Solution Structure of Δ^5 -3-Ketosteroid Isomerase Complexed with the Steroid 19-Nortestosterone Hemisuccinate, by Michael A. Massiah, Chitrananda Abeygunawardana, Apostolos G. Gittis, and Albert S. Mildvan*, Volume 37, Number 42, October 20, 1998, pages 14701–14712.

Page 14711. The authors are grateful to Dr. Qinjian Zhao for overexpression and purification of the ^{15}N - and/or ^{13}C -labeled Δ^5 -3-ketosteroid isomerases which were used for the structural determination and for initial data analysis. Preparation of these recombinant proteins was supported by NIH Grant DK07422 to Dr. Paul Talalay. The authors also thank Dr. T. K. Harris for essential help in the preparation and assay of the hybrid dimer sample.
