SUBJECT INDEX

- Acetate (carboxy-¹⁴C), biosynthesis of fatty acids from —, soluble enzyme system from rat mammary gland homogenates 587
 Acetoacetate, formation from short-chain fatty acids, even series, theoretical interpretation 37
 Acetylcholinesterase, essentiality in conduction 147
 Aconitase, intracellular distribution, yeast 596
 Actin, extraction, purification, chemical properties 102
 —, molecular dimensions, monomer-dimer transformation 792
 —, myosin, ATP, interaction 236
 Adenine, incorporation into nucleotides and nucleic acids, C57 mice 487
 Adenosine triphosphate, actin, myosin, interaction 236
 —, *E. coli*, content after U.V. irradiation 451
 —, efficiency of splitting during contraction of fibre models 138
 Aerosol technique, study of macromolecules, electron microscopy 507
 DL-Alanine-1-¹⁴C, dissimilation, rat brain homogenates 308
 Amino acid sequence in oxytocin 449
 Amino acids, cellular accumulation, intensification by pyridoxal 303
 —, cerebral, fluoroacetate-poisoned, an-

- aesthetised and hypoglycaemic rats . . . 548
 —, quantitative determination on filter paper 209
 Arginase, antimetabolic agent, tissue culture . . . 396
 Arginine, metabolism, marine invertebrates . . . 403
 Asymmetric synthesis, spontaneous, theoretical study 459
Bacillus coagulans, cytochromes, aerobiosis and anaerobiosis 530
 Bacteria, induced synthesis of enzymes, analysis at cellular level 383
 Bile, excretion of 3:5:3'-triiodothyronine and derivatives 543
 Bone tissue, X-rays, low-angle scatter 178
 Brain, rat, homogenates, dissimilation of DL-alanine-1-¹⁴C 308
 Butyryl-coenzyme A, synthesis by reversal oxidative pathway 600
 Ceroid, formation in liver of choline-deficient of rats, factors 445, 446
p-Chloromercuribenzoate, action on RNA-RNase system 517
 Choline, deficient rats, formation of ceroid in liver, factors 445, 446
 Cholinesterase, ox red cell, turnover number, methods of estimation 52
 α -Chymotrypsin, inhibited by organic phosphates, reactivation 310
 Coenzyme III, (prosthetic group of cysteine-sulfinic dehydrogenase), studies 290
 Collagen, periodic structure, further evidence 1
Coniferae, pit pairs, electron microscopy 190
 Cornea, endothelium, intercellular spacing 311
Corynebacterium diphtheriae, unsaturated mycolic acid, chemical constitution 163
 —, —, and derivatives, synthesis 602
 Creatine, synthesis, tumour-bearing rats 69
 L-Cysteic acid, oxidation, *Proteus vulgaris* 270
 L-Cysteinesulfinic acid, enzymic transformations 276
 D- and L-Cysteinesulfinic acid, oxidation, *Proteus vulgaris* 270
 L-Cysteinesulfinic dehydrogenase, studies on prosthetic group (coenzyme III) 290
 Cytochromes, *B. coagulans*, aerobiosis and anaerobiosis 530
 Dehydrogenase systems, models, mechanism of hydrogen transfer 597
 Desoxyribonucleodepolymerase, see Nuclease
 Desoxyribonucleic acid, see Nucleic acid
 Desoxyribonucleoprotein, see Nucleoprotein
 Electron microscopy, cell wall of *Halicystis osterhoutii* 344
 —, configuration of native and partially polymerized fibrinogen 329
 —, desoxyribonucleoprotein, sea urchin sperm 59
 —, pit pairs of *Coniferae* 190
 —, study of macromolecules, aerosol technique 507
 —, tobacco mosaic virus, breaking by new freeze drying method 337
 Electrophoresis, non-structural proteins, normal and atrophic muscle, rabbit, man 258
 Embryo, chick, developing wings and legs, growth, metabolic activities 497
Endamoeba histolytica, role of sulfur in metabolism 312
 Endothelium, corneal, intercellular spacing 311
 Erythrocyte nuclei, chick, protein components 244
Escherichia coli, ATP content after U.V. irradiation 451
 —, growth and enzyme synthesis, inhibitory effect of α -methyl-glucoside 157
 —, lipid and polysaccharide contents, relation 158
 —, ornithine and proline synthesis 584
 Fatty acids, biosynthesis from (carboxy-¹⁴C) acetate, soluble enzyme system from rat mammary gland homogenates 587
 — (short-chain, even series), acetoacetate formation from —, theoretical interpretation 37
 Fibre models, influence of MB-factor on contraction 160
 —, rate of shortening and efficiency of splitting of ATP during contraction 138
 Fibrin, polysaccharide 313
 Fibrinogen, native and partially polymerized, configuration 329
 —, polysaccharide 313
 Fluoroacetate, poisoned rats, cerebral amino acids 548
 Folic acid, deficient chick, impaired oviduct response to oestrogen, effect of DNA 162
 Formate, decomposition, role of C₂-derivatives 306
 Freeze drying method, breaking of tobacco mosaic virus 337
 Fructose-1-phosphate, metabolism, liver 427
 Fumarase, intracellular distribution, yeast 596
 Glycerol, protective action against haemolysis by freezing and thawing, mechanism 28
 Glycocyamine and corresponding phosphagen, presence in marine worms 593
 Growth hormone, insulin-like effect 443
 Guanidine, derivatives, presence and metabolism, marine invertebrates 493, 593
Halicystis osterhoutii, cell wall, constitution, submicroscopic structure, degree of crystallinity 344
 Haemolysis, freezing and thawing, protective action of glycerol, mechanism 28
 Hexoses, trioses and their phosphate esters, analytical methods 416
 Historadiography, accurate reference system 464
 Hyaluronidase, testicular, characteristics 524
 Hydrogen, transfer in model dehydrogenase systems, mechanism 597
 Hydrogen ion, gradient across rat intestine *in vitro* 448
 Hypophysis, posterior lobe, ox, purification of oxytocine 252
 Infrared absorption, oriented sperm heads 412
 Insulin-like effect of growth hormone 443
 Invertebrates, marine —, presence and me-

- tabolism of guanidine derivatives 403, 593
 Kidney, veal-, presence of two different DNases. 590
 Lactate, gradient across rat intestine *in vitro* 448
 Lipid, — and polysaccharide contents of *E. coli*, relation 158
 Liver, cell, different parts, metabolism of RNA and phospholipin, effect of level of energy intake 566
 —, choline-deficient rats, formation of ceroid, factors 445, 446
 —, metabolism of fructose-1-phosphate . 427
 —, rat, incorporation of ^{15}N , ^{35}S and ^{14}C into proteins and nucleic acids. . . . 559
 Macromolecules, electron microscopy, study with aerosol technique 507
 Mammary gland, rat, soluble enzyme system from —, biosynthesis of fatty acids from (carboxy- ^{14}C) acetate 587
 Mano- and volumetric methods, differential 7
 Marsh-Bendall-factor, influence on contraction of fibre models. 160
 α -Methyl-glucoside, growth and enzyme synthesis of *E. coli*, inhibitory effect . 157
 Mitochondria, osmotic behaviour 353
 —, supravital staining, phenosafranin dyes 480
 Molybdo-flavoprotein, xanthine oxidase . 599
 Multi-membrane electrodecentration, isolation and purification of proteins and viruses 315
 Muscle, protein, new low molecular weight substance, isolation 595
 Mycolenic acid and derivatives, *C. diphtheriae*, synthesis. 602
 Mycolic acid, unsaturated, *C. diphtheriae*, chemical constitution. 163
 Myosin, actin, ATP, interaction. 236
 —, molecule, fragmentation 368
 Nerve cells, individual, quantitative determination of RNA 300
 Nuclease, desoxyribo-, presence of two different kinds, veal kidney 590
 —, ribo-, active groups 517
 Nucleic acid, apparent re-orientation of protein monolayers by — 439
 —, desoxyribo-, complexes of rare earths 553
 —, desoxyribo-, developing chick embryo, establishment of multiplicative growth rate on basis of — 497
 —, desoxyribo-, effect on impaired oviduct response to oestrogen, folic acid deficient chick. 162
 —, incorporation of adenine, C57 mice. . 487
 —, incorporation of ^{15}N , ^{35}S and ^{14}C , rat liver 559
 —, ribo-, incorporation of ^{32}P into nucleotides of —, pigeon pancreas slices . 591
 —, ribo-, incorporation of 2-thiouracil- ^{35}S , tobacco mosaic virus 438
 —, ribo-, individual nerve cells, quantitative determination 300
 —, ribo-, metabolism, different parts of liver cell, effect of level of energy intake 566
 Nucleoprotein, desoxyribo-, sea urchin sperm, properties 59
 Nucleotides, incorporation of adenine, C57 mice 487
 Ocytocine, purification from ox hypophyses 252
 —, see also Oxytocin
 Oestriol, isolation from pregnancy urine with rubber columns 301
 Oestrogen, impaired oviduct response to —, effect of DNA, folic acid deficient chick. 162
 Ornithine, synthesis, *E. coli* 584
 Ovalbumin, C-terminal residues. 586
 Oviduct, impaired, response to oestrogen, effect of DNA, folic acid deficient chick 162
 Ovomucoid, C-terminal residues 586
 Oxytocin, amino acid sequence 449
 —, see also Ocytocine
 Pancreas, pigeon, incorporation of ^{32}P into nucleotides of RNA 591
Penicillium brevi-compactum, production of ternary substances, chromatographic analysis 114, 119
 Phenosafranin dyes, supravital staining of mitochondria 480
 D(—)3-Phosphoglyceric acid, preparation, analytical data 588
 Phospholipin, metabolism, different parts of liver cell, effect of level of energy intake 566
 Phototaxis, *Rhodospirillum rubrum*, action spectrum 17
 Polarization optical method, ultrastructure of vitrosin fibres, analysis. 326
 Poly-amino acids, shapes of molecules at interfaces. 165
 Polysaccharide, — and lipid contents of *E. coli*, relation 158
 —, sorption of water vapour 471
 Proline, synthesis, *E. coli* 584
 Propionate, pathway of oxidation. 575
 Protein, components of chicken erythrocyte nuclei 244
 —, incorporation of ^{15}N , ^{35}S and ^{14}C , rat liver 559
 —, isolation and purification, multi-membrane electrodecentration 315
 —, isolation from rabbit spleen, bacteriolytic action 95
 —, milk, biosynthesis, fasting goat . . . 304
 —, monolayers, apparent re-orientation by nucleic acid 439
 —, muscle, new low molecular weight substance, isolation 595
 —, non-structural, normal and atrophic muscle, electrophoresis 258
 —, sedimentation constant, determination with Spinco preparative ultracentrifuge 199
 —, shapes of molecules at interfaces. . . 165
Proteus vulgaris, oxidation of cysteinesulfinic and cysteic acids. 270
 Pseudo-cholinesterase, active surface, possible role in conduction 440

- Pseudomonas aeruginosa*, deviation from conventional tricarboxylic acid cycle 594
- Pyridoxal, cellular accumulation of amino acids, intensification by — 303
- Rana hexadactyla*, xanthine oxidase, distribution in organs 585
- Rare earths, complexes with DNA 553
- Rhodospirillum rubrum*, phototaxis, action spectrum 17
- Ribonuclease, see Nuclease
- Ribonucleic acid, see Nucleic acid
- Saccharomyces cerevisiae*, growth and fermentation, effects of ultrasonic radiation 122
- Sperm, mammalian, chemical studies 79
- , pseudo-molecular behaviour 412
- , sea urchin, desoxyribonucleoprotein, properties 59
- Sperm heads, oriented, preparation, X-ray diffraction and infrared absorption studies 412
- Spinco preparative ultracentrifuge, proteins and viruses, determination of sedimentation constants 199
- Spleen, rabbit, isolation of proteins with bacteriolytic action 95
- Taurocyamine and corresponding phosphagen, presence in marine worms 593
- Ternary substances, production by *Penicillium brevis-compactum*, chromatographic analysis 114, 119
- Tissue culture, arginase, antimitotic agent 396
- Tobacco mosaic virus, breaking by new freeze drying method 337
- , incorporation of 2-thiouracil-³⁵S into RNA 438
- Tricarboxylic acid cycle, deviation, *P. aeruginosa* 594
- 3:5:3'-Triiodothyronine, biliary excretion, a glycuconjugate 543
- , constituent of thyroglobulin, biosynthesis 220
- , preparation, analytical properties 215
- Trioses, hexoses and their phosphate esters, analytical methods 416
- Trypsin, autolysis, influence of calcium and manganese ions, mechanism 535
- Trypsinogen, peptide split during autocatalytic activation, identification 442
- Tumour, rats bearing —, creatine synthesis 69
- Turnover number, cholinesterase, ox red cell, methods of estimation 52
- Ultrasonic radiation, effects on growth and fermentation of yeast 122
- U.V. irradiation, *E. coli*, ATP content after — 451
- Vicia faba*, movement of phosphate in root system 453
- Virus, isolation and purification, membrane electrodecantation 315
- , sedimentation constant, determination with Spinco preparative ultracentrifuge 199
- , tobacco mosaic —, breaking by new freeze drying method 337
- , —, incorporation of 2-thiouracil-³⁵S into RNA 438
- Vitrosin fibres, ultrastructure, analysis, polarization optical method 326
- Volu- and manometric methods, differential 7
- Xanthine oxidase, distribution in organs of frog 585
- , molybdo-flavoprotein 599
- X-rays, cell wall of *Halicystis osterhoutii* 344
- , collagen, periodic structure 1
- , low-angle scatter, bone tissue 178
- , oriented sperm heads, diffraction studies 412
- Yeast, cell wall, sorption of water vapour 471
- , high molecular compounds 90
- , intracellular distribution of fumarase and aconitase 596
- , *S. cerevisiae*, growth and fermentation, effects of ultrasonic radiation 122
