

Corrections

Selective Recognition of Mannose by the Human Eosinophil Charcot-Leyden Crystal Protein (Galectin-10): A Crystallographic Study at 1.8 Å Resolution, by G. Jawahar Swaminathan, Demetrios D. Leonidas, Michael P. Savage, Steven J. Ackerman, and K. Ravi Acharya*, Volume 38, Number 42, October 19, 1999, pages 13837–13843.

Page 13841. In the legend to Figure 4 (line 1) bound with bound mannose should read bound with mannose and (line 3) poisson should read Poisson and perfection should read per electron. The Journal apologizes for introduction of these errors at proof stage.
