In the article "Effects of the Vibrio cholerae Siderophore Vibriobactin on the Growth Characteristics of L1210 Cells," by Raymond J. Bergeron, Raul Braylan, Stacia Goldey, and Michael Ingeno, pages 273-280:

On pages 277-278, Figures 3 and 4 were printed without the appropriate labels for treatment times. For the readers' convenience the correct figures are reprinted here.

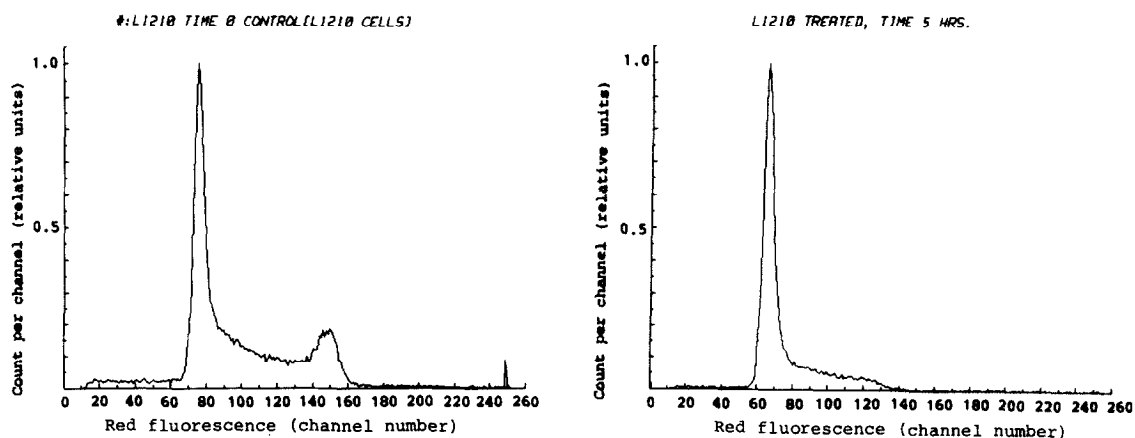

Figure 3. Flow cytometric DNA analysis of L1210 cells treated with 10  $\mu$ M vibriobactin.

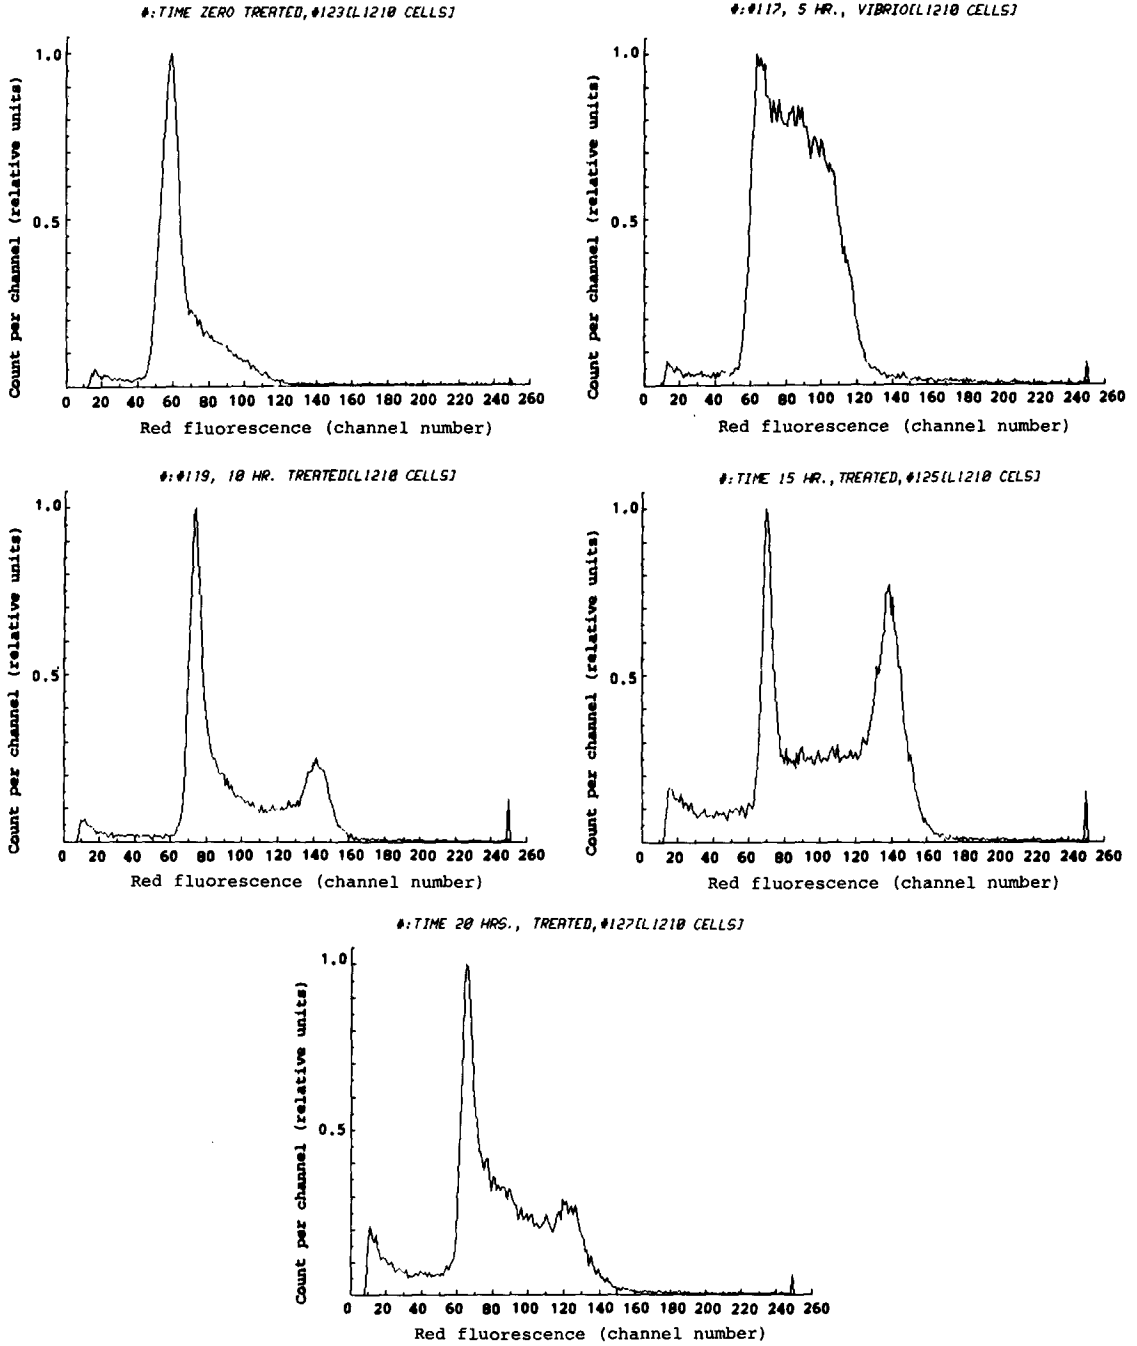

Figure 4. Flow cytometric DNA analysis of L1210 cells regrown in fresh media after treatment with 10  $\mu$ M vibriobactin for 5 hrs.
