SUBJECT INDEX

- Acetylcholine, effect in electroplax of elec-
 tric eel 323
 3-Acetylpyridine, inhibition of nicotin-
 amidase activity, cell-free extracts of
 Mycobacterium phlei 576
 Aconitase, activation, role of reducing agent 310
 Actin, metabolism in rabbit 228
 "Active sulphate" intermediate, study 428
 Actomyosin, nucleoside triphosphate,
 interaction 355
 Adenosine-5'-phosphate, specific incorpo-
 ration into RNA, rat liver homo-
 genates 445
 Adenosine triphosphate, bicarbonate-de-
 pendent enzymic phosphorylation of
 fluoride by — 591
 —, crystallization of sodium salt 23
 —, mechanism of cleavage 92
 —, mitochondria, non-oxidative ex-
 change between inorganic P and
 —, studies 85
 Adrenal gland, precursors of epinephrine
 and norepinephrine *in vivo* 48
 Adrenochrome, carbohydrate metabolism
 of rat diaphragm, effect of — 77
Aerobacter aerogenes, electrophoretic mobil-
 ity, absolute value 392
 Aldolase, from muscle, crystalline, molec-
 ular weight 109
 Amino acids, β -hydroxy- α —, alkaline
 decomposition 579
 —, incorporation into protein, effects of
 monovalent cations 565
 Amylo-1,6-glucosidase, studies 53
 Antibody-antigen reactions, mechanism 158
 6-Azathymide, desoxyriboside of —,
 bone marrow and neoplastic cells,
in vitro effect on biosynthesis of DNA 209
Azotobacter vinelandii, polynucleotide phos-
 phorylase of — 269
 —, purification and properties of cyto-
 chromes c_4 and c_6 436
 —, RNA of — 585
Bacillus megaterium, induced β -galactosi-
 dase formation, stimulation by RNA 405
 Bacteria, effect of acidity on growth 43

- Bone marrow, biosynthesis of DNA, *in vitro* effect of desoxyriboside of 6-azathymide 209
- Canna*, leaves, metabolism of galactose 17
- Carbohydrate, metabolism, rat diaphragm, effect of noradrenaline and adrenochrome 77
- Carboxypeptidase, action on different human haemoglobins 400
- , activity of RNase after digestion with — 378
- Chloroplasts, broken, phosphorylation and carbon dioxide fixation 462
- , isolated, photosynthesis, general concept, comparison of three photochemical reactions 449
- Choline, estimation, observations on periodide method 432
- , spectrophotometric microdetermination 554
- Chromatography, aluminum oxide —, heterogeneity of haemoglobin, observations 570
- , corticosteroids, preparation of paper for quantitative — 396
- , paper —, calf pancreas slices, isolation of ¹⁴C-labeled insulin 251
- , —, interaction of substances during process 393
- , —, tool for study of histidine metabolism in skin 567
- , quantitative paper —, elution apparatus 417
- Chymotrypsinogen, activation by subtilisin 408
- , existence of degraded forms still activatable 404
- α -Chymotrypsinogen, crystal forms and molecular weight, X-ray study 562
- Cord factor, *Mycobacterium tuberculosis*, chemical structure 299
- Corticosteroids, quantitative chromatography, preparation of paper 396
- Cyanocobalamin, desdimethyl —, assay, comparison of microbiological potencies of two different growth factors 397
- Cytochromes c_4 and c_5 , *Azotobacter vinelandii*, purification and properties 436
- Desdimethylcyanocobalamin, see Cobalamin
- Desoxyribonucleic acid, see Nucleic acid
- Desoxyribonucleoprotein, see Protein
- Diaphragm, rat, carbohydrate metabolism, effect of noradrenaline and adrenochrome 77
- 2,4-Dinitrophenol, metabolism of tobacco leaf disks, some effects of — 100
- , nucleoside triphosphatase activities of L-myoisin, effects 440
- 1,3-Diphosphoglyceric acid, mechanism of cleavage 92
- 2,3-Diphosphoglyceric acid, elective splitting in erythrocytes 594
- Diphosphopyridine nucleotide, polarographic and coulometric study 547
- Diisopropylfluorophosphate, reaction with trypsin 572
- Dithionite, reduction of pyridine nucleotide, mechanism 177
- Electro-osmosis, on glass fiber filter paper 416
- Electrophoresis, continuous filter-paper —, separation of strains of TMV 556
- , mobility of *Aerobacter aerogenes*, absolute value 392
- Electroplax, electric eel, effect of acetylcholine 323
- Embryo, sea urchin, action of oestradiol on DNP as cause of its inhibitory effect upon mitosis 543
- Enterokinase, action on trypsinogen 433
- Enzymes, inhibition by lipoproteins 522
- Enzyme systems, living objects, spectrophotometrical investigations 469
- Epinephrine, adrenal —, precursors *in vivo* 48
- Erythrocytes, elective splitting of 2,3-diphosphoglyceric acid 594
- , haemolysis, vitamin E deficient chickens 553
- Escherichia coli*, metaphosphate synthesis by enzyme from — 215
- Esterases, chemical structure of reactive group 402
- Firefly, crystalline luciferase 170
- Flavoprotein, — catalysis, new evidence for occurrence of free radicals 588
- Fluoride, bicarbonate-dependent enzymic phosphorylation by ATP 591
- 3-Fluoropyruvate, inhibition of oxidative mechanism by — 583
- Galactose, metabolism, *Canna* leaves and wheat seedlings 17
- Galactosemia, a congenital defect in a nucleotide transferase 262
- β -Galactosidase, induced formation in *Bacillus megaterium*, stimulation by RNA 405
- Gelatin, carboxyl groups, specific esterification with methanol and thionyl chloride 426
- Glucagon, synthesis of hepatic glycogen, influence of — 190
- Glucosamine phosphates, enzymes acting on — 33
- Glucose, oxidative pathways, eggs of sea urchin 27
- Glutathione, metabolism, normal and induced states of growth 345
- D-Glyceraldehyde-3-phosphate dehydrogenase, from muscle and yeast, crystalline, molecular weights 109
- Glycogen, hepatic —, synthesis, influence of insulin and glucagon 190
- Haemoglobin, heterogeneity in aluminum oxide chromatography, observations 570
- Haemoglobins, different human —, action of carboxypeptidase 400

- Haemoglobins, four different human —, sulfhydryl groups 564
- Heart, dog, phosphorylase *a* and *b* from muscle, interconversion 69
- Heparin, enzymic degradation 596
- Histidine, metabolism in skin, estimation in human sweat 567
- Histidine decarboxylase, tissue histamine content, dependence on local activity of — 243
- Hydrogenase, substrate inhibition enhanced by sodium chloride 399
- Indole, biosynthesis, indole-3-glycerol phosphate as intermediate 438
- Insulin, calf pancreas slices, paper chromatographic isolation of ¹⁴C-labeled — 251
- , synthesis of hepatic glycogen, influence of — 190
- Iodothyronines, and structural analogues, biological activities 337
- Ketoacids, colorimetric method for determination 118
- Lactic dehydrogenase, liver, sodium sulfide inhibition 585
- Lipemia-clearing factor, of postheparin plasma, purification and characterization 421
- Lipid, synthesis, particulate fraction of yeast, relation 387
- Lipoproteins, inhibition of enzymes 522
- , serum, N-terminal residues 557
- Liver, new medium for isolation of mitochondria 419
- , rat, cell-free fraction of homogenate, incorporation of pyrimidine precursors into RNA 439
- , —, homogenates, specific incorporation of adenosine-5'-phosphate into RNA 445
- , —, repartition of ribonucleotides in various cytoplasmic fractions after prolonged protein deprivation 430
- Luciferase, firefly —, crystalline 170
- Lysozyme, hen's egg, some new constituent peptides 559
- Maltose, fermentation by baker's yeast, interaction of zymohexoses and — 319
- , fermentability by trehalose containing baker's yeast 538
- , fermentation rate by baker's yeast, effect of thiamine 315
- Menadione, *in vivo* inhibition of phosphorylation 443
- Meromyosins, metabolism in rabbit 228
- Metaphosphate, synthesis by enzyme from *Escherichia coli* 215
- Mitochondria, liver, new medium for isolation 419
- , non-oxidative exchange between inorganic P and ATP, studies 85
- , oxidative and phosphorylative systems, stability under anaerobic conditions 237
- Mitochondria, oxidative phosphorylation in magnesium-free medium 434
- Mucoprotein, linkage of sialic acid in — 560
- Muscle, dog heart, phosphorylase *a* and *b* from —, interconversion 69
- , rabbit skeletal —, molecular weights of crystalline aldolase, GAP dehydrogenase and phosphoglucomutase from — 109, 115
- , —, phosphorylase *b* to *a* converting enzyme 150
- Mycobacterium phlei*, nicotinamidase activity in cell-free extracts, inhibition by 3-acetylpyridine 576
- Mycobacterium tuberculosis*, chemical structure of cord factor 299
- Myofibrils, cross-striated, elongation 289
- Myokinase, activity in microorganisms 390
- Myosin, dissociation by heat coagulation 514
- , metabolism in rabbit 228
- L-Myosin, nucleoside triphosphatase activities, effects of 2:4-dinitrophenol 440
- Neoplastic cells, biosynthesis of DNA, *in vitro* effect of desoxyriboside of 6-azathymide 209
- Neoplastic growth, action of RNase 369, 528
- Nicotinamidase, activity in cell-free extracts of *Mycobacterium phlei*, inhibition by 3-acetylpyridine 576
- Nicotinamide, metabolism in rat, influence of thyroid hormone 413
- Noradrenaline, carbohydrate metabolism of rat diaphragm, effect of — 77
- Norepinephrine, adrenal —, precursors *in vivo* 48
- Nuclease, ribo —, action on Landschütz ascites cells *in vitro* 369
- , —, action on neoplastic growth, studies by interference microscopy 528
- , —, activity after digestion with carboxypeptidase 378
- , —, crystalline, electrophoretic lack of homogeneity, contribution of reducing agents 581
- Nucleic acid, desoxyribo —, animal cells propagated *in vitro*, conservation of — phosphorus 425
- , —, biosynthesis by bone marrow and neoplastic cells, *in vitro* effect of desoxyriboside of 6-azathymide 209
- , —, effect of heat and X-rays 497
- , ribo —, *Azotobacter vinelandii* 585
- , —, formation in baker's yeast, effects of certain nutritional conditions 135
- , —, incorporation of pyrimidine precursors into —, cell-free fraction of rat liver homogenate 439
- , —, induced β -galactosidase formation in *Bacillus megaterium*, stimulation by — 405
- , —, specific incorporation of adenosine-5'-phosphate, rat liver homogenates 445

- Nucleoside triphosphatase, activities of L-myosin, effects of 2:4-dinitrophenol 440
 —, actomyosin, interaction 355
- Nucleotide, diphosphopyridine —, polarographic and coulometric study 547
 —, pyridine —, reduction by dithionite, mechanism 177
- Nucleotides, free —, occurrence in *Penicillium chrysogenum* 414
 —, ribo —, repartition in various cytoplasmic fractions after prolonged protein deprivation, rat liver 430
- Nucleotide transferase, galactosemia, a congenital defect in a — 262
- Oestradiol, inhibitory effect upon mitosis in sea urchin embryo, action on DNP as cause 543
- Oxidative phosphorylation, *in vivo* inhibition by menadione 443
 —, mitochondrial — in magnesium-free medium 434
- Pancreas, calf, slices, paper chromatographic isolation of ^{14}C -labeled insulin 251
- Parathyroid tissue, bovine, differential centrifugation 447
- Penicillium chrysogenum*, occurrence of free nucleotides 414
- Peptides, diastereoisomeric, new method for examination of mixtures 423
 —, DNP —, isolation from DNP-polyvalylproteins 595
 —, —, stepwise reductive cleavage 577
 —, γ -glutamyl —, condensation with thiocyanate 574
 —, some new constituent — of lysozyme, hen's egg 559
- Phosphatase, prostatic acid —, maintenance of activity by proteins and polyamines 503
- Phosphoglucumutase, from muscle, crystalline, molecular weight 115
- Phosphoglyceric acid mutase, crystalline 394
- Phosphoribomutase, bovine uterus, studies 201
- Phosphorylase *a* and *b*, converting enzyme of rabbit skeletal muscle 150
 —, from dog heart muscle, interconversion 69
- Photosynthesis, broken chloroplasts, phosphorylation and carbon dioxide fixation 462
 —, isolated chloroplasts, general concept, comparison of three photochemical reactions 449
- Polarography, tool for study of histidine metabolism in skin 567
- Polyamines, prostatic acid phosphatase, maintenance of activity by — 503
- Polynucleotide phosphorylase, *Azotobacter vinelandii* 269
- Protein, desoxyribonucleo —, action of oestradiol on — as cause of its inhibitory effect upon mitosis, sea urchin embryo 543
- Protein, DNP-polyvalyl —, isolation of DNP-peptides 595
 —, incorporation of amino acids, effects of monovalent cations 565
 —, lipo —, serum, N-terminal residues 557
 —, muco —, linkage of sialic acid in — 560
- Proteins, labeled plasma —, rate of loss from circulation, tumour-bearing rats 418
 —, lipo —, inhibition of enzymes 522
 —, prostatic acid phosphatase, maintenance of activity by — 503
- Purines, formation in baker's yeast, effects of certain nutritional conditions 135
- Pyridine nucleotide, reduction by dithionite, mechanism 177
- Pyrimidine, incorporation of precursors into RNA, cell-free fraction of rat liver homogenate 439
- Pyruvate, 3-fluoro —, inhibition of oxidative mechanism by — 583
- Ribonucleic acid, see Nucleic acid
- Sea urchin, eggs, oxidative pathways for glucose 27
- Sialic acid, linkage of — in mucoprotein 560
- Skin, formation of fibrils from extracts 411
 —, histidine metabolism, paper chromatography and polarography as tool for study 567
- Subtilisin, activation of chymotrypsinogen 408
- Sugars, intestinal absorption, mechanism 568
 —, Sauternes yeast, selective fermentation and phosphorylation 62
- Sulphydryl groups, four different human haemoglobins 564
- Sulphites, utilization by higher animal 351
- Tetanus toxoids, investigation of physical properties 407
- Thiamine, fermentation rate of zymohexoses and maltose by baker's yeast, effect 315
- Thiamine triphosphate, studies 293
- Thyroid gland, complex nature of proteolytic system 444
- Thyroid hormone, nicotinamide metabolism in rat, influence 413
- Thyroid hormones, iodothyronines and structural analogues, biological activities 337
- Tobacco, metabolism of leaf disks, some effects of DNP 100
- Trehalose, baker's yeast containing —, fermentability maltose 538
- Tricarboxylic acid cycle, role in biosynthesis, effect of acidity on bacterial growth, studies 43
- Tropomyosin, metabolism in rabbit 228
- Trypsin, reaction with diisopropylfluorophosphate 572
- Trypsinogen, action of enterokinase 433
- Urocanic acid, estimation in human sweat 567
- Uterus, bovine —, studies on phosphoribomutase 201

- Virus, tobacco mosaic —, further studies concerning breaking 488
- , —, morphological changes accompanying thermal denaturation . . . 388
- , —, separation of strains, continuous filter-paper electrophoresis . . . 556
- Vitamin E, deficient chickens, haemolysis of erythrocytes 553
- Wheat, seedlings, metabolism of galactose 17
- X-rays, crystal forms and molecular weight of α -chymotrypsinogen, study . . . 562
- , effect on DNA 497
- α -D-Xylopyranosyl- β -D-fructofuranoside, enzymic synthesis 129
- Yeast, baker's, fermentation rate of zymohexoses and maltose, effect of thiamine 315
- , —, formation of purines and RNA, effects of certain nutritional conditions 135
- , —, maltose fermentation, interaction of zymohexoses and maltose . 319
- , —, oxidation-reduction systems . 469
- , —, trehalose containing, fermentability of maltose 538
- , molecular weight of GAP dehydrogenase from —. 109
- , particulate fraction, relation to lipid synthesis 387
- , Sauternes —, selective fermentation and phosphorylation of sugars 62
- Zymohexoses, fermentation rate by baker's yeast, effect of thiamine 315
- , maltose fermentation by baker's yeast, interaction of maltose and — 319
