

ANNOUNCEMENT

SECOND INTERNATIONAL CONFERENCE ON EICOSANOIDS AND OTHER BIOACTIVE LIPIDS IN CANCER, INFLAMMATION AND RADIATION INJURY

Berlin, Germany, 18–21 September 1991

The program consists of invited lectures, poster presentations and workshops. Special sessions will be held on eicosanoids and growth factor receptors; metastasis; oxidative mechanisms in carcinogenesis; radiation and chemical carcinogenesis; cytoprotective and radioprotective properties; the role of platelet activating factor in immunomodulation and tumor growth; the role of cytochrome P-450 in arachidonic acid metabolism; the roles of eicosanoids in tissue injury resulting from carcinogenesis, radiation exposure or chemical exposure; and the clinical implications of the research.
