

SUBJECT INDEX

- α_1 -Acid glycoprotein
 - expression in hepatocytes, clarithromycin upregulation of, 1391
- Adenosine 3',5'-cyclic monophosphate
 - accumulation in brain, γ -aminobutyric acid_B receptors and, 183
- Adenosine 3',5'-cyclic monophosphate response element
 - gene transcription mediated by, cellular cholesterol cont
- Adenosine triphosphatase
 - cGMP analogue in, 425
- Adenylate cyclase
 - interleukin-13 production by T cells and, 495
- Adrenal chromaffin cell
 - catecholamine secretion in, ginsenoside-Rg₃ inhibition of, 943
- β_1 -Adrenergic receptors
 - regulation, agonist, forskolin, and protein kinase A effects, 1211
- Adverse drug reactions
 - hypericin, DNA topoisomerase II inhibition by, 1059
- Aflatoxin B₁
 - genotoxicity induced by, baicalein and wogonin protective effects, 1653
- Aging
 - taurine concentration in blood and, 29
- Agonists
 - β_1 -adrenergic receptors regulation and, 1211
 - functional desensitization of 5-HT₂ receptors and, 431
- Ah receptor
 - rainbow trout, aryl hydrocarbon receptor-mediated signal transduction, 307
- AIDS dementia
 - cepharanthine effects against, 747
- Ajulemic acid
 - antitumor effects of, 755
- AKR7A1
 - expression of, age, sex, and inducibility influence on, 1511
- Aldehyde reductase
 - AKR7A1, expression of, age, sex, and inducibility influence on, 1511
- Aliphatic hydrocarbons
 - reactive oxygen species and reactive nitrogen species production and, rat brain synaptosomes, 119
- Amastigotes
 - Leishmania*, antisense phosphorothioate oligodeoxyribonucleotide activity against, 569
- Amides
 - hydrolysis, fatty acid amide hydrolase and, 517
- Amine
 - biological activity and intracellular distribution of BBR 3422 and, 1337
- γ -Aminobutyric acid_B receptor
 - activation, corticotropin-releasing hormone-stimulated adenyl cyclase activity and, rat frontal cortex, 183
- Amphotericin B
 - plant lipid transfer proteins, drug delivery applications and, 555
- Anesthetics
 - apoptosis in developing brain and, 401
- Angiogenesis
 - ischemia protection and, renin-angiotensin system role in, 261
 - thymidine phosphorylase, uracil analogs effects, 1257
- Angiotensin II
 - ischemia protection and, 261
- ANP: *see* Atrial natriuretic peptide
- Antagonists
 - cysteinyl-leukotriene 1 receptors, cloning and characterization of, 1193
 - radiolabeled, cardiac muscarinic receptor capacity for, 829
- Antiarrhythmic agents
 - azimilide, interaction with neurohumoral and channel receptors, 883
- Antihypertensive agents
 - carvedilol, radical-scavenging and iron-chelating properties of, 241
- Anti-inflammatory drugs
 - cyclooxygenase and 5-lipoxygenase inhibitors and, 1433
 - nonsteroidal, medium chain acyl-CoA synthetase effects, 363
- Antimicrobial agents
 - quinolone, medium chain acyl-CoA synthetase effects, 363
- Antineoplastic agents
 - apoptosis in lung cancer cells exposed to gemcitabine, 13
 - 1,5-diazabicyclo[3.1.0]hexane-2,4-diones, IMP dehydrogenase activity and, 91
 - 5-fluorouracil activation pathways in organs and PC12 cells, 213
- Anti-opioid agents
 - sigma₁ receptor and, 349
- Antioxidants
 - carvedilol, radical-scavenging and iron-chelating properties of, 241
 - flavonoids, oxidative stress and, in retinal cells, 111
 - 4GBE43 and 2BBBE43, action against lipid peroxidation, 335
 - troglistazone inhibition of phosphoenolpyruvate carboxykinase gene expression, 1071
- Antipsychotic agents
 - chlorpromazine, insulin aggregation by, 1293

- Antisense oligonucleotides
cholesteryl-conjugated, delivery to Kupffer cells by low-density lipoprotein, 627
hepatic distribution after intravenous administration, 297
- Antisense phosphorothioate oligodeoxyribonucleotides
Leishmania amastigotes and, 569
- Antitumor agents
ajulemic acid, 755
apoptosis induced by, DNA fragmentation and phosphatidylserine externalization in, 1087
cancer pharmacology research, National Cancer Institute gene expression database, 547
ellipticine, cytochrome P450 activation and DNA adduct formation, 1675
salvicine, pharmaceutical activity of, 733
- Anviral
apoptosis in prostate cancer and, 469
- Apoptosis
anticancer drug-induced, phosphatidylserine externalization and DNA fragmentation in, mammary adenocarcinoma and, 1087
cardiomyocytes, magnesium tanshinolate B role in prevention, 483
cisplatin-induced, by Bax translocation, in collecting duct cells, 1013
developing brain and, 401
DW2282, in leukemia cells, 1439
in HL-60 cells, polyunsaturated fatty acid-induced, 821
L1210 cell survival, guanylate cyclase and p44/42 mitogen-activated protein kinase and, 307
lung cancer cells exposed to gemcitabine and, 13
miltefosine, effects, 765
p53 inhibitors and, 657
vinblastine-induced, 581
zinc depletion-induced, 51
- Apoptosis-1
inhibitor of, non-small-cell lung cancer exposed to gemcitabine and, 13
- Arachidonic acid
metabolism of, in colon cancer, green/black tea polyphenols effects, 1175
prenylated flavonoids effects on, 1185
- 2-Arachidonoylglycerol
fatty acid amide hydrolase and, 517
- Aromatic hydrocarbons
reactive oxygen species and reactive nitrogen species production and, rat brain synaptosomes, 119
- Aromatic residues
Phe310 role in gonadotropin-releasing hormone receptor activation and, 329
- Aryl hydrocarbon receptor
signal transduction mediated by, rainbow trout Ah receptor nuclear translocator protein effects, 307
upregulation by TCDD in dioxin resistance, 1565
- Ascorbic acid
recycling in endothelial cells, glutathione requirement in, 873
- Asthma
cysteinyl-leukotriene 1 receptors, cloning and characterization of, 1193
3-isobutyl-8-pyrrolidinioxanthine effects on mast cell inhibition and, 1163
- Astroglial cells
zinc effects on, 1491
- Atherosclerosis
S(–)perillic acid effects on protein prenylation and smooth muscle cell proliferation and, 1637
- Atomic force microscopy
applications of, 975
- Atorvastatin
cholesterol and triacylglyceride biosynthesis in HepG2 cells and, 1537
- ATP: *see* Adenosine triphosphate
- ATPase: *see* Adenosine triphosphatase
- Atrial natriuretic peptide
isatin induction and, 225
- Aurintricarboxylic acid
platelet activation and degranulation effects, 1399
- Autotaxin
tumor cell motility-stimulating activity and, 219
- Auxilin
neurotransmitter release regulation and, 1
- Azimilide
neurohumoral and channel receptors and, 883
- AZT: *see* Zidovudine
- Barbituratesetamine
apoptosis in developing brain and, 401
- Bax translocation
cisplatin-induced apoptosis and, in collecting duct cells, 1013
- 2BBBE43
action against lipid peroxidation and, 335
- BBR 3422
amine impact on biological activity and intracellular distribution of, 1337
- Benzodiazepines
apoptosis in developing brain and, 401
- Biacalein
aflatoxin B₁-induced genotoxicity and, 1653
- Bladder
cancer, oleamide effects on Ca²⁺ signaling in, 1363
- Blood-brain barrier
L-DOPA transport and, 1409
- Bothrops asper* venom
metalloprotease/myotoxin from, *Didelphis albiventris* serum complex influence on, 1521
- Brain
circulation, ischemia protection, renin-angiotensin system role in, 261

- development, neurotransmitters and apoptosis, 401
- lipopolysaccharide-evoked cytochrome P450 depression in, cytokines role in, 1709
- potassium channels, green tea interaction with, 527
- update index, L-DOPA transport and blood-brain barrier, 1409
- Breast cancer
 - CYP1A1 inhibition in, resveratrol effects, 1113
 - MCF-7 tumor cells, DNA damage in, c-myc suppression and c-Myc function and, 593
 - vinblastine-induced apoptosis and, 581
- Cadmium
 - cytotoxicity induced by, p38 kinase inhibitor and, 1379
 - exposure to, cytochrome P450 expression in liver and kidney and, 713
- Calcium
 - intracellular free, YC-1 inhibition of, rat neutrophils, 679
- Calcium blockers
 - atomic force microscopy and, 975
- Calcium ion
 - release from intracellular stores in rat hepatocytes, tributyltin chloride effects on, 863
- Calmodulin
 - neutrophil activation by polychlorinated biphenyls and, 1125
- cAMP: *see* Adenosine 3',5'-cyclic monophosphate
- Camptothecin
 - nuclear factor- κ B activation by, S phase dependence and nuclear factor- κ B activating kinase and, 603
- Cancer therapy
 - Anvirzel, apoptosis in prostate cancer, 469
 - DW2282, G₂/M phase arrest and apoptosis and, in leukemia cells, 1439
 - ellipticine, cytochrome P450 activation and DNA adduct formation, 1675
 - gene, prostaglandins and MRP/GS-X pump role in, 811
 - p53 inhibitors and, 657
 - vinblastine-induced apoptosis and, 581
- Cannabinoids
 - ajulemic acid, antitumor effects, 755
- Carbidopa
 - blood-brain barrier and, 1409
- Cardiomyocytes
 - apoptosis of, magnesium tanshinoate B role in prevention, 483
- Cardiovascular disease
 - cyclic nucleotides and platelet activation, 1153
- Carnitine
 - mitochondrial membrane permeability transition and, 1037
- Carvedilol
 - radical-scavenging and iron-chelating properties of, 241
- Ca²⁺ signaling
 - in bladder cancer, oleamide effects, 1363
- Caspase
 - zinc depletion-induced apoptosis and, 51
- Catecholamine
 - secretion in adrenal chromaffin cells, ginsenoside-Rg₃ inhibition of, 943
- Catechols
 - dietary plant, as cytoprotective superoxide radical scavengers, 1579
- Cations
 - agonist binding ET_B receptors, regulation of, 537
- Cepharanthine
 - cytokine production and neural cell death suppression by, 747
- Cerebral endothelial cells
 - uptake of, zinc effects on, 1491
- Ceruleinin
 - protein palmitoylation inhibition and, 985
- cGMP analogue
 - adenosine triphosphatase and, 425
- cGMP excretion
 - isatin blockade of, fluid overload and, 225
- Channel receptors
 - azimilide interaction with, 883
- Chemiluminescence
 - polymorphonuclear leukocyte, inhibition of, chloroquine and blood platelets and, 1629
- Chemotherapy
 - ajulemic acid, 755
 - antisense phosphorothioate oligos activity against *Leishmania* amastigotes and, 569
 - cyclopentenyl, cytostatic and differentiation effects on neuroblastoma cell lines, 1099
 - cytotoxicity related to, *MDR1* gene and, 693
 - 1,5-diazabicyclo[3.1.0]hexane-2,4-diones, IMP dehydrogenase activity and, 91
 - doxorubicin, cellular and molecular basis of, comparison with MEN 10755, 63
 - mitomycin C, NAD(P)H:quinone oxidoreductase genotyping in tumor xenografts, 1371
- Chloroquine
 - blood platelets and, in polymorphonuclear leukocyte chemiluminescence inhibition, 1629
- Chlorpromazine
 - insulin aggregation by, 1293
- Cholecystokinin
 - xanthine oxidase-catalyzed reactive oxygen species generation and, 1621
- Cholesterol
 - biosynthesis, in HepG2 cells, lovastatin, simvastatin, and atrovastatin effects on, 1537
 - gene transcription modulation of, 171
- Circulation, collateral
 - ischemia protection, renin-angiotensin system role in, 261

- Cisplatin
apoptosis induced by, by Bax translocation, in collecting duct cells, 1013
- Clarithromycin
 α_1 -acid glycoprotein expression in hepatocytes and, 1391
- Clofibric acid
molecular species of phosphatidylcholine formation, 853
- Colon
cancer, green/black tea polyphenol effects on arachidonic acid metabolism in, 1175
- Conazole
plant lipid transfer proteins, drug delivery applications and, 555
- Converting enzyme inhibitors
ischemia protection, renin-angiotensin system role in, 261
- Cosmetics
plant lipid transfer proteins, drug delivery applications and, 555
- Coumarin 7-hydroxylase
expression in bovine liver, 635
- Cyclic nucleotide phosphodiesterases
interleukin-13 production by T cells and, 495
- Cyclic nucleotides
platelet activation and, 1153
- Cyclin-dependent kinases
effects on *Plasmodium falciparum*, 341
- Cyclooxygenase
5-lipoxygenase and, inhibitors, as anti-inflammatory therapy, 1433
prenylated flavonoids effects on, 1185
- Cyclopentenyl
cytostatic and differentiation effects on neuroblastoma cell lines, 1099
- CYP: see Cytochrome P450
- CYP1A1
inhibition in breast cancer cells, resveratrol effects, 1113
- CYP1A1 induction
TCDD-mediated, 12-O tetradecanoylphorbol-13-acetate suppression, 1449
- CYP2b9/10 genes
sex-associated expression in kidney and liver, 161
- CYP1B1 induction
TCDD-mediated, 12-O tetradecanoylphorbol-13-acetate suppression, 1449
- Cysteinyl-leukotriene 1 receptors
cloning and characterization of, 1193
- Cytochrome P450
activation, ellipticine effects on, DNA adduct formation and, 1675
expression and induction in parotid glands, rabbit, 249
expression in liver and kidney, cadmium exposure and, 713
farnesyl-protein transferase inhibitors interaction with, 773
lipopolysaccharide-evoked depression in brain and liver, cytokines role in, 1709
prostaglandin H₂ oxidation and, 407
quantification and cellular localization in human skin, 777
xenobiotic-metabolizing, expression in bovine liver, 635
zinc deficiency during development effects, in postpubertal male rats, 1283
- Cytochrome P450 2A6
expression in liver in hepatitis, mechanisms of, 669
- Cytochrome P450 3A
troglitazone quinone formation and, 191
- Cytochrome P450 3A2
zinc deficiency during development effects, in postpubertal male rats, 1283
- Cytochrome P450 3A9
zinc deficiency during development effects, in postpubertal male rats, 1283
- Cytochrome P450 3A18
zinc deficiency during development effects, in postpubertal male rats, 1283
- Cytochrome P450 1A1/1A2
pulmonary levels of, after TCDD exposure during gestation/lactation, rats, 617
- Cytochrome P450 1B1
protein expression, anticancer drug resistance and, 207
- Cytochrome P450 2B1
induction by pyrethroids, 71
- Cytochrome P450 2B1/2
induction by ethanol, in liver, 1025
- Cytochrome P450 2C11/2C12
zinc deficiency during development effects, in postpubertal male rats, 1283
- Cytochrome P450 gene
rat, phenobarbital-response unit in, analysis, 21
- Cytochrome P450 reductase
tirapazamine metabolism and, 1201
- Cytokine production
inflammatory, inhibition of, nuclear factor- κ B activation and, 795
resveratrol and, 1299
suppression by cepharanthine, 747
- Cytosine arabinoside
DNA synthesis imbalance and, in leukemia, 101
- Cytotoxicity
cadmium-induced, p38 kinase inhibitor and, 1379
cell-mediated, resveratrol and, 1299
chemotherapy-related, *MDR1* gene and, 693
CYP1B1 protein expression as model of anticancer drug resistance, 207
- Daunorubicin
P-glycoprotein overexpression and, 561
- Deferiprone
as cytoprotective superoxide radical scavenger, 1579

- Dehydrogenase
 IMP, 1,5-diazabicyclo[3.1.0]hexane-2,4-diones and, 91
- Development
 zinc deficiency during, effects on CYP expression in postpubertal male rats, 1283
- Dexamethasone
 Cyp2b9/10 gene sex-associated expression in kidney and liver and, 161
- Diabetes mellitus
 inducible nitric oxide synthase in neutrophils and, 357
 troglitazone, quinone metabolite formation and, 191
- Dichlorvos
 delayed neurotoxicity induced by, nimodipine protective effects in rat brain, 1265
- Didelphis albiventris* serum complex
 influence on myotoxin and metalloproteases from *Bothrops asper* venom, 1521
- Dihydroxynaphthoic acid
 active site inhibitors of lactate dehydrogenase and, 81
- 3,5-Di-*t*-butyl-4-hydroxyanisole
 skeletal muscle sarcoplasmic reticulum Ca^{2+} -ATPase activation and, 1613
- Dithiothreitol
 insulin aggregation by chlorpromazine and, 1293
- DNA damage
 cytochrome P450 reductase role in EO9 activation and, 461
 S phase dependence and nuclear factor- κB activating kinase and nuclear factor- κB activation by camptothecin, 603
- DNA fragmentation
 in anticancer drug-induced apoptosis, mammary adenocarcinoma and, 1087
- DNA synthesis
 imbalanced, cytosine arabinoside and fludarabine effects, in leukemia, 101
- DNA topoisomerase II
 inhibition by hypericin, 1059
- Dopamine $\text{D}_{2\text{short}}$ receptor
 signaling by partial agonists in G-protein-dependent manner, 723
- Dopamine release
 nornicotine effects on nicotine and, 1597
- L-DOPA transport
 blood-brain barrier and, 1409
- Doxorubicin
 cellular and molecular basis of, comparison with MEN 10755, 63
 hepatic injury induced by, heme oxygenase-1 induction and, 1249
- Drug delivery
 atomic force microscopy and, 975
 plant lipid transfer proteins for, 555
- Drug development
 gene expression microarray analysis in, 1311
- Drug interactions
 DNA topoisomerase II inhibition by hypericin, 1059
- Drug resistance
 CYP1B1 protein expression and, 207
 dioxin, aryl hydrocarbon receptor upregulation by TCDD and, 1565
 nucleoside transporters in parasitic protozoa and, 149
 protein alterations in malignant cells and, 1469
- DW2282
 G_2M phase arrest and apoptosis and, in leukemia cells, 1439
- Electrodes
 atomic force microscopy and, 975
- Ellipticine
 cytochrome P450 activation, DNA adduct formation and, 1675
- Encephalopathy
 HIV-1, cepharanthine effects against, 747
- Endothelial cells
 ascorbic acid recycling in, glutathione requirement in, 873
 pulmonary, glucocorticoids effects on c-jun N-terminal activation effects and, 1719
- Endothelin-1
 insulin-stimulated glucose uptake and, 1705
- Endothelin receptors
 agonist binding, regulation by cations and $\text{GTP}\gamma\text{S}$, 537
- Endotoxin
 lung parenchyma hyporesponsiveness induced by, tumor necrosis factor- α role in, 1141
- Eosinophil migration
 nitric oxide and, 1417
- (—)-Epigallocatechin-3-gallate
 interaction with brain potassium channels, 527
- Epithelial cells
 liver, thalidomide effects on gap junctional intercellular communication in, 1081
- Eriodictyol
 antioxidant effects after oxidative stress induction, in retinal cells, 111
- ERK2
 stimulation by taurine in UMR-106 cells, 1107
- Estrogen receptor α /yeast properties of raloxifene and, 953
- Ethanol
 apoptosis in developing brain and, 401
 CYP2B1/2 and nicotine metabolism induction by, in liver, 1025
- Ethoxyresorufin O-deethylase
 expression in bovine liver, 635
- Exocytosis
 neurotransmitter, regulation of, molecular chaperones and, 1
- Extracellular matrix
 dermal fibrosis, halofuginone reduction effects, 1221

- Farnesyl-protein transferase inhibitors
interaction with cytochrome P450, 773
- Fatty acid amide hydrolase
biochemistry, pharmacology and amide hydrolysis, 517
- Fatty acids
in hepatocytes, metformin effects, 439
long chain, mitochondrial membrane permeability transition and, 1037
polyunsaturated, apoptosis in HL-60 cells induced by, 821
- Fibrinogen receptor antagonist
platelet activation and degranulation effects, 1399
- Fibrosis
dermal, halofuginone reduction effects, 1221
- Finasteride
pharmacokinetic parameters and inhibition mechanisms, 933
- Flavonoids
antioxidant effects after oxidative stress induction, in retinal cells, 111
prenylated, effects on lipoxygenase and cyclooxygenase, 1185
- Flavonol
rutin, intestinal absorption of, 369
- Fludarabine
DNA synthesis imbalance and, in leukemia, 101
- 5-Fluorouracil
activation pathways in organs and PC12 cells, 213
- Forskolin
 β_1 -adrenergic receptors regulation and, 1211
- Free radicals
tert-butyl hydroperoxide-induced lipid signaling in hepatocytes and, 705
- GABA_B; see γ -Aminobutyric acid_B
- Gap junctional intercellular communication
in liver epithelial cells, thalidomide effects, 1081
- Gastric cancer
resveratrol effects on, protein kinase C and, 1423
- 4GBE43
action against lipid peroxidation and, 335
- Gemcitabine
apoptosis in lung cancer cells exposed to, 13
- Gemfibrozil
SREBP-2 expression in liver and, 803
- Gender disparity
reproductive toxicology, current and future directions in, 1557
- Gene expression
microarray analysis, drug development and, 1311
targets, cancer pharmacology research and, National Cancer Institute gene expression database and, 547
- Gene therapy
cancer, prostaglandins and MRP/GS-X pump role in, 811
MDR1, chemotherapy-related cytotoxicity and, 693
- Genotoxicity
aflatoxin B₁-induced, baicalein and wogonin protective effects, 1653
- GI198745
pharmacokinetic parameters and inhibition mechanisms, 933
- Ginkgo biloba* extract
tumor necrosis factor- α release, 963
- Ginsenoside-Rg₃
inhibition of catecholamine secretion in adrenal chromaffin cells, 943
- Glioma
ajulemic acid antitumor effects, 755
- Glucocorticoids
mitogen-activated protein kinases and, 1719
- Gluconeogenesis
troglitazone inhibition of phosphoenolpyruvate carboxykinase gene expression, 1071
- Glucose metabolism
in hepatocytes, metformin effects, 439
PSC833 effects on, rat neuronal and glial cells, 129
- Glucose uptake
insulin-stimulated, endothelin-1 effects on, 1705
- Glutamate
P19 cell death induced by, p44/42 mitogen-activated protein kinase pathway and, 283
- Glutathione
anionic substrate efflux in multidrug resistance-associated protein, 199
intracellular, hyperoxia and, 777
levels, in MRP1-overexpressing leukemia cells, verapamil effects on, 417
polychlorinated biphenyls effects on, 273
S-nitrosothiol derivatives of, stability and pharmacologic properties of, 1239
tert-butyl hydroperoxide-induced lipid signaling in hepatocytes and, 705
- Glutathione-related enzymes
polychlorinated biphenyls effects on, 273
- Gonadotropin-releasing hormone receptor
activation, Phe310 role in, 329
- Gossypol
active site inhibitors of lactate dehydrogenase and, 81
- G-protein-coupled receptor
kinases, regulation, parathyroid hormone receptor and, 1047
prostaglandin D₂ receptor-mediated desensitization of thromboxane A₂ receptor and, 229
- G-proteins
availability, alpha 2-adrenoceptor differential signaling and, 913
dopamine D_{2short} receptor signaling by partial agonists in, 723
heterotrimeric, agonist binding regulation to ET_B receptors and, 537

- Green tea
 (—)-epigallocatechin-3-gallate in, interaction with brain potassium channels, 527
GR144053F
 platelet activation and degranulation effects, 1399
Guanylate cyclase
 p44/42 mitogen-activated protein kinase and, L1210 cell survival, 307
- Halofuginone
 dermal fibrosis reduction after, 1221
Halothane
 heat shock protein induction and, comparison with isoflurane, 375
Heat shock protein
 induction of, isoflurane and halothane effects, 375
Helenalin
 inhibitory effects on 5-lipoxygenase and leukotriene C₄ synthase, 903
Heme oxygenase-1
 induction, doxorubicin-induced liver injury and, 1249
Hepatitis
 CYP2A6 expression in liver and, mechanisms of, 669
Hepatocytes
 calcium ion release from intracellular stores in, tributyltin chloride effects on, rats, 863
 clarithromycin upregulation of α_1 -acid glycoprotein expression in, 1391
 metformin effects on fatty acid and glucose metabolism in, 439
 tert-butyl hydroperoxide-induced lipid signaling in, 705
Herbal medicine
 hypericin, DNA topoisomerase II inhibition by, 1059
HERG gnee
 blockade by proarrhythmic agents, 41
Heroin
 metabolites, μ opioid receptor-mediated G-protein activation by, 6-monoacetylmorphine efficacy and, 447
Hexadecylphosphocholine
 endocytosis activity of, 765
Histamine uptake
 cerebral, zinc effects on, 1491
HL-60 cells
 apoptosis in, polyunsaturated fatty acid-induced, 821
5-HT₂ receptors
 agonist-induced functional desensitization of, 431
Human immunodeficiency virus
 encephalopathy, cepharanthine effects against, 747
Hydrogen peroxide
 histamine release from RBL-2H3 cells and, 1537
Hydrogen sulfide
 oxidation to thiosulfate, colonic mucosa and, 255
6-Hydroxydopamine
 NF- κ B activation induced by, in PC12 cells, 473
Hydroxylamine reductase
 lipopolysaccharide-evoked defense activation effects on, 457
8-Hydroxyquinoline
 partition coefficient influence on biologic activity, 1355
Hypericin
 DNA topoisomerase II inhibition by, 1059
Hyperoxia
 intracellular glutathione and nuclear factor- κ B in, 777
Hyperplasia
 prostatic, 5 α -reductases and, 933
Hyperthermia
 p53 inhibitors and, 657
Hypoxia
 tirapazamine metabolism, cytochrome P450 reductase and, 1201
- Ibuprofen
 prostaglandin H₂ synthesis inhibition and, 1587
Imidazolines
 insulin secretion and, electrophysiological/fluorimetric studies, 1695
 insulin secretory response desensitization and, 1685
Immunosuppression
 prostaglandins and MRP/GS-X pump role in, 811
Indoloquinone
 EO9, activation, cytochrome P450 reductase and, 461
Indomethacin
 prostaglandin H₂ synthesis inhibition and, 1587
Inflammation
 cytokine production, inhibition of, nuclear factor- κ B activation and, 795
 lipopolysaccharide-evoked defense activation effects on sulfamethoxazole hydroxylamine reduction and microsomal formation, 457
 prenylated flavonoids effects on lipoxygenase and cyclooxygenase and, 1185
Insulin
 aggregation by chlorpromazine, 1293
 inducible nitric oxide synthase in neutrophils and, rat, 357
Insulin secretion
 quinine, tolbutamide, and imidazolines and electrophysiological/fluorimetric studies, 1695
 secretory/morphological studies, 1685
Interleukin-1 β
 nitric oxide generation and, Ras modulation in insulin-secreting clonal β cells, 1459
Interleukin-8
 3-isobutyl-8-pyrrolidinoxanthine effects on mast cell inhibition and, 1163
Interleukin-13
 production of, adenylate cyclase and cyclic nucleotide phosphodiesterase roles in, 495
Intestinal metabolism
 rutin and, 369

- Iron chelators
catecholate, partition coefficient influence on biologic activity, 1355
- Isatin
cGMP excretion blocking, fluid overload and, 225
- Ischemia
p53 inhibitors and, 657
protection against, renin-angiotensin system role, 261
- Ischemia-reperfusion injury
deferiprone as cytoprotective superoxide radical scavenger and, 1579
liver, S-15176 effects on mitochondrial function in, 509
- 3-Isobutyl-8-pyrrolidinioxanthine
mast cell inhibition and, 1163
- Isoflurane
heat shock protein induction and, comparison with halothane, 375
- Isoproterenol
 β_1 -adrenergic receptors regulation and, 1211
- Ketamine
apoptosis in developing brain and, 401
- Kidney
compensatory growth effects on renal mitochondria, 383
Cyp2b9/10 genes expression in, 161
cytochrome P450 expression in, cadmium exposure and, 713
- Kupffer cells
cholesteryl-conjugated phosphorothioate oligodeoxynucleotide delivery to, by low-density lipoprotein, 627
- Lactate dehydrogenase
active site inhibitors of, 81
- Leishmania*
nucleoside transporters in, 149
- Leishmania* amastigotes
antisense phosphorothioate oligodeoxyribonucleotide activity against, 569
- Leucocyte migration
nitric oxide and, 1417
- Leukemia
DW2282, G₂/M phase arrest and apoptosis and, 1439
L1210 cell survival, p44/42 mitogen-activated protein kinase and guanylate cyclase effects, 307
- Leukotriene C₄ synthase
helenalin inhibitory effects on, in blood cells, 903
- Librium
tumorigenic properties, mechanisms of, 685
- Ligand-binding proteins
drug delivery applications, 555
- Lipid peroxidation
4GBE43 and 2BBBE43 action against, 335
- Lipid transfer proteins
plant, drug delivery applications, 555
- Lipopolysaccharide
prostaglandin I and E receptor role in pain perception and, 157
- Lipoxygenase
prenylated flavonoids effects on, 1185
- 5-Lipoxygenase
cyclooxygenase and, inhibitors, as anti-inflammatory therapy, 1433
helenalin inhibitory effects on, in blood cells, 903
- Liver
CYP2A6 expression in, hepatitis and, mechanisms of, 669
Cyp2b9/10 genes expression in, 161
cytochrome P450 expression in, cadmium exposure and, 713
doxorubicin-induced injury, heme oxygenase-1 induction and, 1249
ischemia-reperfusion, S-15176 effects on mitochondrial function in, 509
lipopolysaccharide-evoked cytochrome P450 depression in, cytokines role in, 1709
molecular species of phosphatidylcholine formation, clofibrate acid and, 853
phosphorothioate oligodeoxynucleotide distribution in, 297
SREBP-2 expression in, gemfibrozil effects, 803
- Locomotor behavior
antisense peptide nucleic acids and, 929
- Lovastatin
cholesterol and triacylglyceride biosynthesis in HepG2 cells and, 1537
- Lung
adenocarcinoma, salicine pharmaceutical activity, 733
cancer, non-small-cell, apoptosis, gemcitabine effects, 13
CYP1A1 and CYP1A2 levels, after TCDD exposure during gestation/lactation, rats, 617
parenchyma, endotoxin-induced hyporesponsiveness, tumor necrosis factor- α role in, 1141
- Luteolin
antioxidant effects after oxidative stress induction, in retinal cells, 111
- Lymphocyte proliferation
suppression, resveratrol and, 1299
- Lymphoproliferation
mitogen-induced, NF- κ B effects, 141
- Magnesium tanshinolate B
cardiomyocytes apoptosis prevention and, 483
- Malaria
purine derivatives effects on *Plasmodium falciparum*, 341
- Mast cell
inhibition of, 3-isobutyl-8-pyrrolidinioxanthine and, 1163
- Matrix metalloproteinase inhibitors
phospholipidosis induction in hepatocytes and, 1661

- MCF-7 breast tumor cells
DNA damage in, c-myc suppression and c-Myc function and, 593
- MDR: *see* Multidrug resistance
- Medium chain acyl-CoA synthetase
nonsteroidal anti-inflammatory drugs and, 363
- Membrane permeability transition
mitochondrial, carnitine and long chain fatty acids role in, 1037
- MEN 10755
cellular and molecular basis of, 63
- Metalloproteases
Bothrops asper venom, *Didelphis albiventris* serum complex influence on, 1521
- Metformin
fatty acid and glucose metabolism in hepatocytes and, 439
- Methanethiol
oxidation to thiosulfate, colonic mucosa and, 255
- Miltefosine
tumor cell line effects, 765
- Mitochondria
renal, compensatory renal growth effects, 383
- Mitomycin C
chemotherapy, NAD(P)H:quinone oxidoreductase genotyping in tumor xenografts, 1371
- 6-Monoacetylmorphine
efficacy, μ opioid receptor-mediated G-protein activation by heroin metabolites and, 447
- Monoxygenase
flavin-containing, genes encoding, quantification and cellular localization in human skin, 777
- Morphine-3-glucuronide
potency of, comparison with morphine-6 β -glucuronide, 1273
- Morphine-6 β -glucuronide
potency of, comparison with morphine-3-glucuronide, 1273
- MRP1: *see* Multidrug resistance-associated protein 1
- MRP/GS-X pump
prostaglandins and, cancer gene therapy and, 811
- Multidrug resistance
BBR 3422, amine impact on biological activity and intracellular distribution of, 1337
P-glycoprotein overexpression and, 561
- Multidrug resistance-associated protein
glutathione effects on anionic substrate efflux in, 199
- Multidrug resistance-associated protein 1
leukemia cells expressing, verapamil effects on glutathione levels in, 417
P-glycoprotein overexpression and, 561
- Muscarinic receptors
azimilide interaction with, 883
cardiac, radiolabeled antagonist capacity and, 829
- Mutation
protein alterations in malignant cells and drug resistance and, 1469
- Myotoxin
Bothrops asper venom, *Didelphis albiventris* serum complex influence on, 1521
- Myotubes
zidovudine effects on mitochondrial functions in, rats, 893

EO9 activation and, cytochrome P450 reductase role, 461
- Naphthenic hydrocarbons
reactive oxygen species and reactive nitrogen species production and, rat brain synaptosomes, 119
- Naproxen
prostaglandin H₂ synthesis inhibition and, 1587
- National Cancer Institute gene expression database
cancer pharmacology research and, 547
- N-benzoyl-D-phenylalanine
pancreatic islet oscillation regulation and, 923
- Neural cell death
suppression by cepharanthine, 747
- Neuroblastoma
cyclopentenyl cytostatic and differentiation effects on, 1099
- Neuroblastoma cells
noradrenaline release from, Ca²⁺ channels and, 1229
- Neuroleptics
HERG-blocking potency of, testosterone effects, 41
- Neurotoxicity
dichlorvos-induced delayed, nimodipine protective effects in rat brain, 1265
PSC833 effects on glucose metabolism, rat neuronal and glial cells, 129
- Neurotransmitter release
regulation, molecular chaperones and, 1
- Neurotransmitters
in developing brain, 401
- Neutrophil activation
by polychlorinated biphenyls, Ca²⁺/calmodulin and, 1125
- Neutrophils
inducible nitric oxide synthase in, insulin role, rat, 357
YC-1 inhibition of extracellular Ca²⁺, 679
- NF- κ B: *see* Nuclear factor- κ B
- Nicotine
nornicotine role in, 1597
- Nicotine metabolism
induction by ethanol, in liver, 1025
- Nifedipine derivatives
atomic force microscopy and, 975
- Nimodipine
dichlorvos-induced delayed neurotoxicity and, protective effects, rat brain, 1265

- Nitric oxide
 eosinophil migration and, 1417
 histamine release from RBL-2H3 cells and, 1537
 interleukin-1 β -mediated, Ras modulation in insulin-secreting clonal β cells, 1459
 leucocyte migration and, 1417
 S-nitrosothiol and, stability and pharmacologic properties of, 1239
- Nitric oxide synthase
 inducible, neutrophils and, insulin role, rat, 357
- NMDA: *see* N-Methyl-D-aspartate
- NMDA receptors
 apoptosis in developing brain and, 401
- Nornicotine
 nicotine neuropharmacology and, 1597
- Nuclear factor- κ B (NF- κ B)
 activation by camptothecin, S phase dependence and nuclear factor- κ B activating kinase and, 603
 6-hydroxydopamine-induced activation, in PC12 cells, 473
 hyperoxia and, 777
 mitogen-induced lymphocyte proliferation and, 141
- Nucleic acids
 antisense peptide, behavioral response alteration with, 929
- Nucleoside transport
 genetics of, in *Leishmania* and African trypanosomes, 149
- Nucleus accumbens
 nornicotine effects on nicotine and, 1597
- Oleamide
 Ca²⁺ signaling in bladder cancer, 1363
 fatty acid amide hydrolase and, 517
- Oleandrogenin
 Anviral, apoptosis in prostate cancer and, 469
- Olomoucine
 effects on *Plasmodium falciparum*, 341
- μ Opioid receptor-mediated G-protein
 activation by heroin metabolites, 6-monoacetylmorphine efficacy and, 447
- Ornithine decarboxylase
 DNA damage in MCF-7 breast tumor cells, c-myc suppression and c-Myc function and, 593
- Oscillation
 pancreatic islets, regulation of, tolbutamine and N-benzoyl-D-phenylalanine effects on, 923
- 12-O tetradecanoylphorbol-13-acetate
 suppression of TCDD-mediated CYP1A1 and CYP1B1 induction, 1449
- Oxazepam
 tumorigenic properties, mechanisms of, 685
- Oxidation
 methanethiol and hydrogen sulfide, to thiosulfate, colonic mucosa and, 255
 prostaglandin H₂, by cytochrome P450, 407
- Oxidative stress
 compensatory growth effects on renal mitochondria, 383
 flavonoids antioxidant effects after, in retinal cells, 111
 polychlorinated biphenyls, congeneric, glutathione, glutathione-related enzymes, and selenium status and, 273
 in rheumatoid arthritis, rutin suppression of, 743
 taurine concentration, biosynthesis and, 29
 xanthine oxidase-catalyzed reactive oxygen species generation effects on calcium mobilization in pancreatic acinar cells, 1621
- Pain perception
 prostaglandin I and E receptors role in, 157
- Palmitoylation
 protein, cerulenin analog inhibition of, pharmacology of, 985
- Palmitoylethanolamide
 fatty acid amide hydrolase and, 517
- Pancreatic islets
 oscillation regulation in, tolbutamine and N-benzoyl-D-phenylalanine effects on, 923
- Parathyroid hormone receptor
 G protein-coupled receptor kinases regulation and, 1047
- Parotid glands
 cytochrome P450 expression and induction in, rabbit, 249
- Paroxetine
 serotonin synthesis reduction and, rat brain, 1481
- Partition coefficient
 8-hydroxyquinoline biological activity and, 1355
- PC12 cells
 5-fluorouracil activation pathways in, 213
 6-hydroxydopamine-induced NF- κ B activation in, 473
- Penicillin
 atomic force microscopy and, 975
- Pentazocine
 sigma₁ receptor and, 349
- Peptide nucleic acids
 antisense, locomotor behavior and, 929
- Perfluorooctanoic acid
 thymic/splenic atrophy induced by, cell proliferation and, 1133
- Permethrin
 CYP2B1 induction by, 71
- P-glycoprotein
 overexpression, multidrug resistance and, 561
- Pharmaceutics
 plant lipid transfer proteins, drug delivery applications and, 555
- Pharmacokinetics
 phosphorothioate oligodeoxynucleotide distribution in liver, 297
 rutin, intestinal absorption of, 369

- Phe310
gonadotropin-releasing hormone receptor activation and, 329
- Phencyclidine
apoptosis in developing brain and, 401
- Phenobarbital
Cyp2b9/10 gene sex-associated expression in kidney and liver and, 161
responsiveness to *CYP2B2* gene, rat, 21
tumorigenic properties, mechanisms of, 685
- Phosphatidylcholine
molecular species of, clofibrilic acid effects, 853
- Phosphatidylserine externalization
in anticancer drug-induced apoptosis, mammary adenocarcinoma and, 1087
- Phosphodiesterases
cyclic nucleotides and platelet activation and, 1153
- Phosphoenolpyruvate carboxykinase gene
troglitazone effects on inhibition of, 1071

matrix metalloproteinase inhibitors induction in hepatocytes and, 1661
- Phosphorylation
prostaglandin E₂ EP₄ receptor, 997
- Pinealocytes
cAMP and cGMP accumulation by p38 mitogen-activated protein kinase inhibitors and, 1605
- p53 inhibitors
clinical applications for, 657
- p38 kinase inhibitor
cadmium-induced cytotoxicity and, 1379
- Plasmodium falciparum*
purine derivatives effects on, 341
- Platelet activation
aurintricarboxylic acid effects, 1399
cyclic nucleotides and, 1153
GR144053F and, 1399
- Platelets
chloroquine and, in polymorphonuclear leukocyte chemiluminescence inhibition, 1629
- Polychlorinated biphenyls
glutathione, glutathione-related enzymes, and selenium status and, 273
neutrophil activation, Ca²⁺/calmodulin and, 1125
- Polymorphonuclear leukocyte
chemiluminescence, inhibition of, chloroquine and blood platelets and, 1629
- Potassium channels
in brain, (—)-epigallocatechin-3-gallate interaction with, 527
- Prethroids
cytochrome P450 2B1 induction by, 71
- Prostaglandin D₂ receptor
desensitization of thromboxane A₂ receptor and, 229
- Prostaglandin E
receptor, pain perception and, 157
- Prostaglandin E₁
water-soluble prodrug of, lactosylated poly(L-glutamic hydrazide) and, 1531
- Prostaglandin E₂ EP₄ receptor
sequestration and phosphorylation of, 997
- Prostaglandin H₂
oxidation by cytochrome P450, 407
- Prostaglandin H₂ synthesis
inhibition of, ibuprofen, naproxen, and indomethacin and, 1587
- Prostaglandin I
receptor, pain perception and, 157
- Prostaglandins
MRP/GS-X pump and, cancer gene therapy and, 811
- Prostanoid receptor
sequestration and phosphorylation of, 997
- Prostate cancer
apoptosis in, Anvirzel role in producing, 469
- Protein
alterations in malignant cells, drug resistance and, 1469
- Protein kinase
cyclic nucleotides and platelet activation and, 1153
stress-activated, inhibition in ischemic/reperfused heart, magnesium tanshinolate B and, 483
- Protein kinase A
β₁-adrenergic receptors regulation and, 1211
prostaglandin D₂ receptor-mediated desensitization of thromboxane A₂ receptor and, 229
- Protein kinase C
resveratrol-induced inactivation of gastric adenocarcinoma cells and, 1423
- Protein kinase D
inhibition of, resveratrol and, 1647
- Protein prenylation
smooth muscle cell proliferation and, S(—)perillic acid effects, 1637
- PSC833
glucose metabolism effects, rat neuronal and glial cells, 129
