

Binding of the Triton X Series of Nonionic Surfactants to Bovine Serum Albumin, by Wayne W. Sukow, Howard E. Sandberg, Edwin A. Lewis, Delbert J. Eatough, and Lee D. Hansen,* Volume 19, Number 5, March 4, 1980, pages 912-917.

Page 917. The Sober (1970) reference should read as follows: Kirschenbaum, D. M. (1970) *Handbook of Biochemistry-Molecular Biology* (Sober, H. A., Ed.) 2nd ed., p C-71, Chemical Rubber Co., Cleveland, OH.

Phosphorus-31 Nuclear Magnetic Resonance Application to Positional Isotope Exchange Reactions Catalyzed by *Escherichia coli* Carbamoyl-Phosphate Synthetase: Analysis of Forward and Reverse Enzymatic Reactions, by Frank M. Raushel and Joseph J. Villafranca,* Volume 19, Number 14, July 8, 1980, pages 3170-3174.

Page 3170. For reasons obvious to the kineticist, the last sentence of the Abstract should read as follows: Both intermediates are formed faster than or equal to the *slowest* step in the reaction.
