

Corrections

NMR Constraints on the Location of the Retinal Chromophore in Rhodopsin and Bathorhodopsin, by May Han and Steven O. Smith*, Volume 34, Number 4, January 31, 1995, pages 1425–1432.

Page 1431. In column 2, line 18, the sign of the C11–C12–C13–C14 torsion angle is incorrectly stated. The models in Figures 2d and 4 are correct and have a torsion angle of -140° rather than $+140^\circ$.
