

CORRECTIONS

Inhibitors of the Isoprenylated Protein Endoprotease, by Yu-Ting Ma, Bryant A. Gilbert, and Robert R. Rando*, Volume 32, Number 9, March 9, 1993, pages 2386–2393.

The *S*-farnesyl-L-cysteine analogs were inadvertently represented as *D* enantiomers. Thus, the depicted chiral centers at the α position of the cysteines in Schemes II–V, Table II, and structures **15** and **16** are incorrect and should be inverted to represent the absolute stereochemistry of L-cysteine.
