3-5 December 2007

Proteomics : Pushing the Limits

The SPS07 congress will focus on the present limitations in the field of proteomics, and in particular on how can we go beyond these limits.

Presentations will cover areas such as:

- Pre-analytical work
- Post-translational modifications
- Membrane proteomics
- Biomarker discovery and validation
- Bioinformatics

As in the previous SPS congresses, a mixture of invited lectures, short communications selected from the submitted abstracts and poster presentations will contribute to a lively discussion on recent advances of proteomic research and will fulfill the mission of the SPS: disseminate knowledge and exchange scientific information.

Two roundtables, one on pre-analytical challenges, the other focusing on validation of newly discovered biomarkers will further strengthen the programme.

Invited speakers and guests

Scott D. PATTERSON, Peter ROEPSTORFF, Albert HECK, Roman ZUBAREV, Albert SICKMANN, André SCHRATTENHOLTZ, Hanno LANGEN, Jacques COLINGE, Bruno DOMON, Vincent DIVE, Jacques CORNUZ, Martin KUSMANN, Ruedi AEBERSOLD, Denis HOCHSTRASSER

Deadlines

by **24 September** for abstract submission
by **15 October** for early registration
