

Correction to Internal Motions and Exchange Processes in Human Ileal Bile Acid Binding Protein As Studied by Backbone ^{15}N Nuclear Magnetic Resonance Spectroscopy

Gergö Horváth, Péter Király, Gábor Tárkányi, and Orsolya Tóke*

Biochemistry 2012, 51 (9), 1848–1861. DOI: 10.1021/bi201588q

Pages 1856–1858. The exchange constant as well as the rate constants for the conformational exchange process should be multiplied by 2π to obtain the correct values in inverse seconds. Accordingly, $k_{\text{ex}}^{\text{global}} = 2996 \pm 515 \text{ s}^{-1}$ with $k_{\text{A} \rightarrow \text{B}} = 207 \pm 94 \text{ s}^{-1}$ and $k_{\text{B} \rightarrow \text{A}} = 2789 \pm 490 \text{ s}^{-1}$ for the $\text{A} \leftrightarrow \text{B}$ exchange process.
