## Peptide-Based Drug Design: Controlling Transport and Metabolism

This important new volume provides a framework for designing peptide-based therapeutic agents with improved transport and metabolism properties for optimal *in vivo* activity, covering recent advances in molecular biology of transport as well as what is more classically known about drug metabolism and drug transport of amino acids and peptides.

*Peptide-Based Drug Design* focuses on intestinal peptide transport, liver peptide transport, peptide delivery through the blood-brain barrier, peptide transport in microorganisms, approaches to limiting peptide metabolism, and experimental systems to evaluate peptide transport and metabolism.

It reviews the state of knowledge in the field and provides examples of how knowledge of peptide transport was used to design strategies for improved delivery of specific classes of agents and details experimental systems that can be used to evaluate transport and metabolism of peptide-based drugs.

Michael D. Taylor, TSRI, Editor  
Cordon Amidon, University of Michigan, Editor

© Copyright 1995 American Chemical Society.  
**Copyright permission:** Reprographic copying beyond that permitted by Section 107 or 108 of the U.S. Copyright Act is allowed, provided that the appropriate per-copy fee is paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Dr., Danvers, MA 01923, USA. Anyone may excerpt up to 200 words per article for noncommercial, scholarly purposes with appropriate credit to the source. Direct other reprint permission requests to ACS Copyright Office, Publications Division, 1155 Sixteenth St., N.W., Washington, DC 20036. For quotes and information on ordering bulk reprints, call (202) 872-4539 or write to Product Services Department at the ACS Washington address.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences—Permanence of Paper for Printed Library Materials, ANSI Z39.48-1984.

### Editorial Information

Instructions to authors and copyright status form are printed in the first issue of each volume. Please conform to these instructions when submitting manuscripts.

Manuscripts for publication should be submitted to the Editor, Gordon G. Hammes, Duke University Medical Center, Box 3673, 081 Yellow Zone, Duke South, Durham, NC 27710. Correspondence regarding accepted papers and proofs should be directed to the Journal Publishing Operations at the address above. Page charges of \$30.00 per page may be paid for papers published in this journal. Payment does not affect acceptance or scheduling of papers.

The American Chemical Society and its Editors assume no responsibility for the statements and opinions advanced by contributors.

Registered names and trademarks, etc., used in this publication, even without specific indication thereof, are not to be considered unprotected by law.

A nine character code that is unique to each article is assigned during the editorial production of the manuscript and appears at the end of the published paper. It serves as a link between the documents in the printed product and the electronic products (JACS Plus Images and journals on CD-Rom) and facilitates retrieval of the document in electronic form.

### 1995 Subscription and Ordering Information

Members may share/donate their personal subscriptions with/to libraries and the like but only after 5 years from publication.

New and renewal subscriptions should be sent with payment to American Chemical Society, Department L-0011, Columbus, OH 43268-0011.

Microforms and Back Issue orders should be sent to Microforms & Back Issues Office at the ACS Washington address.

\* Air service included.

Nonmember subscribers in Japan must enter subscription orders with Maruzen Company Ltd., 3-10 Nihonbashi 2-chome, Chuo-ku, Tokyo 103, Japan. Tel: (03) 272-7211.

Claims for missing numbers will not be allowed if loss was due to failure of notice of change of address to be received in the time specified; if claim is dated (a) North America, more than 90 days beyond issue date; (b) all other foreign, more than 180 days beyond issue date. Claims are handled by Member & Subscriber Services.

Supporting Information is noted in the table of contents with a "box". It is available as photocopy (\$12.00 for up to 3 pages and \$1.50 per page for additional pages, plus \$2.00 for foreign postage) or as 24x microfiche (\$12.00, plus \$1.00 for foreign postage). Canadian residents should add 7% GST. See Supporting Information notice at the end of journal article for number of pages. Orders must give complete title of article, names of authors, journal, issue date, and page numbers. Prepayment is required and prices are subject to change. In 1995, electronic Supporting Information is available to current journal subscribers via the Internet using either gopher or World Wide Web protocols. Most often, the material is available as PDF files, which may be viewed using Adobe's Acrobat Reader, a program which is freely available on the Internet. However, some articles may include computer programs, PostScript files, word processing files, experimental data in a standard format (e.g., crystallographic parameters in CIF format), etc. In order to download the Supporting Information, users will need to enter their journal subscriber number, which can be found on the mailing label. Detailed instructions for using this service can be found on the Internet. With gopher, connect to [pubs.acs.org](http://pubs.acs.org), go to the "ACS Publications" selection, then to the "Supporting Information" selection. Read the README file in this directory for detailed instructions. When using a WWW client (e.g., Mosaic, Netscape), connect to the URL "<http://pubs.acs.org/>", select the "Supporting Info, for Journals" link. For further information on electronic access, send electronic mail to [gopher.acsinfo.acs.org](mailto:gopher.acsinfo.acs.org) or phone (202) 872-4434. For information on microforms, contact Microforms & Back Issues at the ACS Washington address or phone (202) 872-4554. Supporting Information except structure factors also appears in the microfiche edition.
