxyphenylhydantoin
and hydroxyphenobarbital conjug-
ation in rat liver microsomes,
1354
effect on metabolism and hepato-
toxicity of chloroethylenes, 369
effect on metabolism of warfarin
enantiomers, 109
effect on α -naphthylisothiocyanate
hepatotoxicity, 1857
effect on nitromethane induced
difference spectra, 963

Phenobarbital(contd.)

plus DDT in low doses, induction of
drug metabolism, 1299
plus pregnenolone-16 α -carbonitrile,
effect on drug metabolism, 467
effect on propranolol metabolism by
rat liver microsomes, 2447
effect on 45S rRNA in liver, 955

Phenobarbitone,

inhibition of in vitro hydroxylation
of diphenylhydantoin, 1929
effect on tissue uptake and metabol-
ism of δ -aminolevulinic acid, 802

Phenothiazines,

intestinal metabolism, 1275
effect on nucleic acid and protein
synthesis in E.coli, 1205
sites of action, 1741

Phenoxybenzamine,

effect on noradrenaline-sensitive
adenylate cyclase in mouse
limbic forebrain, 1877

Phentolamine,

effect on noradrenaline-sensitive
adenylate cyclase in mouse
limbic forebrain, 1877

N⁶-Phenyladenosine,

effect on purine metabolism in intact
Schistosoma mansoni, 1849

Phenylalanine,

dopa and dopamine formation from
in human brain, 900

Phenylbutazone,

binding to human serum albumin,
circular dichroism studies, 283
effect on collagenolytic activity of
cathepsin B1, 2121

Phenylbutazone(contd.)

inhibition of gastric K⁺-ATPase, 1241
effect on lysosome stability, 11
effect on oxidative phosphorylation
in rat liver mitochondria, 2101
effect on reduction of 2,6-dichloro-
phenol indophenol by bovine
methemoglobin reductase, 685
sensitivity of human bone marrow,
847

Phenylephrine,

effect on catecholamine release from
adrenal in vitro, 351

 α -Phenylethylamine,

in brain, gas-liquid chromatographic
estimation, 1513

 α -Phenylethylamine oxidase,

in cardiovascular tissue, 2107

Phenylethylamines,

inhibition of noradrenaline
N-methyltransferase, 446

Phenylethylbiguanide,

effect on mitochondrial respiration,
717

Phenylglycolsulfates,

noradrenaline incorporation, effect
of probenecid, 1251

 α -Phenyl-1,3-indandione,

effect on reduction of 2,6-dichloro-
phenol indophenol by bovine
methemoglobin reductase, 685

Phenyl methylcarbamates,

inhibition of acetylcholinesterase
from honey bee and cotton
leafworm, 2187

Phosphatidylcholines,

interaction with trihexylphenidyl

- Phosphatidylcholines(contd.)
 and benztropine, 2447
 effect on lipolytic enzymes in rabbits, 2393
 synthesis in fat cells, effect of adrenaline, 1475
 unsaturated, influence on effects of cardioactive drugs, 381
- Phosphatidylinositol,
 metabolism in sympathetic ganglia, effect of nicotine and muscarinic antagonists, 448
- Phospholipids,
 in kidney, effect of neomycin on labelling of, 1769
 in liver, effect of carbon disulphide 1521
 role in muscarinic binding by neural membranes, 1689
 in synaptic plasma membranes, effect of morphine or pentobarbital on $^{32}\text{P}_i$ and $[^3\text{H}]$ choline incorporation 1087
 synthesis in brain regions, effect of pentobarbital, 2095
 synthesis in liver microsomes, effect of progesterones, 1495
- Phospholipid bilayer membranes,
 characterization of drug-membrane interactions, 2319
 chlorpromazine and chlorpromazine methiodide binding, 2411
 interaction with butylated hydroxy-toluene, 2259
 interaction with dibucaine and propranolol, 51
- N-(Phosphonoacetyl)-L-aspartate,
N-(Phosphonoacetyl)-L-aspartate, reversal of toxicity and antitumour activity by uridine or carbamyl-DL-aspartate in vivo, 81
 phosphorylated sarcoplasmic reticulum, ethanol sensitivity, 393
 phthalic esters, effect on liver mitochondrial respiration, 19
 phylloquinone epoxidase, in rat tissues, 804
 physostigmine, interaction with acetylcholinesterase, 757
 phytohemagglutinin, stimulated human lymphocytes, effect of 1-tetramizole, 1358
 picrotoxin, effect on γ -hydroxybutyrate action on dopaminergic neurons, 2079
 pig, papaverine-induced metabolic alterations in perfused liver, 1339
 pilocarpine, nature of inhibition of hepatic drug-metabolizing enzymes, 2072
 pimozone, in vivo binding in rat brain, 1003
 effect on noradrenaline-sensitive adenylate cyclase in mouse limbic forebrain, 1877
 sites of action, 1741
 pineal gland, effect of desmethylnipramine on melatonin production, 904
 piperidines,

Piperidines,

effect on ATPase from brain, 983

Piperonyl butoxide,

effect on cholesterol biosynthesis
in liver, 481

effect on α -naphthylisothiocyanate
hepatotoxicity, 1857

Placenta,

biosynthesis and metabolism of
putrescine, 121

cholinergic system in, 1281

trinitroglycerine metabolism in, 162

Plasma membranes,

heart, calcium binding, 2283

Platelets,

effect of anti-inflammatory drugs
on aggregation of, 307

cytoplasmic and vesicular 5-hydroxy-
tryptamine compartments, 517

determination of monoamine oxidase
in whole blood, 353

effect of dipyridamole and its mono-
glucuronide on adenosine uptake
and ADP-induced aggregation, 906

5-hydroxytryptamine transport and
storage, effects of imipramine
and reserpine, 1645

effect of 4-(3-indolyl-alkyl)piperid-
ine derivatives on amine uptake,
497

effects of methoxyamphetamines on
5-hydroxytryptamine uptake and
release, 647

release of 5-hydroxytryptamine
induced by N-(2-ethylhexyl)-3-
hydroxybutyramide and
catecholamines, 197

Platelets(contd.)

effect of reserpine on adenosine
uptake and ATP transport, 1657

effect of reserpine on aggregation
and adherence to collagen or
injured aorta, 149

effects of reserpine and 5-hydroxy-
tryptamine on adenine nucleotide
metabolism and glucose oxidation,
1667

effect of subcutaneous injection of
adrenaline on monoamine oxidase
activity in, 2065

substrate- and inhibitor-related
characteristics of monoamine
oxidase, 853

effect of thio reagents on transport
processes and responses to
stimuli, 319

Platinum(IV)ion,

stimulation of superoxide radical
production, 473

Platycodosides,

effect on protein synthesis in cells
from rat marrow, 2113

Polyamines,

evidence against view that central
actions are indirectly mediated,
1450

metabolism in developing heart and
brain, effect of ethanol, 523

Polychlorinated biphenyls,

effect on drug metabolism in rabbits
and rats, 783

interaction with rabbit liver
monooxygenase, 2043

Polycyclic hydrocarbons,

BIOCHEMICAL PHARMACOLOGY

- Polycyclic hydrocarbons,
induction of hepatic monooxygenase systems in fetal and neonatal rats, 567
effect on ovarian metabolism, 909
- Polyflavane P13,
binding in pig myocardial membranes, 1775
effect on pig myocardium ATP synthesis, ATPases and creatine kinase, 1021
- Polymorphonuclear leucocytes,
accumulation in lungs of pertussis-vaccinated mice, 529
TCA cycle and cytochrome systems as energy sources for phagocytosis, 1489
- Polyphosphoinositide,
metabolism in guinea pig kidney, action of neomycin, 1769
- Polysaccharides,
effect of functional groups on interactions with aflatoxins B₁ and G₁, 863
- Polysome,
disaggregation produced by sparso-mycin, 255
- Ponto-medullary region of brain,
acetylcholine and cholinesterase in, effect of armin and obidoxime, 601
- Porphyria,
induced by pentachlorophenol and its contaminants, 1549
- Porphyrin,
biosynthesis in chick embryo liver cells, effects of hydrocortisone and cyclic AMP, 1389
- Porphyrin(contd.)
lysis of bloodstream forms of Trypanosoma brucei, 1923
effect of phenobarbitone on metabolism of precursors, 802
- Potassium,
induced release of acetylcholine, effect of lead, 397
translocation across red cell membrane, effect of anaesthetics, 779
transport in kidney cortex and medulla, 711
- Practolol,
effect on calcium accumulation and release in submandibular microsomes, 125
effect on rat heart sarcolemma, 2055
- Prednisolone,
effect on collagen synthesis in vitro, 1961
effect on intracellular enzymes of collagen biosynthesis in liver, 1295
effect on lysosome stability, 11
- Pregnanediol,
effect on hepatic microsomal enzymes, 1495
- Pregnanolone,
effect on hepatic microsomal enzymes, 1495
- Pregnant rats,
induction of hepatic monooxygenase systems, 577
- Pregnenolone-16 α -carbonitrile,
effect on cholesterol biosynthesis in liver, 481

BIOCHEMICAL PHARMACOLOGY

- Pregnenolone-16 α -carbonitrile(contd.)
 effect on hepatic microsomal enzymes, 1495
 effect on metabolism and hepatotoxicity of chloroethylenes, 369
 and spironolactone or phenobarbital, effect on drug metabolism, 467
- Presynaptic receptor systems, in catecholaminergic transmission, 259
- Probenecid,
 effect on acidic metabolites of amines in lumbar CSF, 629
 effect on noradrenaline incorporation into phenylglycolsulfates in brain, 1251
- Procaine,
 effect on ATPase, 791
 potentiation of toxicity by triorthotolyl phosphate, 1791
- Prochlorperazine,
 sites of action, 1741
- Progesterone,
 effect on hepatic microsomal enzymes, 1495
 effect on taurocholate uptake into hepatocytes, 2433
- Proinsulin,
 inhibition of synthesis by cyproheptadine, 2021
- Prolactin,
 in rat plasma, effect of γ -butyrolactone and baclofen, 645
- Prolyl hydroxylase,
 in chick embryo tendon cells, effect of betamethasone-17-valerate, 875
- Promazine,
 sites of action, 1741
- Promethazine,
 effect on nucleic acid and protein synthesis in E.coli, 1205
- Propantheline,
 effect on gastric protein kinase, 991
- β -Propiolactone,
 effect on monoamine oxidase in rat brain, 62
- Propranolol,
 effect on calcium accumulation and release in submandibular microsomes, 125
 effect on histamine-induced cyclic AMP accumulation in lungs of pertussis-vaccinated mice, 529
 interaction with phospholipid bilayer membranes, 51
 effect on metabolic responses to isoproterenol and adrenaline, 1065
 metabolism by liver microsomes, effects of ethanol and phenobarbital, 2459
 effect on noradrenaline-sensitive adenylate cyclase in mouse limbic forebrain, 1877
 effect on protein synthesis in chick embryo liver cells, 867
 effect on rat heart sarcolemma, 2055
 structural analogues, inhibition of calcium binding by rat heart plasma membranes, 2283
- Propyl hydroxylase,
 in liver and skin, effect of prednisolone, 1295
- 6-n-Propyl-2-thiouracil,

- 6-n-Propyl- α -thiouracil,
 glucuronide conjugation by guinea
 pig liver microsomes, 617
 inhibition of dopamine β -hydroxylase
 1092
 site of glucuronide conjugation, 833
- Prostaglandin,
 effect of diflumidone and R-805 on
 synthesis of, 307
 release from sensitized and anaphyl-
 actic guinea pig lungs, changes
 in cyclic AMP, 181
 renal metabolism in spontaneously
 hypertensive rats, 485
- Prostaglandin E_2 ,
 effect on catecholamine release from
 adrenal in vitro, 351
 production in perfused cat livers
 subjected to hypoxia, ischaemia
 or acidosis, effect of gluco-
 corticoid, 1463
- Prostaglandin F_{2a} ,
 production in perfused cat livers
 subjected to hypoxia, ischaemia
 or acidosis, effect of gluco-
 corticoid, 1463
 effect on vascular permeability and
 collagen and non-collagen protein
 synthesis in granuloma, 2049
- Prostaglandin -9-hydroxy dehydrogenase,
 in kidney of spontaneously hyper-
 tensive rats, 485
- Prostaglandin-15-hydroxy dehydrogenase,
 in kidney of spontaneously hyper-
 tensive rats, 485
- Prostaglandin receptors,
 noradrenergic neurons, 259
- Prostaglandin synthetase,
 inhibition in vitro by fenclorac
 and indomethacin, 1051
- Proteases,
 role in inflammatory disease, 693
- Proteins,
 cyclic AMP binding, interaction with
 cyclophosphamide and its
 metabolites, 1469
 inhibition by 3'-methyl-4-dimethyl-
 aminoazobenzene of in vitro
 cell-free synthesis, 929
 inhibition of synthesis by sparso-
 mycin, 255
 peroxide-catalysed irreversible
 binding of morphine, 1267
 release from S.cerevisiae, effect
 of chlorhexidine, 2365
 synthesis in chick embryo liver
 cells, effect of β -blockers, 867
 synthesis in E.coli, effect of
 tranquillizer drugs, 1205
 synthesis in Ehrlich cell mitochon-
 dria, effect of nitrogen mustard-
 liposome mixture, 85
- Proteinase,
 in testis and epididymus, effect
 of cyproterone acetate, 5
- Protein kinase,
 cyclic AMP dependent, in smooth
 muscle, effect of 3-(2'-hydroxy-
 4',5'-diethoxybenzoyl)propionic
 acid, 994
 cyclic nucleotide dependent and
 independent, inhibitory effect
 of cordycepin, 1287
 in gastric mucosa, effect of

Protein kinase(contd.)

anti-secretory agents, 991
 role in trans-synaptic induction of
 tyrosine hydroxylase, 817
 stimulated calcium transport by
 cardiac sarcoplasmic reticulum,
 effect of ethanol, 393
 in Walker carcinoma cells, effect of
 cyclophosphamide and its
 metabolites, 1469

Pseudorenin,

in bovine spleen, purification, 2237
 inhibition by pepstatin, 639

Pteridines,

oxidation in mice, 2217
 role in neurotransmitter metabolism,
 1009

Puffin(Fratercula artica),

DDE-induced microsomal mixed-function
 oxidases, 1000

Pulmonary edema,

effect of thioureas on acetylcholin-
 esterase activity, 313

Purine,

metabolism in intact mammalian cells,
 effect of adenosine deaminase
 inhibitors, 1967
 metabolism in intact Schistosoma
mansoni, 1847

Purine nucleotides,

effect of bikaverin on synthesis and
 catabolism of Ehrlich ascites
 tumour cells, 1973

Putrescine,

biosynthesis and metabolism in
 rat placenta, 121

Pyridine nucleotides,

Pyridine nucleotides,

effect of acrylamide intoxication on
 concentration and function in
 rat brain, 2151

Pyridinium salts,

protection against organophosphate
 poisoning in vivo and inhibition
 of choline acetyltransferase
in vitro, 1821

Pyridostigmine,

interaction with acetylcholin-
 esterase, 757
 methods for measuring inhibition of
 acetylcholinesterase in blood,
 1263

Pyridoxal phosphate,

reaction with mercapto-compounds,
 345

2-Pyridylthioacetamide,

effect on gastric protein kinase, 991

Pyrimidine biosynthesis,

procedure for analysing inhibition
 of a multi-enzyme complex, 2291

Pyrogens,

E.coli, tolerance in rabbits,
 febrile response and biogenic
 amines in brain, 1613

Pyruvate,

oxidation by mitochondria from
 liver, kidney, brain and muscle,
 sensitivity to acetaldehyde, 1349
 effect on thyroid hormone-induced
 lipolysis in rat adipose tissue
in vitro, 1783

Pyruvate kinase,

in cultured glial cells, effect of
 pentobarbital, 1307

- Quaternary ammonium compounds,
intestinal transport, 99, 763
- Quercetin,
elevation of cyclic AMP level in
Ehrlich ascites tumour cells, 1259
- Quinidine,
plasma protein binding, effect of
heparin and fatty acids, 229
effect on protein synthesis in chick
embryo liver cells, 867
- 3-Quinuclidinyl benzilate,
binding to neural membranes, effect
of phospholipids, 1689
- Radioactive substrates,
detection of inhibitory contaminants, 1525
- Radiorespirometry,
for detection of monoamine oxidase
in vivo, 1917
- Rainbow trout,
fractionation and subcellular
localization of marker enzymes in
liver, 1395
- Receptor-drug interaction, 913
- Regenerating liver,
enzyme induction, 1501
- Renin,
inhibition of secretion by β -adreno-
ceptor blocking agents, role in
hypertension, 171
in plasma after estrogen administat-
ion, 923
- Renin-angiotensin system,
in CNS, 1
response in adrenal cortex and
kidney, mediation by
- Renin-angiotensin system(contd.)
angiotensin III, 93
- Reserpine,
effect on adenine nucleotide metab-
olism and glucose oxidation of
platelets, 1667
effect on adenosine uptake and
ATP transport in platelets, 1657
effect on catecholamine sensitivity
of adenylate cyclase in heart,
1448
effect on 5-hydroxytryptamine
transport and storage in
platelets, 1645
effect on platelet aggregation, 149
- Retina,
effect of glutamate and aspartate
administration on their tissue
levels, 443
lithium inhibition of dopamine-
sensitive adenylate cyclase, 167
separation of acetylcholinesterase
from butyrylcholinesterase by
affinity chromatography, 1441
- Retinoid acid esterase,
tissue and subcellular distribution
in mice, 947
- Rheumatic disease,
endogenous anti-inflammatory protein
693
- Ribonucleic acid,
effect of diacridines on maturation
of, 275
incorporation of ^3H from deoxy-
uridine and thymidine, 59
synthesis in Ehrlich cell mitochon-
dria, effect of nitrogen mustard-

Ribonucleic acid(contd.)

- liposome mixture, 85
- synthesis in nucleoli, effect of diacridines, 269
- ⁴⁵S rRibonucleic acid,
 - in liver, effects of phenobarbital and 3-methylcholanthrene, 955
- tRibonucleic acid,
 - interaction with daunomycin, spectroscopic studies, 1729
- Ribonucleic acid polymerase,
 - kinetic interaction with 5-azacytidine-5'-triphosphate, 403
 - in liver, regulation by ornithine decarboxylase, 2379

Rubidazone,

- transport and binding in Ehrlich ascites tumour cells, 215

Saccharomyces cerevisiae,

- effect of chlorhexidine on anaerobic fermentation and protein release, 2365

Salicylates,

- accumulation by parietal cells of the stomach, 1735
- effect on acetyl-CoA carboxylase in liver, 898
- binding to human serum albumin, circular dichroism study, 283
- effect on reduction of 2,6-dichlorophenol indophenol by bovine methemoglobin reductase, 685

Salmonella typhimurium,

- mutagenicity of nitrofurans, 896
- role of sulphotransferase from rat liver in the mutagenicity of

Salmonella typhimurium(contd.)

- N-hydroxy-2-acetylaminofluorene, 1356
- Sanocrysine,
 - effect on collagenolytic activity of cathepsin B1, 2121
- Saponin,
 - induced hemolysis, glycyrrhizin inhibition, 643
- Sarcolemma,
 - heart, effects of acebutolol, practolol and propranolol, 2055
- Sarin,
 - inhibited acetylcholinesterase, new reactivators of, 439
- Schistosoma mansoni,
 - purine metabolism in intact worms, 1847
- Schizophrenia,
 - effect of probenecid on acidic metabolites of amines in CSF, 629
 - role of folates, 1009
 - sites of action of neuroleptic drugs, 1741
 - effect of subcutaneous injection of adrenaline on monoamine oxidase in platelets, 2065
- Secobarbital,
 - binding to hepatic microsomes, 988
- Seizures,
 - effects of (-)-amphetamine on threshold and catecholamines in brain, 799
- Selenium,
 - effect on cadmium and mercury binding to metallothionein, 2191
- Sex differences,

- Sex differences,**
in liver N-acetyltransferase
activity and elimination of
sulphadimidine in urine, 69
- Shy-Drager syndrome,**
changes in serum dopamine β -hydroxyl-
ase, effect of glucagon, 986
- Silymarin,**
effect on lipid peroxide formation
in liver mitochondria and
microsomes, 2405
- SKF 525-A,**
effect on extrahepatic drug metabol-
ism, 749
effect on α -naphthylisothiocyanate
hepatotoxicity, 1857
- Skin,**
fetal, transplacental induction of
mixed-function oxygenases by
 $\alpha,3,7,8$ -tetrachlorodibenzo-p-
dioxin, 1383
effect of prednisolone on intra-
cellular enzymes of collagen
biosynthesis, 1295
- Sodium,**
efflux from liposomes, effect of
dibucaine and propranolol, 51
transport in kidney cortex and
medulla, 711
transport in phospholipid bilayer
membranes, effect of butylated
hydroxytoluene, 2259
- Sodium aurothiomalate,**
distribution of gold in liver cells
after administration of, 2417
- Soman,**
protection against poisoning in vivo
- Soman(contd.)**
and inhibition of choline
acetyltransferase in vitro, 1821
receptor-ligand interaction in
Electrophorus electroplaques, 337
- Sorbitol,**
liver metabolism in clofibrate-
treated rats, 331
- Sparsomycin,**
production in vivo of falloff
monosomes in mouse liver, 255
- Spermatogenesis,**
effect of cyproterone acetate, 5
- Spermidine,**
CNS effects, directly mediated, 1450
- Spermidine diacridines,**
effect on RNA synthesis, 269, 275
- Spermine,**
CNS effects, directly mediated, 1450
- Spermine diacridines,**
effect on RNA synthesis, 269, 275
- Spinal cord,**
2-methylthioamine formation in, 1321
- Spiperone,**
in vivo binding in rat brain, 1003
- Spironolactone,**
effect on biliary excretion of
heavy metals, 279
effect on biliary excretion and
renal accumulation of inorganic
mercury in the rat, 1823
effect on drug metabolism in vivo
and in vitro, 467
- Spleen,**
pseudorenin activity in, 237
- Spleen cells,**
selective effects of methylglyoxal-

Spleen cells(contd.)

bis(guanylhyazone), 723

Spontaneously hypertensive rats,

cortisol sulfotransferase in liver,

1033

renal prostaglandin metabolism in, 485

Squalene,

dietary, effect on oxidative drug

metabolism in liver, 1417

Starch,

interaction with aflatoxins A₁ and

G₁, 863

Starvation,

effect on extrahepatic drug

metabolism, 749

Steroidogenesis,

in adrenal, effect of organophosphate

insecticides, 1901

Sterols,

biosynthesis in brain, effect of

AY-9944 and zuclophene, 1161, 1169

dietary, effect on oxidative drug

metabolism in liver, 1417

Stomach,

accumulation of salicylates by

parietal cells during absorption,

1735

correlation between gastric protein

kinase and secretion, 991

effect of cycloheximide on gastric

secretion, 979

histamine metabolism in the aging

rat, 585

stimulatory action of pentagastrin

on adenylate cyclase, 2083

Striatum,

effect of alcohol on dopaminergic

Striatum(contd.)

and cholinergic systems in, 653

Submandibular gland,

calcium accumulation and release in

microsomes, effect of autonomic

agents and cyclic AMP, 125

Sulfonamido-trimethoprim combinations,

bacteriostatic mechanisms, 451

Sulfonanilides,

effect on prostaglandin biosynthesis

and platelet aggregation, 307

Sulphadimidine,

urinary excretion, effect of sex

and Freund's adjuvant, 69

Sulphation,

of catecholamines in brain, 1251

generation of reactive metabolites

of N-hydroxy-phenacetin, 189

Sulphide,

inhibition of cytochrome c oxide,

effect of methemoglobin, 2247

Sulphotransferase,

from rat liver, role in mutagenicity

of N-hydroxy-2-acetyl amino

fluorene in Salmonella typhimurium

1356

Sulphydryl compounds,

possible protective role in alcohol-

ic liver injury, 1529

Sulphydryl groups,

in brain microsomes, effect of

ethanol on exposure of, 2181

Suloctidil,

antilipolytic action in rat adipose

tissue, 1429

Sulthiamine,

inhibition of in vitro hydroxylation

Sulthiamine(contd.)

of diphenylhydantoin, 1929

Superior cervical ganglion,

muscarinic and nicotinic effects on
phosphatidylinositol metabolism,

effect of cyproterone acetate on
proteinase activity, 5

Testosterone,

induced imprinting of rat hepatic
microsomal monooxygenases, 1979

Tetracaine,

BIOCHEMICAL PHARMACOLOGY

- Tetracaine,
irreversible inactivation of human
red cell ATPase, 2241
- Tetrachlorobiphenyl,
interaction with rabbit liver
monooxygenase, 2043
- 2,3,7,8-Tetrachlorodibenzo-p-dioxin,
transplacental induction of mixed-
function oxygenases in extra-
hepatic tissues, 1383
- Tetracycline,
effect on chondrocyte mitochondria,
595
- Tetraethylammonium,
intestinal transport, 99
renal transport,
effect of choline, 1935
effect of 2,4,5-trichlorophenoxy-
acetate, 1709
- Δ^1 -Tetrahydrocannabinol,
effect on neurotransmitter uptake,
ATPase activity and morphology
of synaptosomes, 1327
perfusion of isolated rat brain,
effect on EEG, 2307
- Δ^9 -Tetrahydrocannabinol,
effect on hepatic functions, 1797
- 5,6,7,8-Tetrahydrofolate,
bacterial synthesis, inhibition by
sulfonamido-trimethoprim
combinations, 451
- 1-Tetramizole,
effect on phytohemagglutinin-
stimulated human lymphocytes, 1358
- Theobromine,
effect on locomotive activity and
cyclic nucleotides in brain, 1723
- Theophylline,
stimulation of dopamine synthesis by
striatal slices, effect of
ethanol, 559
effect on valine incorporation into
protein and albumin secretion in
liver cells, 553
- Thiambutosine,
inhibition of mushroom tyrosinases,
1345
- Thiamine,
methylation in nerve tissue, 1321
- 6-Thioguanosine 5'-phosphate,
interaction with guanylate kinase,
1573, 1577
- Thiomalate,
inhibition of mouse brain glutamate
decarboxylase, 345
- Thiomerin,
effect on sodium and potassium
transport in kidney, 711
- Thioridazine,
sites of action, 1741
- Thiouracil,
glucuronide conjugation by guinea
pig liver microsomes, 617
- Thioureas,
effects on acetylcholinesterase in
rat tissues in vivo and in vitro,
- Thrombin,
effect on platelet 5-hydroxytrypt-
amine stores, 517
- Thymidine,
incorporation of label into macro-
molecules in rat organs, 59
in serum and urine of man and other
animals, microbiological method,

BIOCHEMICAL PHARMACOLOGY

- Thymidine(contd.)
2175
- Thymidylate synthetase,
in walker carcinoma, effects of
chlorambucil, 1027
- Thyroidectomized rats,
effect of clofibrate on fatty acid
oxidation by liver mitochondria,
2225
effect of clofibrate on several
biochemical parameters, 301
- Thyrotropin-releasing hormone,
effect on catabolism of catechol-
amines in brain of thyroid-
ectomized rats, 1817
- Tiaramide N-oxide,
reduction by liver microsomal
cytochrome P-450, 489
- Tight-binding inhibitor,
inhibition of adenosine deaminases,
359
of xanthine oxidase, 355
- Tinoridine,
effect on stability of lysosomes and
parenchymal cells, 11
- TMB-4,
reactivation of phosphorylated
acetylcholinesterase, 439
- Toluene,
effect on metabolism and toxicity of
benzene, 293
- Tranquillizers,
effect on protein and nucleic acid
synthesis in E.coli, 1205
- Transmethylation,
role of folates, 1009
- Transpeptidases,
bacterial, interaction with
penicillin, 2203
- Transplacental induction,
by 2,3,7,8-tetrachlorodibenzo-p-
dioxin, 1383
- Trans-synaptic induction,
tyrosine hydroxylase biosynthesis
in adrenal medulla, 817
- Triamcinolone,
effect on phagocytic release of
lysosomal enzymes from
neutrophils, 2001
- Tri-n-butyltin derivatives,
action on mitochondria and toxicity
of metabolites, 1997
- Trichloroethylene,
enhancement of metabolism and
hepatotoxicity, 369
- 2,4,5-Trichlorophenoxyacetate,
relationship with renal organic
base transport system, 1709
- Trifluoperazine,
sites of action, 1741
- N-Trifluoro-acetyl-adriamycin-14-
valerate,
effect on DNase I from bovine
pancreas, 1953
- Triglyceride lipase,
in adipose tissue, effect of
suloctidil, 1429
- Triglycerides,
in fatty liver, effect of 3-amino-
1,2,4-triazole, 625
in liver, effect of ethinyl estradiol
on incorporation of oleate, 77
in vivo formation in liver, effect

BIOCHEMICAL PHARMACOLOGY

Triglycerides(contd.)

of 3-amino-1,2,4-triazole, 1255

Trihexylphenidyl,

interaction with phosphatidyl-
cholines, 2441

Triiodo-L-thyronine,

induced lipolysis, effect of
pyruvate, 1783

Trimethoprim,

effect on blastogenic transformation
of human lymphocytes, 1593

Trinitroglycerin,

metabolism in liver of rat, mouse
and man, 162

Triorthotolyl phosphate,

inhibition of carboxylesterases and
potentiation of procaine toxicity,
1791

Tripelennamine,

effect on histamine induced cyclic
AMP accumulation in lungs of
pertussis-vaccinated mice, 529

Trypanosoma brucei,

heme lysis by bloodstream forms, 1923
infected rabbits, urinary kallikrein,
417

Tryptophan,

metabolism in the mouse, effect of
benserazide, 1619

Tryptophan deficiency,

effect on mixed-function oxidase
enzymes, 667

Tryptophan hydroxylase,

in brain, effect of p-chloroamphet-
amine analogues, 1333

Tubocurarine,

effect on phosphatidylinositol

Tubocurarine(contd.)

metabolism in sympathetic ganglia,
448

Tubulin,

displacement of vinblastine binding
by other Vinca alkaloids, 1213

Tylosin,

effect on mitochondrial respiration,
433

Tyramine,

acidic metabolites in CSF, effect
of probenecid, 629
enzymatic dehydroxylating system in
brain, 1745

Tyramine derivatives,

depletion of brain catecholamines,
effect of antidepressants, 1083

Tyrosinases,

from mushrooms, inhibition by
lamprene and thiambutosine, 1345

Tyrosine,

in brain, control of brain
catechol synthesis, 1137

Tyrosine hydroxylase,

in adrenal, trans-synaptic induction
817

in brain,

effect of intraventricular
injection of 6-hydroxydopamine
on regional activity, 2211
effect of picrotoxin on action
of γ -hydroxybutyrate, 2079
in striatum, effect of alcohol,
653

Urate,

inhibition of production by

BIOCHEMICAL PHARMACOLOGY

- Urate(contd.)
 allopurinol,
- Uridine,
 metabolic effects in rabbit heart
 and rat skeletal muscle, 1585
 effect on toxicity and antitumour
 activity of N-(phosphonacetyl)-L-
 aspartate, 81
- Uridine-cytidine kinase,
 isolation and characterization from
 human leukemic cells, 64
- Uridine diphosphate-N-acetylglucosamine,
 activation of UDP-glucuronyl-
 transferase, 129
- Uridine diphosphate glucuronyl-
 transferase,
 distribution in rainbow trout liver, 1395
 in liver microsomes,
 effect of carbon disulphide, 1521
 conjugation of antithyroid drugs, 617
 conjugation of hydroxyphenyl-
 hydantoic acid and hydroxypheno-
 barbital, 1354
 mechanism of activation by UDP-
N-acetylglucosamine, 129
 separation and purification of
 two differentially inducible
 enzymes, 1097
 in lung and kidney microsomes, effect
 of factors known to affect
 hepatic activity, 749
- Uridine monophosphate,
 inhibition of orotidine-5'-
 decarboxylase, 2291
- Uterus,
 effect of cannabis extract on
 glycogen metabolism, 859
- Vaccinia virus,
 effect of O'-methylated derivatives
 of ara-A on growth, 794
- Valine,
 incorporation into proteins in rat
 liver cells, effect of xanthines, 553
 Valine deficiency,
 effect on mixed-function oxidase
 enzymes, 667
- Valproate,
 inhibition of in vitro hydroxylation
 of diphenylhydantoin, 1929
- Vanilmandelic acid,
 in CSF of schizophrenics, effect of
 probenecid, 629
- Vascular permeability,
 in granulomatous inflammation,
 inhibition by cycloheximide, 1131
 effect of prostaglandin F_{2α}, 2049
- Vasopressor,
 action of angiotensin, 1
- Verapamil,
 effect on islet function, 735
 effect on renal gluconeogenesis, 1089
- Vibrio cholerae cells,
 furazolidone treated, cross linking
 of DNA, 1453
- Vinca alkaloids,
 and congeners, correlation of
 biological data with physico-
 chemical properties, 1213

BIOCHEMICAL PHARMACOLOGY

- Virazole,
inhibition of proliferation of
L5178y cells, 1071
- Virginiamycin,
effect on mitochondrial respiration,
433
- Vitamin D,
as a prohormone, 563
- Vitamin K,
epoxidation in rat tissues, 804
- Walker carcinoma,
effects of chlorambucil on growth
and enzymes involved in thymidine
monophosphate synthesis, 1027
interaction of cyclophosphamide and
its metabolites with cyclic AMP
binding proteins, 1469
- Warfarin,
albumin binding,
concentration-dependent effects
of fatty acids, 1143
effect of heparin and fatty acids,
229
various species, 2445
stereochemical biotransformation as
a probe of homogeneity and
mechanism for microsomal
hydroxylases, 109
- Xanthine oxidase,
mechanism of inhibition by
allopurinol, 355
from mouse liver, oxidation of
pteridines, 2217
- Xanthines,
antagonism of cyclic AMP-elevating
- Xanthines(contd.)
effect of adenosine, 37
inhibition of valine incorporation
into proteins and secretion of
albumin in liver cells, 553
- Zinc,
biliary excretion, effect of
spironolactone, 279
- Zinc-bacitracin,
effect on mitochondrial respiration,
433
- Zoxazolamine,
metabolism by liver microsomes,
effect of microsomal enzyme
inducers, 467
paralysis time,
effect of acetaminophen, 893
effect of microsomal enzyme
inducers, 467
- Zuclomiphene,
effect on cholesterol biosynthesis
in brain, 1161
plus AY-9944, effect on neural
sterol biosynthesis, 1169
