SUBJECT INDEX

- Acetate, labeled, *in vitro* incorporation
 into lipid by adipose tissue 141
 Acetylcholine, overshoot and block of con-
 duction by lipid-soluble analogues 629
 Acetylchymotrypsin, isolation of acetyl
 peptides from 423
 Actomyosin, developing chick muscle,
 uptake of glycine-1-¹⁴C 161
 —, rotary diffusion 311
 Acylase I, determination by direct spectro-
 photometric measurement of peptide
 bond 168
 Adenosine triphosphatase, rat sperma-
 tozoa, study with electron microscope 634
 Adenosine triphosphate, preparation of
 [β -³²P]- and [γ -³²P]- 642
 —, rat uterus, influence of some hor-
 mones and freezing on content 580
 Adipose tissue, *in vitro* incorporation of
 radioacetate into lipid 141
 ADP-polynucleotide phosphorylase 222
 Alanyl-phenylalanine, absorption *in vitro* 224
 Albumin, serum, colorimetric measurement
 of cuprous ion formation to detect
 cysteine, glutathione and — 414
 —, serum, inhibition of tryptic hydroly-
 sis by sodium salts, role of anion 564
 Algae, some marine —, chemical and
 physical investigation of cell walls 89
 Amino acids, composition of collagen frac-
 tions of rabbit skin 418
 —, reaction of hydroxylamine with
 esters of — 416
 Aminoazo dyes, *in vitro* formation of pro-
 tein-bound derivatives of —, en-
 hancement by benzpyrene pretreat-
 ment, rat liver 655
 Amylase, pancreatic —, changes in intra-
 cellular distribution during secretory
 cycle, rat 12
 Androstenedione, conversion to oestrone
 by placental microsomes 658
 L-Ascorbic acid, enzymic conversion of D-
 glucuronate to — in animal tissues 221
 —, inactivation of T-group bacterio-
 phages by —, catalytic effects of
 cupric ion and photo-excited ribo-
 flavin 427
 —, isolation of dependent DPNH-
 oxidase from suprarenal microsomes 598
 Azaguanine, action on synthesis of phage
 proteins by an induced lysogenic
 bacterium 665
 Azatryptophan, effects on bacterial en-
 zymes and bacteriophage 330
 Bacteria, effects of radiophosphorus decay
 on some synthetic capacities of — 282
 —, pathways of 5-ketogluconate cata-
 bolism 652
 —, study of spontaneous flocculation by
 R-forms 442
 Bacteriochlorophyll, in organic solutions,
 investigations 478
 Bacteriophage, effects of azatryptophan on
 bacterial enzymes and — 330
 —, synthesis of — proteins by an
 induced lysogenic bacterium, action
 of RNase, thiouracil and azaguanine 665
 —, T-group, inactivation by ascorbate
 and some poly-phenol derivatives,
 catalytic effects of cupric ion and
 photo-excited riboflavin 427
 Benzpyrene, *in vitro* formation of pro-
 tein-bound derivatives of aminoazo
 dyes, rat liver, enhancement by
 pretreatment with — 655
 Catalase, synthesis in liver of tumour-
 bearing mice, study by means of
 radioactive iron 432
 Cell wall, bacterial, presence of ribitol phos-
 phate 220
 —, microorganisms, isolation by frac-
 tionation in liquid two-phase systems 378
 —, some marine algae, chemical and
 physical investigation 89
 Chloramphenicol, effect on protein and
 nucleic acid synthesis in isolated
 thymus nuclei 408
 Chloroplasts, photosynthesis in isolated
 — 16
