RADIOPHARMACOKINETICS AND INTERNAL DOSIMETRY—A COURSE FOR THE NON-SPECIALIST

University of Massachusetts Medical Center, Worcester, MA, U.S.A.,
29 September–1 October 1993

A similar 3-day course was successfully offered in September 1992 on pharmacokinetics alone. This year time is provided for dosimetry as well. To be covered the first day is a review of the basic principles of pharmacokinetics and an introduction to the concepts of compartmental and noncompartmental analysis. The second day will cover computer modeling and on-hands analysis of data sets using the modeling program CONSAAM. The final day will cover absorbed radiation dose calculations which will include the basics of MIRD dosimetry, data collection methods, data processing and planning for radionuclide therapy.

The course is sponsored by: Office of Continuing Education, University of Massachusetts Medical Center.

Fee: Before 15 August \$450, thereafter \$550.

Number of participants will be limited.
