A Reiterative Mode of DNA Synthesis Adopted by HIV-1 Reverse Transcriptase after a Misincorporation, by Miria Ricchetti* and Henri Buc*, Volume 35, Number 47, November 26, 1996, pages 14970–14983.

Page 14972. In Table 3, in the sequence of the last template D2-A, one “A” should be added at the 3' end.

Page 14973. In Figure 1C, the symbols for curves 4 and 5 have been inverted. Filled triangles refer to curve 4 (overhanging template sequence ATA₄T) and filled squares to curve 5 (overhanging template sequence ATA₁₀).
