

PUBLISHERS' NOTE

During 1949 the number of articles submitted for publication in this Journal has continued to increase.

In order to give the manuscripts already on hand prompt publication, the Editorial Board has therefore asked the Publishers to issue more than one volume a year when this seems called for.

Accordingly it has been decided to publish numbers 4, 5 and 6 of the current Volume 4 combined in the present issue, thereby completing this volume of the Journal.

Publication of papers already received and of new papers will continue in Volume 5 the first part of which will appear shortly after the current number. It is anticipated that publication of Volume 6 will also begin during 1950.
