The Authors regret that in Fig. 1 of the above article two mistakes occurred during the preparation of the graphic file. The first line of amino acids should be MGILLAIA instead of MGILLAIS. The corresponding nucleotide sequence is correct. The amino acids on line 4 of the sequence of Fig. 1 should be YGSSSRRA instead of YGSSSRRTA, because the codon ACG corresponding to the additional T does not exist in the DNA coding sequence. The correct sequence has been entered in GenBank under the accession number AY380807.
