SUBJECT INDEX

- Acetate, radioactive, incorporation into
 lipid by adipose tissue *in vitro* . . . 430
 ———, synthesis of C₄-dicarboxylic acids
 from ——— by a "glyoxylate bypass"
 of Krebs' cycle. 651
 Actinomycin, action on bacterial cell
 walls 160
 Actomyosin, interaction with ATP, effect
 of ethylenediaminetetraacetic acid . 568
 Acyl adenylate, non-enzymic reactions of
 imidazole and ——— 227
 Adenosine triphosphatase, activity of
 myosin, action of pyrophosphate . . 644
 ———, ATP-³²P and ———, ionic require-
 ments for oxidative phosphorylation 440
 ———, myosin B ———, acceleration by mag-
 nesium, effect of monovalent salts . 315
 Adenosine triphosphate, interaction with
 actomyosin, effect of ethylenedi-
 aminetetraacetic acid 568
 Adipose tissue, incorporation of radio-
 acetate into lipid *in vitro* 430
 Adrenaline, formation from noradrenaline 658
 ———, influence on acid-soluble phosphate
 fractions of rat uterus. 133
 ———, inhibition of metabolism of rat
 uterus, influence of hypophysectomy 385
 ———, stability of solutions, adverse effect
 of ascorbic acid 178
 D-Alanine, constituent of spores of *Bacillus*
 megatherium 199
 Aldehyde dehydrogenases, specific pro-
 tection of thiol groups by pyridine-
 nucleotide coenzymes 655
 Algae, blue-green ———, light-dark tran-
 sients in oxygen exchange of ——— . 436
 ———, ———, periodic phenomena in photo-
 synthesis as reflected by oxygen ex-
 change of ——— 434
 Amino acids, composition of human haemo-
 globins, observations 640
 ———, esterification of carboxyl groups by
 mustard gas and related compounds 645
 ———, micro-method for determination . 209
 α -Aminoadipic β -semialdehyde, enzymic
 formation from hexahomoserine,
 Neurospora crassa 648
 2-Aminofluorene, acylation by rat liver
 in vitro 631
 Appendix, rabbit, ribonucleoprotein from
 microsomes 207
 L-Arabinose, fermentation, role of L-
 ribulose-5-phosphate-D-xylulose-5-
 phosphate stereoisomerase 635
 Ascorbic acid, adverse effect on stability
 of adrenaline and noradrenaline
 solutions 178
 ———, isolation of dependent DPNH-
 oxidase 222
 Ascorbic acid oxidase, activation and other
 properties 42
 Aspartic acid, enzymic transamination,
 inhibition by hydroxyaspartate, 2,3-
 diaminosuccinate and 2,3-diamino-
 propionate. 78
 Azide, inhibition of nitrogen fixation,
 respiration and phosphorus utili-
 sation, *Azotobacter vinelandii* . . 388, 555
