CORRECTION

In the paper by Sidney Harshman and Victor A. Najjar in Volume 4, No. 11, November 1965, on p 2531, Figure 2 should be corrected as follows: The autoradiograph of the separation of the peptide at pH 2.0 should be reversed to make it consistent with the others in which the positive electrode is at the left and the negative electrode at the right. The labels on the two peptides should be reversed.
