

ANNOUNCEMENT

NATO ADVANCED STUDY INSTITUTE ON TOXICOLOGY OF THE NERVOUS SYSTEM

Belgirate, Italy, 10–20 September 1984

Composed of an integrated series of invited lectures, the Course will focus on current concepts and strategies in research on Neurotoxicology. Topics under discussion will include: mechanisms of toxic disorders of the nervous system resulting from low-level chronic exposures; neurotoxic actions of environmental agents and effects of their interactions; methods and model systems in long-term neurotoxicity studies. Panel discussions, round tables and free presentations will be organized in order to encourage exchange of ideas among participants and faculty.

Advisory Board: W. Aldridge (U.K.), A. Berlin (C.E.E.), J. B. Cavanagh (U.K.), S. Norton (U.S.A.), R. Paoletti (Italy), V. Silano (Italy), P. S. Spencer (U.S.A.), L. Tomatis (France), G. Vettorazzi (W.H.O.). Directors of the Course will be: C. L. Galli and L. Manzo (Universities of Milan and Pavia, Italy).

The attendance is restricted to a maximum of 70 participants. A limited number of grants will be available to defray part of expenses of pre- and post-doctoral trainees.

Persons wishing to attend the Course should send a curriculum vitae and a list of publications to the Organizing Secretariat. Deadline 15 June 1984. The deadline for application for the grants is 15 May 1984.

For more information contact the Organizing Secretariat:
