Subsite Specificity of Memapsin 2 ( $\beta$ -Secretase): Implications for Inhibitor Design, by Robert T. Turner, III, Gerald Koelsch, Lin Hong, Pedro Castanheira, Jacques Ermolieff, Arun K. Ghosh, and Jordan Tang\*, Volume 40, Number 34, August 28, 2001, pages 10001–10006.

Page 10001. Pedro Castanheira's name is spelled correctly here; the middle initial for Arun K. Ghosh was omitted, and Jacques Ermolieff (Pfizer, Inc., 4215 Sorrento Valley Boulevard, San Diego, CA 92121) should have been listed as an author on the original paper.
