

ERRATUM

Biochemical Pharmacology, Volume 28, No. 9, pp. 1519–1523 (1979).

DAVID J. CRUTCHLEY, HOLLIS J. HAWKINS, THOMAS E. ELING and MARSHALL W. ANDERSON, Covalent binding of prostaglandins G_2 and H_2 to components of ram seminal vesicle microsomal fraction.

The Publisher regrets that the above article appeared with an error introduced at correction stage by the typesetter. On p. 1520, the sixth and seventh sentences of the Results section should read "In addition, approximately 8 per cent of radioactive products derived from arachidonate were not removed by acid lipid extraction, but remained associated with the microsomal pellet after acid precipitation and solvent extraction. This macromolecule associated material was considered to be covalently bound [1]."
