SUBJECT INDEX

- Acetate, activating mechanism in *Rhodo-
 spirillum rubrum*. 327
 —, precursor of amino acids of casein,
 intact dairy cow 54
 —, tricarboxylic acid cycle as pathway
 for transfer of carbon from — to
 amino acids, intact cow 59
Acetobacter xylinum, growth of cellulose
 microfibrils 652
 N-Acetylsialic acid, isolation from normal
 liver 652
 Adenine desoxyriboside polyphosphates,
 enzymic formation and isolation . . . 6
 —, some enzyme reactions with — . . . 92
 Adenosine triphosphatase, activity of in-
 tact muscle cells 204
 —, activity of rat liver mitochondria. . . 404
 —, from peripheral nerves, influence of
 some cations on — 394
 Adenosine triphosphate, and related com-
 pounds, correction of rotary dis-
 persation characteristics of — . . . 442
 Adipose tissue, fatty acid uptake and
 esterification. 115
 Albumin, bovine serum —, complex for-
 mation between — and sodium
 desoxyribonucleate induced by heat . 213
 Alcohol dehydrogenase, yeast, effect of
 pyridine derivatives on reaction of
 — 574
 —, —, properties of catalytically
 active site 581
 Aldopentose, new colour reaction for
 determination in presence of other
 saccharides 639
 Algae, metabolism of thioctic acid 34
 L-Amino acid oxidase, imino acid as inter-
 mediate in reaction 439
 Amino acids, composition of DNase I . . 621
 —, convenient method for esterification . 432
 —, *in vitro* inhibition of catalase. . . . 362
 —, of casein in intact dairy cow, acetate
 as precursor 54
 —, pepsinogen, N-terminal residues and
 composition 600
 —, quantitative determination by paper
 chromatography, solvent to replace
 phenol 181
 —, synthesis by electric discharges,
 mechanism 480
 —, thiol —, new method of isolation
 via electrolytic reduction of mercap-
 tides 658
 —, tricarboxylic acid cycle as pathway
 for transfer of carbon from acetate
 to —, intact cow 59
 4-Amino-5-imidazolecarboxamide, effect
 on incorporation of purines into liver
 nucleic acids of mouse. 402
 Amylase, synthesis, mechanism 665
 Anserine, biosynthesis *in vitro*. 649
 Apatite crystallites, bone 202
 Ascorbic acid, formation in plants, further
 studies 205
 Autoradiography, molecular —, β -ray
 counting from single virus particles
 and DNA molecules in nuclear emul-
 sions 453
 6-Azauracil, and its riboside, studies of
 bacterial resistance to — 428

- Azotobacter*, nitrate assimilation and N_2 fixation, tungstate as competitive inhibitor of molybdate 433
- Bacillus megaterium*, properties and induction of β -galactosidase 558
- Bacteria, normal and chloromycetin-inhibited, study of RNA by zone electrophoresis 162
- Bone, apatite crystallites 202
- , electron microscopy and X-ray diffraction 260
- Calcium, isotopic —, output from frog muscle 80
- Carbon dioxide fixation, by *Tetragonia expansa* leaves extract 342
- Carboxylic acids, certain — as intermediates in biosynthesis of cholesterol, significance 472
- Carnosine, biosynthesis *in vitro* 649
- Casein, intact dairy cow, acetate as precursor of amino acids 54
- Catalase, *in vitro* inhibition by amino acids 362
- Cellulose, growth of microfibrils, *Acetobacter xylinum* 652
- Cephalin, enzymic hydrolysis in rat intestinal mucosa 127
- Chitin, enzymic synthesis by extracts of *Neurospora crassa* 449
- Chloromycetin, bacteria, normal and inhibited by —, study of RNA by zone electrophoresis 162
- Chloroplast, *Spirogyra*, photosynthetic activity of fragments, mass spectrometric measurements 443
- Cholesterol, biosynthesis, significance of certain carboxylic acids as intermediates 472
- Chromatography, chemical transamination reactions involving vitamin B_6 , study —, paper —, identification and quantitative determination of keto acids —, —, quantitative determination of amino acids, solvent to replace phenol 181
- , reversed-phase partition —, analysis of mixtures of higher saturated normal fatty acids, comparison with ester fractionation 192
- Chymotrypsinogen, degradation by chymotrypsin 608
- Clostridium sporogenes*, studies on peptidase activity 372
- Cysteinesulphinic acid, enzymic formation from sulphite, calf embryo 12
- Cysteinesulphinic acid decarboxylase, purification and substrate specificity 624
- Cytochrome *c*, aggregation of mitochondria, mitochondrial fragments and microsomes by — 306
- Desoxyribonucleic acid, see Nucleic acid
- Diethylstilbestrol, inhibition of succinoxidase of tumour and mitochondrial elements, reversal by progesterone and testosterone 139
- Dimethyldithiocarbamate, sodium —, fungitoxic action, role of metals and chelating agents 550
- Disulfide group, determination by specific proton displacement 643
- DPNH-cytochrome *c* reductase, soluble, extraction from electron transfer particle 510
- Electron microscopy, bone 260
- , nature of algal and related flagella 275
- Electron transfer particle, extraction of soluble DPNH-cytochrome *c* reductase from — 510
- , phosphorylating, preparation and properties, beef heart mitochondria 516
- Electrophoresis, chemical transamination reactions involving vitamin B_6 , study —, zone, in starch gels, cabbage enzymes —, —, purification of ovomucoid 173
- , —, study of RNA of normal and chloromycetin-inhibited bacteria 162
- Embryo, calf, enzymic formation of cysteine-sulphinic acid from sulphite 12
- , early chick —, increase of DNA and cell number during morphogenesis 24
- , nucleotides under aerobic and anaerobic conditions 385
- Enzyme action, kinetics 70
- Enzymes, cabbage —, zone electrophoresis in starch gels 198
- Fatty acids, biosynthesis by soluble enzyme fractions 219
- , higher saturated normal —, analysis of mixtures, comparison of reversed-phase partition chromatography and ester fractionation 192
- , polyene —, occurrence in guinea pig tissues 650
- , uptake and esterification in adipose tissue 115
- Fibrin, bovine — clot, exclusive assay of pro-activator of plasminogen by lysis of — 437
- Fibrinogen, transverse wave propagation and non-Newtonian flow solutions of polymers 569
- Fibroin, silk —, reaction with oxidizing agents 97
- Flagella, nature of algal and related — 275
- N-2-Fluorenyldiacetamide, inhibition of glutamate oxidation, rat liver mitochondria 668
- , inhibition of glutamic dehydrogenase, rat liver mitochondria 447
- Formaldehyde, reactive intermediate formed by tetrahydropteroyl glutamate and — 654
- N-Fructosyl anthranilic acid, possible intermediate in synthesis of indole by *Saccharomyces* 207
- Fumarase, sedimentation studies 544
- β -Galactosidase, properties and induction in *Bacillus megaterium* 558

- γ -Globulin, modification by acid, study. . . 149
 Glucose, intestinal absorption, studies . . . 210
 Glucuronolactone decarboxylase, studies . . 289
 Glutamate, rat liver mitochondrial oxidation of, inhibition by N-2-fluorenyldiacetamide . . . 668
 Glutamic dehydrogenase, rat liver mitochondria, inhibition by N-2-fluorenyldiacetamide . . . 447
 Glycine- ^{14}C , incorporation into RNA of rat liver, influence of dietary protein . . 587
 Glycolytic enzyme systems, interaction with mitochondrial enzyme systems, oxidation of lactate and phosphoenolpyruvate. . . 143
 Gram staining, of extracellular material . . 227
 Haemerythrin, *Phascolosoma gouldi*, X-ray molecular weight, some notes on oxygenation reaction . . . 465
 —, properties . . . 489
 Haemocyanin, lobster, thermal denaturation. . . 28
 Heart, beef, preparation and properties of phosphorylating electron transfer particle . . . 516
 Hyaluronic acid, prepared from vitreous body, double refraction of flow studies . . 1
 Imino acid, intermediate in L-amino acid oxidase reaction . . . 439
 Indole, synthesis by *Saccharomyces*, N-fructosyl anthranilic acid as possible intermediate . . . 207
 Influenza virus, see Virus
 Intestinal mucosa, rat, enzymic hydrolysis of cephalin . . . 127
 Intestines, absorption of glucose, studies . . 210
 Keto acids, identification and quantitative determination by paper chromatography. . . 181
 Kidney cortex, slices, transport of alkali cations . . . 321
 Lactate, oxidation, interaction of glycolytic and mitochondrial enzyme systems . . . 143
 Lactoperoxidase, effect of ionizing radiations, study. . . 540
 Lecithin, lipid factor from liver which enables *Penicillium notatum* extracts to break down intact —. . . 215
 Lipase, pancreatic —, purification, studies . . 264
 Lipid, present in yeast with certain properties similar to those of tocopherol. . . 663
 Liver, lipid factor from — which enables *Penicillium notatum* extracts to break down intact lecithin. . . 215
 —, mouse, incorporation of purines into nucleic acids, effect of 4-amino-5-imidazolecarboxamide. . . 402
 —, normal —, isolation of N-acetylsialic acid . . . 652
 —, rat, ATPase activity of mitochondria . . 404
 —, —, distribution of potassium in cell, mechanism of potassium accumulation, studies . . . 504
 Liver, rat, incorporation of glycine- ^{14}C and ^{32}P into RNA, influence of dietary protein. . . 587
 —, —, inhibition of glutamate oxidation by N-2-fluorenyldiacetamide . . 668
 —, —, inhibition of glutamic dehydrogenase of mitochondria by N-2-fluorenyldiacetamide . . . 447
 —, —, oxidative phosphorylation in sonic extracts of mitochondria . . . 448
 Lysine, α -keto acid analogue of —, pyridine nucleotide-dependent reduction to L-pipecolic acid. . . 202
 Menadione, enzymic oxidation of reduced —. . . 222
 Mercaptides, electrolytic reduction, new method for isolation of thiol amino acids and peptides . . . 658
 Microsomes, aggregation by cytochrome *c* . . 306
 Mitochondria, aggregation by cytochrome *c* . . 306
 —, beef heart, preparation and properties of phosphorylating electron transfer particle . . . 516
 —, inhibition of succinoxidase by diethylstilbestrol, reversal by progesterone and testosterone. . . 139
 —, rat liver, ATPase activity of —. . . 404
 —, —, inhibition of glutamate oxidation by N-2-fluorenyldiacetamide . . 668
 —, —, inhibition of glutamic dehydrogenase by N-2-fluorenyldiacetamide . . 447
 —, —, oxidative phosphorylation in sonic extracts . . . 448
 —, tumour —, effect of thyroxine on oxidative phosphorylation of —. . 435
 Mitochondrial enzyme systems, interaction with glycolytic enzyme systems, oxidation of lactate and phosphoenolpyruvate. . . 143
 Molybdate, nitrate assimilation and N_2 fixation by *Azotobacter*, tungstate as competitive inhibitor of —. . . 433
 Murphy-Sturm lymphosarcoma, rat, nucleic acid patterns during growth and regression of —. . . 226
 Muscle, ATPase activity of intact cells . . 204
 —, frog, output of ^{45}Ca . . . 80
Mycobacterium tuberculosis, constituents of a "toxic-lipid" obtained from —. . 312
 Myofibrils, cross-striated, quantitative studies on structure, investigations by interference microscopy and biochemical methods . . . 229, 250
 Neuraminidase, specific enzyme of influenza virus and *Vibrio cholerae* . . . 645
Neurospora crassa, extracts, enzymic synthesis of chitin . . . 449
 Nitrite, interference by reduced pyridine nucleotides in diazotization of —. . 440
 Nitrogen fixation, and nitrate assimilation, *Azotobacter*, tungstate as competitive inhibitor of molybdate . . . 433
 Nuclease, desoxyribo — I, amino acid composition . . . 621

- Nuclease, desoxyribo — II, spleen, purification 647
 —, ribo —, active groups, oxidation by air. 121
 —, —, partially hydrolyzed and enzymically active 525
 —, —, tyrosyl-carboxylate ion hydrogen bonding in — 196
 Nucleate, sodium desoxyribo —, complex formation between — and bovine serum albumin induced by heat 213
 Nucleic acid, content of egg of domestic fowl 211
 —, desoxyribo —, characterization of nucleotide arrangement through stepwise acid degradation 451
 —, —, chemical degradation, study 215
 —, —, extract promoting synthesis of — in U.V.-irradiated *Salmonella typhimurium*. 224
 —, —, increase during morphogenesis of early chick embryo. 24
 —, —, single molecules in nuclear emulsions, molecular autoradiography, β -ray counting 453
 —, hydrolysis, comparison of new P_2O_5 method with standard perchloric acid method 367
 —, mouse liver, incorporation of purines, effect of 4-amino-5-imidazolecarboxamide. 402
 —, patterns during growth and regression of Murphy-Sturm lymphosarcoma in rat 226
 —, reversible photolysis, studies. 657
 —, ribo —, from tobacco leaves, isolation and properties 208
 —, —, incorporation of radioactive uridine-5'-monophosphate by mammalian enzymes 217
 —, —, of normal and chloromycetin-inhibited bacteria, study by zone electrophoresis 162
 —, —, rat liver, incorporation of glycine- ^{14}C and ^{32}P , influence of dietary protein. 587
 —, —, TMV, biological effects of incorporation of thiouracil into — 351
 Nucleoprotein, proton-deuteron exchange of molecules surrounded by heavy water 494
 Nucleotide, pyridine —, reaction of thiol compounds with — 221
 —, —, reduction of α -keto acid analogue of lysine to L-pipecolic acid, dependence on — 202
 Nucleotides, in embryos under aerobic and anaerobic conditions 385
 —, pyridine —, diazotization of nitrite, interference by reduced — 440
 Orotidine, structure, spectrophotometric study of N-methylated orotic acids as function of pH. 295
 Ovomucoid, purification by zone electrophoresis 173
 Oxidative phosphorylation, mechanism, preparation and properties of phosphorylating electron transfer particle from beef heart mitochondria 516
 —, polynucleotide coenzyme of — 660
 —, in sonic extracts of rat liver mitochondria 448
 —, tumour mitochondria, effect of thyroxine 435
 Pancreas, studies on purification of lipase 264
Penicillium notatum, extracts, lipid factor from liver which enables — to break down intact lecithin. 215
 Pepsinogen, N-terminal amino acid residues, amino acid composition 600
 Peptidase, activity in *Clostridium sporogenes* 372
 —, manometric estimation of activity 88
 Peptides, neuro-intermediate lobe of hog pituitary gland. 533
 —, new method of isolation via electrolytic reduction of mercaptides 658
 Peripheral nerves, influence of some cations on ATPase from — 394
Phascosoma gouldi, X-ray molecular weight of haemerythrin, some notes on oxygenation reaction. 465
 Phenylalanine, enzymic conversion to tyrosine 445
 Phosphatase, prostatic acid —, some effects of hydroxyl compounds on — 155
 Phosphoenolpyruvate, oxidation, interaction of glycolytic and mitochondrial enzyme systems 143
 Phosphorus, radioactive, incorporation into RNA of rat liver, influence of dietary protein. 587
 Photosynthesis, activity of chloroplast fragments of *Spirogyra*, mass spectrometric measurements 443
 L-Pipecolic acid, pyridine nucleotide-dependent reduction of α -keto acid analogue of lysine to — 202
 Pituitary gland, hog, peptides of neuro-intermediate lobe. 533
 Plasminogen, exclusive assay of pro-activator by lysis of bovine fibrin clot 437
 Pneumococcus, type I, isolation of uridine pyrophosphogalacturonic acid 662
 Polynucleotide coenzyme, of oxidative phosphorylation 660
 Potassium, distribution in rat liver cell, mechanism of accumulation, studies 504
 Progesterone, inhibition of succinoxidase of tumour and mitochondrial elements by diethylstilbestrol, reversal by — 139
 Protein, abnormal — constituents of virus-infected leaves 18
 —, and nucleo —, proton-deuteron exchange of molecules surrounded by heavy water 494

- Protein, incorporation of glycine- ^{14}C and ^{32}P into RNA of rat liver, influence of dietary — 587
- A-Protein, TMV, reaggregation 199
- Purines, incorporation into liver nucleic acids of mouse, effect of 4-amino-5-imidazolecarboxamide 402
- , molecular interaction between steroids and — 665
- Pyridine derivatives, effect on reaction of yeast alcohol dehydrogenase 574
- Pyridine nucleotide, see Nucleotide
- Pyrimidine derivatives, reversible photolysis 657
- Pyruvate, metabolism, effect of virus infection on — 333
- Rhodospirillum rubrum*, acetate-activating mechanism in — 327
- Ribonuclease, see Nuclease
- Ribonucleic acid, see Nucleic acid
- Ribulose-1,5-diphosphate, from *Tetragonia expansa* leaves extract 342
- Saccharomyces*, synthesis of indole, N-fructosyl anthranilic acid as possible intermediate 207
- Salmonella typhimurium*, extract promoting synthesis of DNA in U.V.-irradiated — 224
- Serotonin, anti-oxidant effect of — 431
- Sialic acid, N-acetyl —, isolation from normal liver 652
- Spirogyra*, photosynthetic activity of chloroplast fragments, mass spectrometric measurements 443
- Steroid 11- β hydroxylation, nature of —, studies 655
- Steroids, molecular interaction between purines and — 665
- Succinoxidase, tumour and mitochondrial elements, diethylstilbestrol inhibition, reversal by progesterone and testosterone 139
- Sulphydryl group, determination by specific proton displacement 643
- Testosterone, inhibition of succinoxidase of tumour and mitochondrial elements by diethylstilbestrol, reversal by — 139
- Tetragonia expansa*, leaves extract, ribulose-1,5-diphosphate from and CO_2 fixation by — 342
- Tetrahydropteroyl glutamate, reactive intermediate formed by formaldehyde and — 654
- Thioctic acid, metabolism in algae 34
- Thiosulphate, colorimetric method for determination 412
- Thiouracil, incorporation into RNA of TMV, biological effects 351
- Thyroxine, effect on oxidative phosphorylation of tumour mitochondria 435
- Tobacco mosaic virus, see Virus
- Tocopherol, lipid present in yeast with certain properties similar to those of — 663
- Tricarboxylic acid cycle, pathway for transfer of carbon from acetate to amino acids, intact cow 59
- Tumour, inhibition of succinoxidase by diethylstilbestrol, reversal by progesterone and testosterone 139
- , oxidative phosphorylation of mitochondria, effect of thyroxine 435
- Tungstate, nitrate assimilation and N_2 fixation by *Azotobacter*, — as competitive inhibitor of molybdate 433
- Tyrosine, enzymic conversion of phenylalanine to — 445
- Tyrosyl-carboxylate ion hydrogen bonding in RNase 196
- Ultracentrifugal analysis, dilute solutions 628
- Uricase, nature and composition of some stable reaction products 43
- Uridine-5'-monophosphate, radioactive, incorporation into RNA by soluble mammalian enzymes 217
- Uridine pyrophosphogalacturonic acid, isolation from type I pneumococcus 662
- Vibrio cholerae*, neuraminidase: specific enzyme of — 645
- Virus, effect of infection on pyruvate metabolism. 333
- , influenza —, neuraminidase: specific enzyme of — 645
- , plant, synthesis and abnormal protein constituents of infected leaves 18
- , single particles in nuclear emulsions, molecular autoradiography, β -ray counting 453
- , tobacco mosaic —, incorporation of thiouracil into RNA, biological effects. 351
- , —, reaggregation of A-protein 199
- Vitamin B_6 , chemical transamination reactions involving —, electrophoretic and chromatographic study 417
- Vitamin K_3 , enzymic oxidation of reduced — 222
- Vitreous body, double refraction of flow studies on hyaluronic acid 1
- X-rays, bone, diffraction study 260
- , molecular weight of haemerythrin from *Phascolosoma gouldi* 465
- Yeast, actively respiring cell-free extracts, preparation and properties. 103
- , occurrence of lipid with certain properties similar to those of tocopherol. 663
