Corrigendum to “The involvement of L- $\gamma$ -glutamyl-L-cysteinyl-glycine (glutathione/GSH) in the mechanism of redox signaling mediating MAPK<sup>p38</sup>-dependent regulation of pro-inflammatory cytokine production”  
[Biochem. Pharma. 63 (2002) 305–320]  $\star$

John J. Haddad\*

Oxygen Signaling Group, Centre for Research into Human Development, Tayside Institute of Child Health, Faculty of Medicine, Ninewells Hospital and Medical School, University of Dundee, Dundee DD1 9SY, Scotland, UK

The author regrets that in the above article his present address was incorrectly given as his affiliation and these are now both listed correctly. There were also amendments to the Acknowledgement section and this is now given in its entirety below.

### Acknowledgments

The author's own publications therein cited are, in part, financially supported by the Anonymous Trust (Scotland), the National Institute for Biological Standards and Control (England), the Tenovus Trust (Scotland), the UK Medical Research Council (MRC, London), the Wellcome Trust (London) (Dr. Stephen C. Land, Tayside Institute of Child Health, University of Dundee, Scotland, UK), and the National Institutes of Health (NIH; Bethesda, MD, USA) (Professor Philip E. Bickler, Department of Anesthesia and

Perioperative Care, University of California, San Francisco, CA, USA). The work of the first author was performed at the Tayside Institute of Child Health, Ninewells Hospital and Medical School, University of Dundee, Scotland, UK. This manuscript was written at the Department of Anesthesia and Perioperative Care, University of California, San Francisco, CA, USA. Dr. John J. Haddad held the George John Livanos prize (London, UK) under the supervision of Dr. Stephen C. Land, and the NIH award postdoctoral fellowship (CA, USA) under the supervision of Professor Philip E. Bickler. The author also appreciatively thanks Jennifer Schuyler (Department of Anesthesia and Perioperative Care) for her excellent editing and reviewing of this manuscript. Colleagues at UCSF (San Francisco, CA, USA) and the American University of Beirut (AUB, Beirut, Lebanon) who have criticized the work for enhancement and constructive purposes are also thanked for their efforts.
