Lysine-313 of 5-Aminolevulinate Synthase Acts as a General Base during Formation of the Quinonoid Reaction Intermediates, by Gregory A. Hunter and Gloria C. Ferreira*, Volume 38, Number 12, March 23, 1999, pages 3711–3718.

Page 3713. Equation 2 should read as follows:

$$A = A_i + (A_f - A_i) \times \left[\frac{K_D + [L] + [E] - \sqrt{(K_D + [L] + [E])^2 - 4[L][E]}}{2[E]} \right] \quad (2)$$
