

BIOCHIMICA ET BIOPHYSICA ACTA

Vol. 1 (1947)

INDEX TO AUTHORS

- ALBA, R. TH., see WALLERSTEIN, J. S.
 ALGERA, L., BEYER, J. J., VAN ITERSSEN, W.,
 KARSTENS, W. K. H., and THUNG, T. H.,
 Some data on the structure of the chloro-
 plast, obtained by electron microscopy 517
 ANTONIN, S., see DESNUELLE, P.
 ASTBURY, W. T. and SPARK, L. C., An electron
 microscope and X-ray study of actin.
 II. X-rays 388
 BAILEY, K. and PERRY, S. V., The role of the
 sulphhydryl groups in the interaction of
 myosin and actin 506
 BEYER, J. J., see ALGERA, L.
 BRACHET, J. and JEENER, R., Protéines de
 structure de SZENT-GYÖRGYI et thymo-
 nucléohistone 13
 BRAUNSTEIN, A. E., NEMCHINSKAJA, V. L.,
 and VILENKINA, G. J., The manometric
 estimation of small amounts of aspartic acid 281
 BRETSCHNEIDER, L. H., see ENGEL, CHR.
 BREUSCH, F. L. and TULUS, R., Die Spezifität
 der Mikromethoden zur Citronensäure-
 bestimmung als Pentabromaceton . . . 77
 BRÜEL, D., HOLTER, H., LINDERSTRÖM-LANG
 K., and ROZITS, K., A micromethod for
 the determination of total nitrogen
 (accuracy 0.005 $\mu\text{g N}$) 101
 BÜCHER, TH., Über ein phosphatübertragen-
 des Gärungsferment 292
 —, Über das Molekulargewicht der Enolase 467
 —, Zum Gültigkeitsbereich der RAYLEIGH-
 schen Gleichung (Molekulargewichte aus
 der Lichtzerstreuung von Linearkol-
 loiden) 477
 — and KASPERS, J., Photochemische Spal-
 tung des Kohlenoxydmyoglobins durch
 ultraviolette Strahlung (Wirksamkeit
 der durch die Proteinkomponente des
 Pigments absorbierten Quanten) . . . 21
 CHANTRENNE, H., Hétérogénéité des granules
 cytoplasmiques du foie de souris . . . 437
 CLAUSER, H., see FROMAGEOT, C.
 COURTOIS, J., Recherches sur la phytase. III.
 Essais de séparation de l'activité glycéro-
 phosphatase et de l'activité phytas-
 ique du son de blé 270
 —, see FLEURY, P.
 DELEY, J., PEETERS, G., and MASSART, L.,
 The influence of acridine compounds on
 bakers' yeast 393
 DESNUELLE, P. et ANTONIN, S., Nouvelles
 études sur l'hydroxylsine 50
 — et ROVERY, M., Sur l'acylation des grou-
 pements thiols protéiques 497
 DEY, K., Some observations on calcium meta-
 bolism in rats injected with calcium tri-
 phosphate suspensions 434
 ENGEL, CHR., The distribution of the enzymes
 in resting cereals. I. The distribution of
 the saccharogenic amylase in wheat, rye,
 and barley 42
 — and HEINS, J., — II. The distribution
 of the proteolytic enzymes in wheat, rye,
 and barley 190
 —, — III. The distribution of esterase in
 wheat, rye, and barley 278
 — and BRETSCHNEIDER, L. H., — IV. A
 comparative investigation of the distri-
 bution of enzymes and mitochondria in
 wheat grains 357
 ENGSTRÖM, A., Quantitative cytochemical
 determination of nitrogen by X-ray ab-
 sorption spectrography. I. The theoretic-
 al basis 428
 FLEURY, P. et COURTOIS, J., Recherches sur
 la phytase. II. Cinétiques comparées de
 l'hydrolyse du glycérophosphate et de
 l'inositohexaphosphate par le son de blé 256
 FROMAGEOT, C. et CLAUSER, H., Méthionine
 et acide α -amino-butérique 449
 GROEN, J., Absorption of iron compounds
 from the small intestine in the rat . . 315
 GROOT, E. H., JANSSEN, L. W., KENTIE, A.,
 OOSTERHUIS, H. K., and TRAP, H. J. L.,
 A new protein in potatoes 410
 HALE, M. G., see WALLERSTEIN, J. S.
 HARKNESS, J. and WHITTINGTON, R. B., On
 the viscosity of solutions of human
 albumin and globulin 487
 HAUROWITZ, F. and TEKMAN, S., Colour re-
 actions of native and denatured proteins 484
 HECHT, E., Diastase concentration in the
 blood and urine of normal and of dia-
 betic rats. 415
 HEINS, J., see ENGEL, CHR.
 HOLTER, H., see BRÜEL, D.
 HOSKAM, E. G., Photometric determination
 of alpha- and beta amylase in flour . . 419
 HOSTE, J., see MASSART, L.
 ITERSSEN, see VAN ITERSSEN.
 JANSSEN, L. W., see GROOT, E. H.
 JEENER, R., see BRACHET, J.
 KARSTENS, W. K. H., see ALGERA, L.
 KASPERS, J., see BÜCHER, TH.
 KENTIE, A., see GROOT, E. H.
 LAFON, M., see ROCHE, J.
 LEDERER, E., et TCHEN PAU KIUN, Sépa-
 rations chromatographiques d'acides

- aminés et de peptides. I. Chromatographie de peptides neutres dans le formol à 10% 35
- LEVY, H. see WALLERSTEIN, J. S.
- LINDERSTRÖM-LANG, see BRÜEL, D.
- MASSART, L. et HOSTE, J., Le dosage photométrique des nucléosides puriques et pyrimidiques au moyen de la réaction à l'orcine 83
- , see DELEY, J.
- MICHEL, R., see ROCHE, J.
- NEMCHINSKAJA, V. L., see BRAUNSTEIN, A. E.
- NGUYEN-VAN THOAI, ROCHE, J. et ROGER, M., Inactivation et réactivation complètes de la phosphomonoestérase alcaline et interchangeabilité des métaux actifs 61
- OOSTERHUIS, H. K., see GROOT, E. H.
- PEETERS, G., see DELEY, J.
- PERRY, S. V. and REED, R., An electron microscope and X-ray study of actin. I. Electron microscope 379
- REED, R., see PERRY, S. V.
- RIESSER, O., Über die Gewinnung von reinem Kallikrein aus Pankreas 147
- , Über Glykogensynthese im überlebenden Rattenzwerchfell und ihre Beeinflussung in vitro durch Hormone und Vitamine 208
- ROCHE, J. et MICHEL, R., Dosage colorimétrique de la thyroxine, de la diiodotyrosine et de la monoiodotyrosine. Application aux protéines iodées 335
- , — et LAFON, M., Sur la formation de la thyroxine et de ses précurseurs dans les iodoprotéines 453
- , see NGUYEN-VAN THOAI.
- ROGER, M., see NGUYEN-VAN THOAI.
- ROVERY, M., see DESNUELLE, P.
- ROZITS, K., see BRÜEL, D.
- RUDALL, K. M., X-ray studies of the distribution of protein chain types in the Vertebrate Epidermis 549
- SMITS, G., A new buffer for the pH-range 5 to 7 280
