Mutagenesis and Mechanism-Based Inhibition of *Streptococcus pyogenes* Glu-tRNA^{Gln} Amidotransferase Implicate a Serine-Based Glutaminase Site, by Mark R. Harpel,* Kurumi Y. Horiuchi, Ying Luo, Li Shen, Wenjun Jiang, David J. Nelson, Kelley C. Rogers, Carl P. Decicco, and Robert A. Copeland, Volume 41, Number 20, May 21, 2002, pages 6398–6407.

Page 6403. Equation 4 should read $k_{on} = k_{on,app}(1 + [Gln]/K_m)$. Because the correct equation was used to calculate the k_{on} value presented in the text, no experimental results or conclusions are impacted by this typographical error.
