

Finally...
a chemical inventory
program that thinks
like a chemist!

ChemStock

Keep track of thousands of chemicals — without a major investment of time or money — with *ChemStock*, ACS Software's chemical inventory program for any Macintosh with 1MB RAM.

This unique stockroom database searches and sorts using chemical rules, so you can quickly check out quantities, locations, suppliers, and more — by name or by formula. *ChemStock* does all the work by reducing your entry to its molecular formula for searching.

Just \$199 list price — \$50 less for ACS members!

ACS Software's exclusive program is the most affordable database solution for small- to mid-sized laboratories. Whether you're using a general database program, HyperCard, or a spreadsheet to manage inventory, *ChemStock* can bring you up to speed fast by importing your current files *without* data re-entry.
