ACKNOWLEDGMENTS. The authors express their appreciation to Professor Koshland for providing the basic program used in obtaining the best fit Adair constants. We are also indebted to Drs. Edward McGandy and Robert Kadlec of this department for implementing the operation of the Adair constant program on the PDP-11 computer. Partial support for this study from the U.S. P.H.S. deriving from the Research Career Development Award to D.S.F. and Research Grant AM 15332 is gratefully recognized.
