

Corrections

Molecular Cloning of the cDNA Encoding the Carboxy-Terminal Domain of Chimpanzee Apolipoprotein(a): An Asp57 → Asn Mutation in Kringle IV-10 Is Associated with Poor Fibrin Binding, by Xavier Chenivesse, Thierry Huby, Jean Wickins, John Chapman, and Joëlle Thillet*, Volume 37, Number 20, May 19, 1998, pages 7213–7223.

Several mistakes appear in the apo(a) sequence. At position 1759, C should read G (L → V); at position 1762, G should read C (A → P); at position 3294, C should read T; and at position 3687, T should read C.
