A Comparative Resonance Raman Analysis of Heme-Binding PAS Domains: Heme Iron Coordination Structures of the *BjFixL*, *AxPDEA1*, *EcDos*, and *MtDos* Proteins, by Takeshi Tomita,* Gonzalo Gonzalez, Alan L. Chang, Masao Ikeda-Saito, and Marie-Alda Gilles-Gonzalez*, Volume 41, Number 15, April 16, 2002, pages 4819–4826.

Page 4820. $G_{\beta-2}$ is the correct notation in line 10 of column 1.

Page 4822. $F_{\alpha 3}$ is the correct notation in line 6 of column 2. $G_{\beta-2}$ is the correct notation in lines 11 and 12 of column 2.

Page 4825. $G_{\beta-2}$ is the correct notation in line 20 of column 1.

Mechanistic Studies of a Retaining α -Galactosyltransferase from *Neisseria meningitidis*, by Hoa D. Ly, Brenda Loughheed, Warren W. Wakarchuk, and Stephen G. Withers,* Volume 41, Number 16, April 23, 2002, pages 5075–5085.

Page 5084. The Note Added in Proof should have appeared as follows.

A recent determination of the structure of the bovine galactosyltransferase (43) casts serious doubts upon the conclusions of the paper by Gastinel et al. (15) concerning the formation of a covalent intermediate.
