

**Correction to Slow Conformational Dynamics in the Cystoviral RNA-Directed RNA Polymerase P2: Influence of Substrate Nucleotides and Template RNA** [*Biochemistry* 2011, 50, 1875 DOI: 10.1021/bi101863g]. Zhen Ren, and Ranajeet Ghose\*

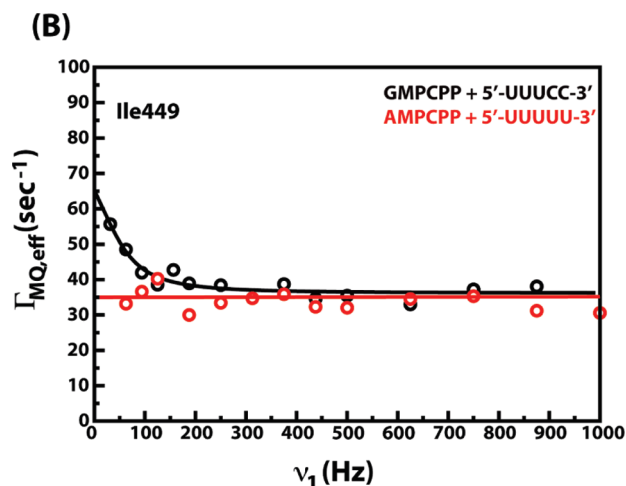

Figure 3B

The following sentence should be added to the legend to Figure 1B: In the orientation of Figure 1A, the template tunnel lies at the top and the substrate tunnel at the back of the protein. The legends for AMPCPP+5'-UUUUU-3' and GMPCPP+5'-UUUCC-3' were swapped in the original Figure 3B. The correct Figure 3B is shown above. The y-axes in Figures 5A, 5B, and 6C should read  $\Delta\delta$  (Hz) and *not*  $\Delta\delta$  (ppm). The discussion in the text is accurate in all cases, and the results and conclusions of this work are unaffected by these typographical errors.
