SUBJECT INDEX

- Acetoacetic acid, oxidation product of citramalic and β -hydroxyglutaric acids, possible significance of citramalic acid in plant metabolism 44
Acetobacter suboxydans, oxidations 108
 Acetoin, restoration of formation impaired by thiamine deficiency, pigeon muscle homogenates 291
 Actin, C-terminal groups 533
 Actomyosin-ATPase, activity change during insect metamorphosis 284
 Adenosine phosphates, interaction with creatine 587
 Adenosine triphosphate, effect on phosphate uptake, rabbit erythrocytes 335
 —, energy source of cell movements . . . 182
 —, enzymic colour formation in potato, inhibition by — 156
 Adenylpyrophosphatase, distribution in fragmented bull spermatozoa 312
 African horsesickness virus, see Virus
 Aldolase, muscle —, formation of pentose phosphates 495
 —, —, substrate specificity 488
 Amino acids, composition of lytic protein II, rabbit spleen 219
 —, enzymic degradation of cysteine sulfinic acid, use of ion exchangers for separation 543
 —, N- and C-terminal, lytic protein II of rabbit spleen 228
 —, salmin of *Oncorhynchus*, sequence of imino extremity 551
 —, sequences in lysozyme 581
 —, uptake by intestine 80
 Amoeba, fragments, with nucleus and de-nucleated, enzymic composition . . . 449
 Asparagine, synthesis from glutamic acid and glucose, inhibition by neopyrithiamine 579
 Aspartic acid, role in biosynthesis of purines 569
 Aspartic acid-4-¹⁴C, rat brain and kidney homogenates, metabolism 390
Azotobacter vinelandii, fixation of nitrogen, inhibition by hydroxylamine 85
 —, —, inhibition by hyponitrous acid . 507
Bacillus cereus, acid hydrolysis of spores, correlation of chemical and cytological findings 346
Bacillus megaterium, cell wall, electron microscopy 455
 Bacteria, attachment of bacteriophage T₁, thermodynamic and kinetic studies . 163
 —, simple and inexpensive device for counting colonies 295
 Bacteriophage T₁, attachment to bacteria, thermodynamic and kinetic studies . 163
 Blastocysts, rabbit, content of sodium, potassium and chloride 589
 Brain, normal rat, presence of cysteine sulfinic acid 297
 —, protein-bound components 580
 —, rat, homogenate, metabolism of labeled glutamic and aspartic acids . . 390
 —, —, phosphatase, factors affecting activity in suspensions and in histochemical methods 380
 Calcium, activation of thromboplastin . . 152
 Catalase, action of peroxidases with enzymically generated peroxide in presence of — 117
 —, rectification of article 162
 —, yeast, formation induced by aeration 397
 Cell models, use for analysis of cell movements 584
 Cellulose, acid degradation, shape of particles 283
 Choline acetylase, sulphydryl groups . . . 442
 Chromatography, paper —, analysis of guanidine and derivatives 71
 —, purification of testicular hyaluronidase 567
 —, solutions of RNase, study of homogeneity 267
 Chymotrypsin, new, formed by rapid activation of ox chymotrypsinogen, crystallization 145
 Chymotrypsinogen, ox, rapid activation, forming and crystallization of new chymotrypsin 145
 L-Citramalic acid, isolation from peel of apple fruit 36
 —, oxidation to acetoacetic acid, possible significance in plant metabolism . . . 44
