Inhibition of the expression of ornithine decarboxylase by haloperidol in difluoromethylornithine-resistant leukemia cells

Flavio Flamigni, Ivana Stanic, Claudio Stefanelli, Claudio Muscari, Antonella Giaccari and Carmen Rossoni

Due to a printing error on page 1394, the wrong graph was set as Figure 1. The correct Figure 1 is shown below.

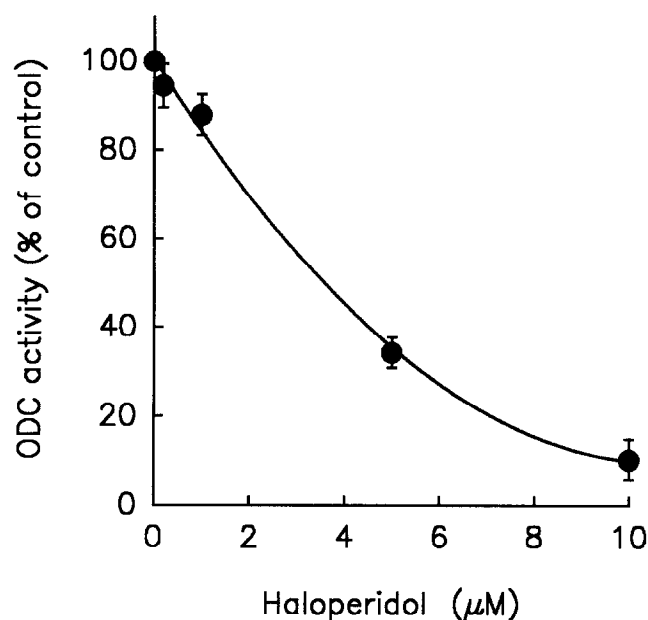

FIG. 1. Effect of increasing concentrations of haloperidol on ODC induction in L1210-DFMO^r cells. Quiescent cells were diluted in fresh medium containing serum and incubated in the presence of the indicated concentration of haloperidol for 16 hr. Results are means \pm SD of three separate determinations.

Subscribers should photocopy these corrections and insert the photocopies in the original article. Authors should introduce these corrections into reprints they distribute. Secondary (abstract) services should carry notice of corrections as prominently as they carry original abstracts.
