The publishers regret that, as the result of an error by the typesetters, Fig. 1 of this article was published upside down. The figure should have appeared as follows.

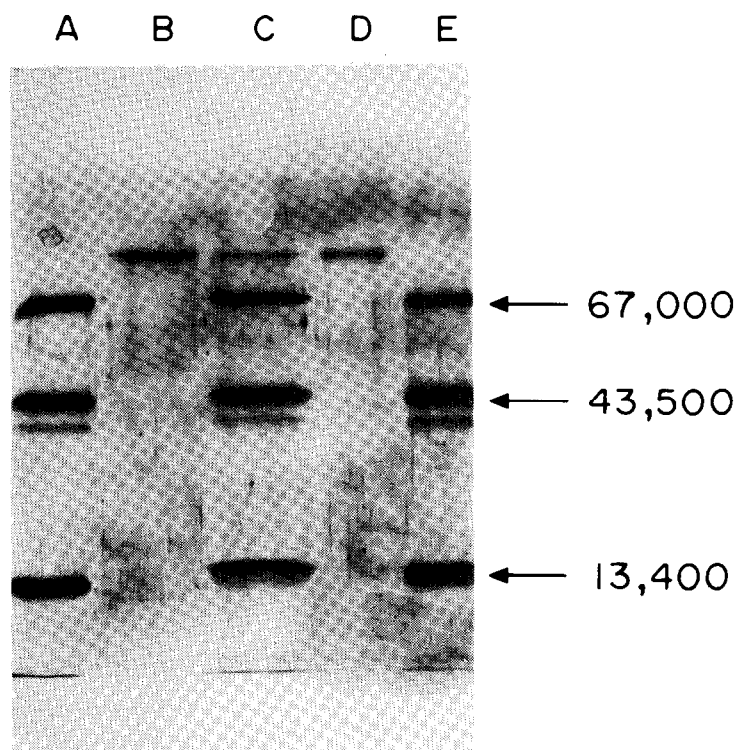

Fig. 1. SDS slab-gel electrophoresis of affinity-purified horse serum BuChE. Acrylamide concentration was 10%. The gels were run for 2.5 hr at 20 mA and were silver-stained by the method of Oakley *et al.* [17]. Key: (A) molecular weight standards (67,000, 43,500 and 13,400 daltons); (B) 1.25 μ g of purified BuChE; (C) 0.5 μ g of BuChE plus molecular weight standards; (D) 0.625 μ g of BuChE; and (E) molecular weight standards.
