

ERRATUM

Volume 213, Number 2 (1995), "A Simple Molecular Assay for the C¹¹⁶⁶ Variant of the Angiotensin II Type 1 Receptor Gene," by Aroon D. Hingorani and Morris J. Brown, pages 725–729: The authors stated that the A¹¹⁶⁶ → C polymorphism in the angiotensin II type 1 receptor gene fails to create or abolish a restriction enzyme cutting site. It has since come to the authors' attention that the C¹¹⁶⁶ variant creates a restriction site for the endonuclease *DdeI* (a method described in Katsuya *et al.*, *Lancet*, **345**, 1600–1603, 1995). A PCR/RFLP-based genotyping method using this enzyme can thus be used as an alternative for the rapid detection of this polymorphism. The authors apologise for this error.
