

The ATP-Dependent Amide Ligases DdaG and DdaF Assemble the Fumaramoyl-Dipeptide Scaffold of the Dapdiamide Antibiotics [(2009) *Biochemistry* *48*, 10467. DOI: 10.1021/bi9013165]. Marie A. Hollenhorst, Jon Clardy, and Christopher T. Walsh*

In the experiments shown in Figure 2B and Figure S4, racemic *trans*-epoxysuccinate was used instead of (*S,S*)-epoxysuccinate as labeled. This error does not change any of our conclusions.
