

ANNOUNCEMENT

THIRD INTERNATIONAL ISSX MEETING DRUG METABOLISM: MOLECULES, MODELS AND MAN

Amsterdam, The Netherlands, 24–28 June 1991

This meeting, organized under the auspices of ISSX, the International Society for the Study of Xenobiotics, will deal with the following main topics: drug metabolism in man, molecular mechanisms of biotransformation and toxicity, transport mechanisms and *in vitro* biotransformation models. In addition there will be parallel sessions on: species and sex differences, endogenous and food components, analytical techniques, enzyme mechanisms: active sites and SAR, ideosyncratic reactions, ecokinetics of agrochemicals, proteins and peptide drugs, biotransformation and biomonitoring and metals and metal containing compounds. Prior to the Meeting, on 24 June, two courses will be organized on regulatory aspects and on computers in biotransformation.

Chairman and secretary of the organizing committee are G. J. Mulder (University Leyden) and N. P. E. Vermeulen (Free University Amsterdam).
