

ANNOUNCEMENT

Radiopharmacology Symposium to be held in Innsbruck

The "First International Symposium on Radiopharmacology" will be held in Innsbruck, Austria, on 21–24 May, 1978. The purpose of this symposium is to provide a forum for the exchange of information related to the biological transport, mechanisms of localization and metabolic pathways of radiotracers used in medicine and biology. The need for the discussion of basic radiotracer chemistry and pharmacology has been widely recognized and it is hoped that this symposium will serve to satisfy this need.

Sessions will include both invited and contributed communications in the areas mentioned above. The submission of abstracts will be called for later.

Those interested in attending or actively participating should contact Dr. Lelio G. Colombetti, Pharmacology Department, Loyola University Stritch School of Medicine, Maywood, Ill. 60153, U.S.A.
