SUBJECT INDEX

- Accelerator globulin, human, activation by
 thrombin, mechanism. 288
Acetabularia mediterranea, nucleus and
 cytoplasm, biochemical interactions,
 studies 544
 Acetate, rat liver slices, synthesis via
 Krebs' cycle in utilization of — . . 87
 Acetylcholine, pancreas and brain cortex
 slices, turnover of phosphoryl units
 in phospholipids, effects of — . . 102
 Acetylcholinesterase, alkylphosphate-in-
 hibited, a powerful reactivator . . . 168
 Adenine, 2-methyl —, non-utilization
 for nucleic acid synthesis, rat . . . 280
 Adenosine diphosphate, avian erythro-
 myeloblastic leukemia virus, competi-
 tive inhibition of ATPase activity . . 43
 Adenosine triphosphatase, activity of avian
 erythromyeloblastic leukemia virus,
 kinetic and inhibition studies . . 36, 43
 Adenosine triphosphate, amino acid de-
 pendent exchange between PP and
 —, microbial extracts. 592
 —, complexing with molybdate . . . 601
 —, rate of dephosphorylation and short-
 ening of glycerol-water washed
 muscle fibres. 83
 Adipose tissue, *in vitro* synthesis of fatty
 acids and glycogen 504
 —, rat, studies on lipoprotein lipase . . 143
 Adrenocorticotrophic hormone, polyphlo-
 retin phosphate, interaction 540
 Albumin, bovine plasma, dodecyltrime-
 thylammoniumbromide, interaction 136

- Ali-esterase, turnover number with diisopropylfluorophosphate 228
 Amino acid hydroxamides, quantitative determination 566
 Amino acids, labelled, incorporation into cytoplasmic particles of rat muscle 573
 —, paper chromatography, identical behaviour of some peptides and 435
 —, posterior pituitary and hypothalamus tissues 488
 —, PP-ATP exchange in microbial extracts, dependence on 592
 2-Aminoethanesulphinic acid, see Hypotaurine
 S-Aminoethylcysteine, *in vivo* metabolism by rat, preliminary report 122
Amoeba proteus nucleus and cytoplasm, biochemical interactions, studies 247
 Amphibian embryo, incorporation of labelled purine bases 511
 Amylase, synthesis in solubilized system 439
 Antibiotics, inhibition of growth of protozoan, temperature dependence 452
 Arabokinase, induced biosynthesis, protoplasts of *Bacillus subtilis* 353
Ardis c glatignyi Le Guil, polyhedral virus from larva, structure 202
 Arginine, inhibition of glutamate utilization 535
 —, new type of enzymic degradation 589
Ascaris lumbricoides, dissociation of succinoxidase system 305
 Ascorbic acid, effect on biosynthesis of corticosteroids, activation by U.V. light 312
Azotobacter vinelandii, uptake of combined nitrogen, some observations 363
Bacillus megaterium, bacteriophage formation in protoplasts, effects of RNase and DNase 531
 —, protoplast, growth and division 458
Bacillus subtilis, protoplasts, induced synthesis of arabokinase 353
 Bacteria, growing —, utilization of acid soluble phosphorus 298
 —, growth, role of carbon dioxide 269
 —, note on helical structure 140
 Bacterial transformations, kinetic studies 467
 Bacteriochlorophyll, study 309
 Bacteriophage, *Bacillus megaterium*, formation in protoplast, effects of RNase and DNase 531
 —, T₂, development inside host cell, electron microscopy 1
 Bi-ionic membrane potentials, experimental studies 341
 Bone, mineral substance, exchangeable calcium, study with ⁴⁵Ca 394
 Brain cortex, slices, turnover of phosphoryl units in phospholipids, effects of acetylcholine 102
 Buffer, a — for spectrophotometric enzyme studies 318
 Carbon dioxide, role in bacterial growth 260
 Carbon dioxide, *Thiobacillus thioparus*, incorporation by extracts 157
 Catalase, *in vitro* inhibiting activity of tumour extracts 393
 Cataract, galactose —, galactose-1-phosphate in 319
 Cellulose I, crystal structure 166
 Cetylpyridinium chloride, complexes with biological polyanions, solubility in salt solutions 428
 Chlorobium chlorophyll, study 390
 Chlorophyll, bacterio- and Chlorobium —, study 309
 p-Chloromercuribenzoate, inhibition of muscle phosphorylase 159
 Chloroplast, *Spirogyra*, photosynthetic activity of fragments 286
 Cholesterol, acid precursors, separation by column chromatography 516
 Cholinesterase, central nervous system, content and functional activity 150
 —, pseudo and true —, turnover number with diisopropylfluorophosphate 228
 Chromatography, column —, acid precursors of cholesterol, separation 516
 —, insulin, use of sulphonic acid ion-exchange resin 290
 —, paper —, identical behaviour of amino acids and some peptides 435
 —, —, nucleic acid degradation products, new solvent systems 575
 —, transforming principle of pneumococcus, fractionation 132
 Chymotrypsinogen, conversion into chymotrypsin- α , some preliminary observations 571
 —, structural changes in activation 162
Clostridium butylicum, exchange of labelled formate with carboxyl group of pyruvate 504
Clostridium histolyticum, proteolytic enzymes, influence of complexon III and Ca on stability 71
 Cobra venom, see Venom
 Coenzyme A, ³²P- and ³⁵S-labeled, preparation 320
 Colicin, production by — sensitive cells 131
 Complexon III, *Clostridium histolyticum*, influence on stability of proteolytic enzymes 71
 Corticosteroids, biosynthesis, effect of ascorbic acid, activation by U.V. light 312
 Corticotropin A₁, oxidation and reduction 599
 Cysteine, S-aminoethyl —, *in vivo* metabolism by rat, preliminary report 122
 — and cystine, estimation by potentiometric titration with mercuric chloride 154
 Cystine, proteins, —, content, molecular weight and U.V. light sensitivity, relations 601
 Cytidine-2':3'-phosphate, hydrolysis by RNase, specificity 138

- Cytochrome *c*, pigeon breast succinoxidase activity, dependence on concentration of — 63
- Cytochrome *c*₃, a bifunctional haemato-haematin 427
- Desoxyribonucleic acid, see Nucleic acid
- Diffusion, skew gradient curves, axial ratios of rod-shaped particles, relation 567
- Digitoxin, DNP uncoupling of oxidative phosphorylation, potentiating effect of — 437
- 3:3'-Diiodothyronine and 3:3':5'-triiodothyronine, new hormonal constituents of thyroid gland 149
- Diisopropylfluorophosphate, inhibition of immune haemolysis 283
- , turnover number of some esterases with — 228
- 2:4-Dinitrophenol, uncoupling of oxidative phosphorylation, potentiating effect of digitoxin and quinidine 437
- Diphosphopyridine nucleotide, specific nucleosidase, occurrence in erythrocytes 296
- Dodecyltrimethylammoniumbromide, bovine plasma albumin, interaction 136
- Electron microscopy, insect muscle, observations on structure 177
- , phage T₂ development inside host cell 1
- , wool and other fibres, surface structure, studies 323
- Electrophoresis, human haemoglobin, heterogeneity at low ionic strengths and higher temperatures 241
- , paper —, localization of isomaltose 321
- Enolase, reaction with different activating metal ions, temperature dependence 285
- Erythrocytes, DPN- and TPN-specific nucleosidases, occurrence 296
- , human, phosphorus metabolism, effect of insulin 301
- , metabolic potential of ghosts 443
- , preservation, role of nucleoside phosphorylase 585
- Erythromyeloblastosis, avian, ATPase activity of virus, kinetic and inhibition studies 36, 43
- Escherichia coli*, metabolism of pentoses, observations 523
- , phage development inside cell, electron microscopy 1
- , sulphonamide action, reversal by vitamin B₁₂ 567
- Fatty acids, adipose tissue, synthesis *in vitro* 504
- , synthesis by soluble enzyme preparations, rabbit mammary gland 294
- Fibrinogen, clotting, liberation of peptide material 495
- Fluorodinitrobenzene, action on ichthyalepidin 137
- Formic acid, labelled, exchange with carboxyl group of pyruvate, *Clostridium butylicus* and *Micrococcus lactilyticus* 594
- Fumaric acid, role in steroid enzymic 11 β -hydroxylation 433
- Galactose-1-phosphate, enzymic incorporation in mammalian tissue, role of galacto-waldenase 444
- , role in galactose cataract 310
- Galacto-waldenase, see Galactose-1-phosphate
- Gliadin, water soluble dinitrophenyl —, preparation 593
- Glutamic acid, utilization, inhibition by arginine 535
- α -Glycerophosphate, palmityl CoA, estimation of enzymic condensation 411
- Glycinamide ribotide, biosynthesis, involvement of 5-phosphoribosylamine 148
- Glycogen, adipose tissue, synthesis *in vitro* 504
- Guanine, fluorescent derivative, formation during hydrolysis of DNA 317
- Haemato-haematin, cytochrome *c*₃ a bifunctional — 427
- Haemoglobin, five different human —, N-terminal residues 588
- , foetal —, probable occurrence in blood of normal human adults 576
- , human, electrophoretic heterogeneity at low ionic strengths and higher temperatures 241
- Heart, rat, studies on lipoprotein lipase 143
- Homocysteine, biosynthesis of methionine from methylmethionine sulfonium salt and — 134
- , detection in biological systems 236
- Hyaluronic acid, birefringent fibres 587
- Hydrogenase, soluble —, assay 431
- Hydrouracil, β -ureidopropionic acid, enzymic interconversion 449
- dl*- β -Hydroxybutyrate, tumour mitochondria, factors influencing oxidation 281
- D(-)- β -Hydroxybutyryl CoA dehydrogenase 314
- Hydroxyproline, sensitive ninhydrin reaction on paper 453
- Hypertensin, heterogeneity of preparations 579
- Hypotaurine, new synthesis 358
- Hypothalamus, amino acids and peptides 488
- Ichthyalepidin, action of fluorodinitrobenzene 137
- Immune haemolysis, inhibition by diisopropylfluorophosphate 283
- Infra-red spectroscopy, pyrimidine nucleotides in H₂O and D₂O solution 13
- Inositol, lipids containing —, further study 389
- Insulin, chromatography, use of sulphonic acid ion-exchange resin 290
- , pH-dependence of deuterium exchange 308
- , phosphorus metabolism in human erythrocytes, effect 301

- Insulin, structure, investigation by model building techniques 183
- Intestinal mucosa, rat, *in vitro* synthesis of purines 441
- Iodide, action on oxidative phosphorylation 407
- Kallikrein, pancreatic, a mixture of proteolytic enzymes 440
- α -Ketobutyrate, oxidation system, cell-free extracts of *Streptococcus faecalis*, lipoic acid activation 297
- Δ^5 -3-Ketosteroids, enzymic isomerization 300
- Kidney, rat, dissociation of succinoxidase system 305
- Krebs' cycle, rat liver slices, synthesis via 87
 in utilization of acetate 87
- Lipid, inositol-containing further study 389
- Lipoic acid, cell-free extracts of *Streptococcus faecalis*, activation of α -ketobutyrate oxidation system 297
- Lipoprotein lipase, rat heart and adipose tissue, studies 143
- Liver, chicken, xanthine dehydrogenase 221
 —, rat, homogenate, metabolism of pregnenolone 279
 —, —, slices, synthesis via Krebs' cycle in utilization of acetate 87
- iso*Maltose, enzymic hydrolysis, localization by paper electrophoresis 321
- Mammary gland, rabbit, fatty acid synthesis by soluble enzyme preparations 294
 —, uridyl transferase 152
- Menadione derivatives, cofactors of nitrate reductase system, coliform organism 583
- 6-Mercaptopurine desoxyriboside, enzymic synthesis 447
- Methionine, biosynthesis from homocysteine and methylmethionine sulfonium salt 134
 —, evidence for new precursor, *Neurospora crassa* 454
- O-Methylisouronium sulphate, convenient new guanidinating reagent 448
- Micrococcus lactilyticus*, exchange of labeled formate with carboxyl group of pyruvate 594
- Mitochondria, action of thyroxine 597
 —, enzyme fraction from extracts, oxidative phosphorylation 159
 —, plant, sulphite oxidation, observations 111
 —, potassium requirements, further studies 482
 —, rat liver, *in vitro* effect of RNase on latent acid phosphatase 578
 —, tumour, factors influencing *dl*- β -hydroxybutyrate oxidation 281
- Molybdc acid, complexing with ATP 601
- Muscle, insect, observations on structure, electron microscopy 177
 —, rat, cytoplasmic particles, incorporation of amino acids 573
- Myosin, vitamin E-deficient rabbits, early changes of 451
- Neurospora crassa*, new precursor of methionine, evidence 454
- Nicotine, biosynthesis of pyrrolidine ring 141
- Ninhydrin, sensitive reaction on paper with proline and hydroxyproline 453
- Nitrate reductase, coliform organism, menadione derivatives and ferrous iron as cofactors 583
- Nuclease, ribo action on neoplastic growth 410
 —, —, activity, effect of SH reagents 316
 —, —, and desoxyribo bacteriophage formation in protoplasts of *Bacillus megaterium*, effects 531
 —, —, deuterium exchange between water and 306
 —, —, hydrolysis of cytidine-2':3'-phosphate, specificity 138
 —, —, latent acid phosphatase of rat liver mitochondria, *in vitro* effect of 578
- Nucleic acid, degradation products, new solvent systems for paper chromatography 575
 —, desoxyribo-, hydrolysis, formation of fluorescent derivative of guanine 317
 —, —, sedimentation in three component systems 28
 —, synthesis by rat, non-utilization of 2-methyladenine and 4:6-diamino-5-formamidopyrimidine 280
- Nucleosidases, DPN- and TPN-specific, occurrence in erythrocytes 296
- Nucleoside phosphorylase, role in erythrocyte preservation 585
- 5-Nucleotidase, cobra venom, effect of zinc, interference of other nucleotides 456
- Nucleotide, di- and triphosphopyridine specific nucleosidases, occurrence in erythrocytes 296
 —, triphosphopyridine role in steroid enzymic 11 β -hydroxylation 433
- Nucleotides, 32 P-labeled mitochondrial production 292
 —, pyrimidine solutions in H₂O and D₂O, infra-red spectroscopy 13
- Nucleus, *Amoeba proteus* and *Acetabularia mediterranea*, biochemical interactions between cytoplasm and studies 247, 544
- Ovalbumin, denaturation, liberation of acid and base binding groups 450
- Oxidative N-dealkylation 564
- Oxidative phosphorylation, action of iodide 407
 —, action of thyroxine 597
 —, DNP uncoupling, potentiating effect of digitoxin and quinidine 437
 —, enzyme fraction from mitochondrial extracts 159
- Palmityl CoA, α -glycerophosphate, estimation of enzymic condensation 411

- Pancreas, dog, zymogen granules, isolation and properties 379
- , kallikrein, a mixture of proteolytic enzymes 440
- , slices, turnover of phosphoryl units in phospholipids, effects of acetylcholine 102
- Pentose phosphate, phosphoglycerate formation from —, extracts of *Thiobacillus denitrificans* 581
- Pentoses, metabolism by *Escherichia coli*, observations 523
- Pepsin, ultraviolet inactivation 216
- Peptides, paper chromatography, identical behaviour of amino acids and some — 435
- , posterior pituitary and hypothalamus tissues 488
- Peroxydases, yeast, induction by oxygen 58
- Phosphatase, latent acid —, rat liver mitochondria, *in vitro* effect of RNase 578
- Phosphoarginine, barium —, improved method for isolation 281
- Phosphodiesterase, rattlesnake venom, studies 370
- Phosphoglyceric acid, formation from pentose phosphate, extracts of *Thiobacillus denitrificans* 581
- Phospholipids, pancreas and brain cortex slices, turnover of phosphoryl units, effects of acetylcholine 102
- 5-Phosphoribosylamine, involvement in biosynthesis of glycylamide ribotide 148
- Phosphorylase, muscle, inhibition by *p*-chloromercuribenzoate 156
- Photosynthesis, energy transformation, measurement with Grossflächen-Bolometer 163
- , free radical intermediates 209
- , *Spirogyra*, activity of chloroplast fragments 286
- Pituitary gland, posterior, amino acids and peptides 488
- Pneumococcus, transforming principle, chromatographic fractionation 132
- Poliomyelitis virus, See Virus
- Polyphlorethin phosphate, ACTH, interaction 540
- Pregnenolone, metabolism, rat liver homogenate 279
- Proline, sensitive ninhydrin reaction on paper 453
- Propionic acid, oxidation by marine bacterium 570
- Protein, cystine content, molecular weight and U.V. light sensitivity, relations —, α -helix configuration, possible modifications 194
- Proteolytic enzymes, *Clostridium histolyticum*, influence of complexon III and Ca on stability 71
- , pancreatic kallikrein, a mixture of — 440
- Protoplast, *Bacillus megaterium*, bacteriophage formation, effects of RNase and DNase 531
- Protoplast, *Bacillus megaterium*, growth and division 458
- , *Bacillus subtilis*, induced biosynthesis of arabokinasase 353
- Pseudomonas*, cell extracts, oxidative degradation of uric acid 160
- Purines, *in vitro* synthesis, rat intestinal mucosa 441
- , labelled, incorporation by amphibian embryo 511
- Pyrimidine, 4:6-diamino-5-formamido—, non-utilization for nucleic acid synthesis, rat 280
- Pyrimidine nucleotides, see Nucleotides
- Pyrrolidine, — ring of nicotine, biosynthesis 141
- Pyruvic acid, exchange of labelled formate with carboxyl group of —, *Clostridium butylicus* and *Micrococcus lactilyticus* 594
- Quinidine, DNP uncoupling of oxidative phosphorylation, potentiating effect of — 437
- Quinones, biologically occurring, note on free radical formation 165
- Rattlesnake venom, see Venom
- Ribonuclease, see Nuclease
- Riboside, 6-mercaptopurine desoxy —, enzymic synthesis 447
- Ribotide, glycylamide —, biosynthesis, involvement of 5-phosphoribosylamine 148
- Salmine, binding of sulphate and phosphate ions 461
- Spirogyra*, chloroplast fragments, photosynthetic activity 286
- Starch, granules, surface structure 146
- Streptococcus faecalis*, cell-free extracts, lipoic acid activation of α -ketobutyrate oxidation system 297
- Succinoxidase, *Ascaris lumbricoides* and rat kidney, dissociation of system 305
- , pigeon breast muscle, dependence of activity on cytochrome *c* concentration 63
- Sulphite, oxidation by plant mitochondrial system, observations 111
- Sulphonamide, action in *Escherichia coli*, reversal by vitamin B₁₂ 567
- Thiamine, influence on nitrogen metabolism 153
- Thiobacillus denitrificans*, extracts, formation of phosphoglycerate from pentose phosphate 581
- Thiobacillus thioparus*, carbon dioxide incorporation by extracts 157
- Thrombin, activation of human accelerator globulin, mechanism 288
- Trypsinogen, N-terminal sequence, removal during activation 49
- Thyroid gland, 3:3'-diiodothyronine and 3:3':5'-triiodothyronine as new hormonal constituents 149

- Thyroxine, action on mitochondria and oxidative phosphorylation 597
- Tobacco mosaic virus, see Virus
- Triphosphopyridine nucleotide, role in steroid enzymic 11β -hydroxylation . 433
- , specific nucleosidase, occurrence in erythrocytes 296
- Tamour, *in vitro* anticatalase activity of extracts 393
- , Landschütz ascites —, chemical aspects of normal growth 416
- , mitochondria, factors influencing *dl*- β -hydroxybutyrate oxidation . . 281
- β -Ureidopropionic acid, hydrouracil, enzymic interconversion 449
- Uric acid, carbon labelled, determination of isotope distribution 519
- , oxidative degradation, cell extracts of *Pseudomonas* 160
- Uridyl transferase, mammary gland . . . 152
- Urocanic acid, "sun-screening" effect . . 589
- Venom, cobra, effect of zinc on 5-nucleotidase, interference of other nucleotides 456
- , rattlesnake, studies of phosphodiesterase 370
- Virus, avian erythromyeloblastic leukaemia, ATPase activity, kinetic and inhibition studies 36, 43
- , neutralization by specific antiserum, effect of salt concentration and pH . 429
- , note on helical structure 140
- , poliomyelitis —, dissociation . . . 446
- , polyhedral — from larva of *Ardices glatignyi* Le Guil, structure 202
- , tobacco mosaic —, Schramm's re-polymerised A-protein structural resemblance 313
- Vitamin B₁₂, sulphonamide action in *Escherichia coli*, reversal by 567
- Vitamin E, deficient rabbits, early changes of myosin 451
- Wool, surface structure, electron microscopy 323
- Xanthine dehydrogenase, chicken liver . . 221
- Yeast, peroxidases induced by oxygen . . 58
- Zymogen granules, dog pancreas, isolation and properties 379
