Hammerhead Ribozyme Mechanism: A Ribonucleotide 5' to the Substrate Cleavage Site Is Not Essential, by Anilkumar R. Kore and Fritz Eckstein\*, Volume 38, Number 34, August 24, 1999, pages 10915–10918.

Page 10918. The following sentence should be added to the end of the Discussion: This has been observed for the HH 16 ribozyme previously but not discussed in the light of the X-ray structure or other 2'-modifications (19). Also, the following should be included in the References: 19. Hertel, K. J., Peracchi, A., Uhlenbeck, O. C., and Herschlag, D. (1997) *Proc. Natl. Acad. Sci. U.S.A.* 94, 8497–8502.
