

ANNOUNCEMENTS

HPLC '95: THE NINETEENTH INTERNATIONAL SYMPOSIUM ON COLUMN LIQUID CHROMATOGRAPHY

Innsbruck, Austria, 28 May–2 June 1995

HPLC '95 will be held in the Innsbruck Convention Center from 28 May to 2 June 1995. This Symposium will be chaired by Prof. Wolfgang Lindner and forms the 19th in a distinguished series of meetings, which have become the premier event for the presentation of the latest scientific and instrumental advances in separation science. There will be a strong focus on the most dynamically developing techniques and applications in liquid chromatography, capillary electrophoresis and related methods including hyphenated techniques. All those involved in any area of separation science and its applications are cordially invited to attend.

The format for *HPLC '95* will be similar to that for successful meetings held earlier in Europe and the U.S.A., with topical issues in *Oral Sessions*, a strong focus on *Poster Presentations* and special *Poster Discussion Sessions*. A comprehensive *International Technical Exhibition* will be presented as an integral part of the scientific programme. *Workshops and Discussion Fora*, also involving the international Exhibitors, will be held on selected topics. This broad interdisciplinary forum will highlight the following scientific themes:

- Separation methods, including HPLC, SFC, HP-affinity chromatography and related methods
- Capillary electrophoresis and electrokinetic chromatography
- Hyphenated techniques and coupled techniques, including mass spectrometry
- Chiral recognition and separation of stereoisomers
- Separation techniques in biotechnology
- New developments in sorption materials
- Preparative techniques in chromatography
- Selective and sensitive detection systems
- Sample preparation and derivatisation strategies
- Applications in pharmaceutical, clinical, food, environmental and forensic analysis, etc
- Chemometrics in separation science
- Validation and regulatory issues

Delegates will meet in the convivial social surroundings of the Tyrolean city of Innsbruck, where there will be ample time for networking among colleagues and updating on the latest developments in the field.

In view of the rapid developments currently taking place in separation science, the Organizers will be happy to receive **last minute contributions** such as *Poster Presentations*, if an Abstract is submitted by **10 May 1995**.
