

Corrigendum

**Corrigendum to “Enrichment of G4 DNA motif
in transcriptional regulatory region of chicken genome”
[Biochem. Biophys. Res. Commun. 354 (2007) 1067–1070]**

On page 1069, the third sentence in the second paragraph of the Discussion section should read as follows: “Recently, G4 DNA in several promoters such as c-MYC and KRAS has been identified as having a negative effect on the regulation of transcription [3,11], and increasing numbers of potential G4 DNA sites have been characterized in gene promoters such as in the c-Kit gene [10].”
