SUBJECT INDEX

- Actin, participation in actomyosin con-
 traction. 1
 Actomyosin, contraction, participation of
 actin 1
 Adenosine mono-, di- and triphosphate,
 assay 350
 Adrenalectomy, influence on arginase and
 esterase activities of liver tissue . . . 168
 Adrenal gland, concentration and hydro-
 xylation of free phenylalanine in— 328
 Albumin, bovine serum —, volume
 changes on adding acid 87
 Aldehyde dehydrogenase, yeast, kinetics
 of potassium-activated — 218
 Aldehydes, long-chain —, interaction
 with luciferase and FMN in light
 reaction catalyzed by preparations
 of luminous bacteria 159
 Amino acids, composition of yeast cyto-
 chrome *c*, comparison with horse-
 heart cytochrome *c*. 108
 —, intracellular — of *Staphylococcus*
aureus, release and analysis 402
 —, transport in isolated rat diaphragm,
 stimulation by insulin. 226
 Aminoazo dyes, influence of feeding —
 on swelling and solubilization of
 microsomes, rat liver 9
 δ -Aminolaevulinic acid, biosynthesis, ex-
 tracts of *Rhodospseudomonas spher-*
oides 451
 —, enzymic synthesis 219

- o*-Aminophenols, enzymic oxidation of — 665
 Amino-sugar, nucleotide containing —
 from *Carcinus maenas*. 657
 Arginase, activity in liver tissue, influence
 of adrenalectomy and cortisone
 treatment 168
 Ascites tumour, effect of D₂O on survival
 of mice with — 58
 —, Ehrlich —, conservation of RNA
 by cells of — 45
 —, —, enzymes of uracil metabolism
 in — 376
 6-Azauracil, *Escherichia coli* exposed to
 action of —, accumulation of
 nucleic acid metabolites 659
Bacillus megaterium KM, phage-infected,
 synthesis of DNA. 208
 Bone marrow, from irradiated guinea pigs,
 induced recovery of DNA synthesis 667
 Bone salts, occurrence in unicellular or-
 ganisms 514
 Brain, comparative investigations on oxi-
 dation of pyruvate by mitochondria
 of liver and — 104
 —, rat, intracellular localization of en-
 zymic deiodination of L-thyroxine
 and 3:3:5'-triiodo-L-thyronine 95
 Carboxypeptidase A, pancreatic, influence
 of sodium chloride and Tween 80 on
 enzymic activity, comparison 341
 Carcinogenesis, chemical —, influence of
 feeding aminoazo dyes on swelling
 and solubilization of microsomes,
 rat liver. 9
Carcinus maenas, an amino-sugar nucleo-
 tide from — 657
 Catalase, on the supposed catalytic oxi-
 dation of thiol groups by — 225
 Cell wall, ivory nuts and dates, study of
 structure 229
 —, *Streptococcus faecalis* and a *Pseudo-*
 monas species, an effect of drying
 isolated — 445
Chlorella, response to a deuterium environ-
 ment 62
 —, sodium fluoride-induced carbon di-
 oxide burst 35
 Chlorogenic acid oxidase, direct spectro-
 photometric determination of acti-
 vity 638
 Chlorophyll, oxidation-reduction poten-
 tials of different — in methanol 278
 Cholinesterase, kinetics of inhibition in
 tissue homogenates of mice and
 houseflies, quantitative analysis 603
 Chondroitinsulfuric acid, isolation from
 normal human plasma 413
Chromatium, cytochrome reactions 272
 Chymotrypsin, digestion of trypsin-re-
 sistant "core" of haemoglobins A
 and S. 546
 α -Chymotrypsin, effect of calcium chloride
 on several hydrolyses catalyzed by — 144
 member of — class 268
 Cortisol, metabolism by cultured uterine
 fibroblasts, strain U12-705. 591
 Cortisone, influence of — treatment on
 arginase and esterase activities of
 liver tissue. 168
 Cynodontin, isolation from a saltant of
 Helminthosporium victoriae. 198
 Cysteinesulfonic acid, oxidative desami-
 nation of — 437
 Cystine, in keratin, reaction with sulfite-
 bisulfite solutions at 50°, mechanism 284
 Cytochrome, reactions in *Chromatium* 227
 Cytochrome *c*, reduction by resin con-
 taining copper-amine complex 440
 —, yeast, amino acid composition and
 some other properties, comparison
 with horse-heart — 108
 Desoxyribonuclease, see Nuclease
 Desoxyribonucleic acid, see Nucleic acid
 Desoxyribose, biosynthesis, *Escherichia*
 coli. 216
Desulfovibrio desulfuricans, reduction of
 hydroxylamine connected with hy-
 drogenase activity 355
 Diaminopimelic acid, bacterial trans-
 amination of stereoisomers of — 596
 Diaphragm, isolated rat —, stimulation
 of amino acid transport by insulin 226
 —, —, synthesis of glycogen, signifi-
 cance of potassium and sodium. 31
 Ehrlich ascites tumour, see Tumour
 Elastoidin, a two-component member of
 collagen class 268
 Electron transport system, correlation of
 morphology and enzymic properties
 of mitochondrial and sub-mito-
 chondrial particles 524
Escherichia coli, biosynthesis of ribose and
 desoxyribose. 216
 —, exposed to action of 6-azauracil,
 accumulation of nucleic acid
 metabolites 659
 —, purification of pyrimidine desoxy-
 riboside phosphorylase 562
 —, synthesis of nucleic acid, effect of
 nitrogen and sulfur mustard 482
 —, treated with sulfur mustard, relation-
 ship between synthesis of DNA and
 protein 492
 —, vitamin K-dependent nitrate re-
 ductase 452
 — K-12, purification of phosphotrans-
 acetylase 436
 Esterase, activity of liver tissue, influence
 of adrenalectomy and cortisone
 treatment 168
 Ferritin, oxidation of sulfide to thiosulfate
 by — 573
 Fibroblasts, cultured uterine —, strain
 U12-705, metabolism of cortisol and
 progesterone by — 596
 Flagella, algal and sperm — obtained by
 sedimentation, properties 636

- Flavin mononucleotide, interaction with luciferase and long-chain aldehydes in light reaction catalyzed by preparations of luminous bacteria . . . 159
- p*-Fluorophenylalanine, incorporation into proteins, *Lactobacillus arabinosus* . . 318
- Fumarase, baker's yeast, a thiol enzyme . 654
- Globin, pure native — from human haemoglobin, preparation and physicochemical properties 221
- D-Glucoronolactone, metabolism in normal and pentosuric human subjects . . . 645
- Glucose-¹⁴C, observations on deterioration of — 579
- Glucosone, inhibition of yeast metabolism, yeast hexokinase activity and tissue glycolysis 127
- Glutamic-aspartic transaminase, purification 191
- Glutamine, α -ketoglutaramic acid as product of transamination, *Neurospora* . 202
- α -Glycerophosphate dehydrogenase, importance in glycolysing insect muscle, study 660
- Glycogen, synthesis in isolated rat diaphragm, significance of potassium and sodium 31
- Glycolysis, tissue —, inhibition by glucosone 127
- Growth hormones, bovine, human and monkey, some comparative observations on electrostatic and hydrodynamic behaviour 520
- Haem, biosynthesis in liver cell 447
- Haemoglobin, human, pure native globin from —, preparation and physicochemical properties 221
- Haemoglobins, normal human and sickle-cell —, comparison by "fingerprinting" 539
- , type A and S, chymotryptic digestion of trypsin-resistant "core". . . 546
- Haemoproteins, biosynthesis in liver cell . 447
- , magnetic susceptibility measurements 439
- Helminthosporium victoriae*, isolation of cynodontin from a saltant of — . 198
- Hexokinase, assay 350
- , yeast, inhibition of activity by glucosone 127
- Hyaluronic acid, biosynthesis, cell-free extracts of group-A streptococci . . . 453
- Hydrogenase, *Desulfovibrio desulfuricans*, reduction of hydroxylamine connected with activity of — 355
- Hydroxamates, non-enzymic formation catalysed by manganous ions . . . 206
- Hydroxylamine, reduction connected with hydrogenase activity, *Desulfovibrio desulfuricans* 355
- 11- β -Hydroxylation, enzymic adrenal —, further studies 449
- 18-Hydroxyoestrone, urine of pregnant women, isolation and identification . 214
- Indole, exclusion of free — as an intermediate in the biosynthesis of tryptophan, *Neurospora crassa*. 640
- 2-¹⁴C-*myo*-Inositol, metabolism in rat. . 666
- Insulin, stimulation of amino acid transport in isolated rat diaphragm . . 226
- Keratin, reaction of cystine with sulfite-bisulfite solutions at 50°, mechanism . 284
- α -Keto acids, blood, studies 507
- , intact yeast, cell permeability and decarboxylation 120
- α -Ketoglutaramic acid, product of enzymic transamination of glutamine, *Neurospora* 202
- Kinetin, oxidation by mammalian xanthine oxidase 100
- Laccase, purification 652
- Lactobacillus acidophilus*, DNA-requiring, DNA synthesis and growth, intracellular desoxyribosidic compounds . 470
- Lactobacillus arabinosus*, incorporation of *p*-fluorophenylalanine into proteins . 318
- Lens, calf, distribution of free nucleotides in various zones of — 199
- Leuconostoc mesenteroides*, pentose phosphate cleavage by — 599
- Liver, arginase and esterase activities of tissue, influence of adrenalectomy and cortisone treatment 168
- , biosynthesis of haem and haemoproteins in cell 447
- , comparative investigations on oxidation of pyruvate by mitochondria of brain and — 104
- , mammalian, enzymes of uracil metabolism in — 376
- , rat, influence of feeding aminoazo dyes on swelling and solubilization of microsomes 9
- , —, some aspects of sulfide oxidation by preparations 567
- , ultrasonic extracts of mitochondria, uncoupling of oxidative phosphorylation by thyroxine and triiodothyronine 662
- Luciferase, interaction with FMN and long-chain aldehydes in light reaction catalyzed by preparations of luminous bacteria 159
- Lysine, bacterial transamination of stereoisomers of — 596
- Mahoney poliovirus, see Virus
- Mannans, from cell walls of ivory nuts and dates, study of structure 229
- Microsomes, rat liver, influence of feeding aminoazo dyes on swelling and solubilization 9
- Mitochondria, correlation of morphology and enzymic properties of particles from — 524
- , liver and brain, comparative investigations on oxidation of pyruvate in — 104
- , release of nucleotides during U.V.-

- irradiation 432
- Mitochondria, some biochemical properties of lyophilized — 261
- , ultrasonic extracts of liver —, uncoupling of oxidative phosphorylation by thyroxine and triiodothyronine 662
- , vitamin K₁ as component of oxidative phosphorylation system 663
- Mucopolysaccharides, bovine aorta, study by chromatographic procedure for separating sulfated — 176
- Muscle, glycolysing insect —, importance of α -glycerophosphate dehydrogenase, study 660
- , skeletal — of rat, intracellular localization of enzymic deiodination of L-thyroxine and 3:3:5'-triiodo-L-thyronine 95
- Myosin, determination of molecular weight —, relationship between tropomyosin A and —, study 656
- , studies on molecular weight 504
- Neurohypophysis, action of two peptides from — on transport of sodium and water through skin, frogs and toads 619
- Neurospora*, α -ketoglutaramic acid as product of enzymic transamination of glutamine 202
- Neurospora crassa*, biosynthesis of tryptophan, exclusion of free indole as an intermediate 640
- Nitrate reductase, vitamin K-dependent, *Escherichia coli* 452
- Nuclease, desoxyribo — II, splenic, radiation-induced alteration of activity in sucrose and aqueous homogenates 209
- , ribo —, tobacco leaf, mechanism of action 386
- Nuclei, isolated, incorporation of ³²P, role of DNA 455
- Nucleic acid, accumulation of metabolites of — in *Escherichia coli* exposed to action of 6-azauracil 659
- , desoxyribo —, induced recovery of synthesis in bone marrow from irradiated guinea pigs 667
- , —, mechanism of mild acid denaturation of — 644
- , —, relationship between synthesis of protein and —, *Escherichia coli* treated with sulfur mustard 492
- , —, role in ³²P-incorporation into isolated nuclei 455
- , —, synthesis in phage-infected *Bacillus megaterium* KM 208
- , —, synthesis of — and growth of *Lactobacillus acidophilus* requiring —, intra-cellular desoxyribosidic compounds 470
- , fiber of TMV particle 457
- , ribo —, conservation by Ehrlich ascites tumour cells 45
- Nucleic acid, ribo —, containing new components, pancreas 51
- , —, nuclear and cytoplasmic, calf thymus 271
- , —, —, further studies 642
- , —, phosphorolysis of leaf — 200
- , spectrophotometric procedure for analysis of purines and pyrimidines, application to fish sperm — 550
- , synthesis in *Escherichia coli*, effect of nitrogen and sulfur mustard 482
- Nucleotide, amino-sugar — from *Carcinus maenas* 657
- , flavin mono —, interaction with luciferase and long-chain aldehydes in light reaction catalyzed by preparations of luminous bacteria 159
- Nucleotides, distribution of free — in various zones of calf lens 199
- , release from mitochondria during U.V.-irradiation 432
- Ovalbumin, volume changes on adding acid 87
- Oxidative phosphorylation, mitochondria, vitamin K₁ as component of system —, uncoupling by thyroxine and triiodothyronine, ultrasonic extracts of liver mitochondria 662
- Pancreas, RNA containing new components 51
- , sialic acids of hog — 444
- Parathyroid gland, preliminary fractionation of extract with ammonium sulfate 204
- Patulin I, biosynthesis, general physiology of several strains of *Penicillium patulum* 247
- , —, related aromatic substances from *Penicillium patulum*, strain 2159A 21
- Penicillium patulum*, general physiology of several strains 247
- , strain 2159A, biosynthesis of patulin I, related aromatic substances from — 21
- Pentose phosphate, cleavage by *Leuconostoc mesenteroides* 599
- Phenylalanine, concentration and hydroxylation of free — in adrenal glands 328
- Phospholipid, structure of — and thromboplastic activity 71, 81
- Phosphoprotein, dephosphorylation by alkali, role of cation 148
- O-Phosphoserine phosphatase 223
- Phosphotransacetylase, *Escherichia coli* K-12, purification 436
- Photosynthesis, effect of radiocarbon on rate of carbon dioxide utilization during — 587
- , sodium fluoride-induced carbon dioxide burst from *Chlorella* 35
- Pneumococcus, non-capsulated strain, for-

- mation of uridine pyrophosphoglucuronic acid from uridine pyrophosphoglucose by extracts 211
 Polynucleotide phosphorylase, assay . . . 350
 Poly-L-proline, reverse mutarotation . . . 647
 Polysaccharides, muco — of bovine aorta, study by chromatographic procedure for separating sulfated — 176
 Progesterone, metabolism by cultured uterine fibroblasts, strain UI2-705 . . 591
 Proline, poly-L-, reverse mutarotation . . 647
 Protein, biosynthesis, site of action of vitamin B₁₂ and its inhibition by a B₁₂ antagonist 215
 —, cellular fraction binding thyroxine . . 91
 —, incorporation of *p*-fluorophenylalanine, *Lactobacillus arabinosus* . . . 318
 —, phospho —, dephosphorylation by alkali, role of cation 148
 —, relationship between synthesis of DNA and —, *Escherichia coli* treated with sulfur mustard 492
 —, TMV, isolation of acetyl-peptide from enzymic digests 184
Pseudomonas, species, an effect of drying isolated cell walls 445
 Pteridines, as substrates for mammalian xanthine oxidase, end-product of enzymic oxidation of — 613
 Pteridine reductase 370
 Purines, of nucleic acids, spectrophotometric procedure for analysis . . . 550
 Pyrimidine desoxyriboside phosphorylase, *Escherichia coli*, purification 562
 Pyrimidines, of nucleic acids, spectrophotometric procedure for analysis . . 550
 Pyruvic acid, oxidation by yeast 333
 —, oxidation in liver and brain mitochondria, comparative investigations 104
 Pyruvic kinase, assay 350
Rhodopseudomonas spheroides, extracts, biosynthesis of δ -aminolaevulinic acid 451
 Ribonucleic acid, see Nucleic acid
 Ribose, biosynthesis, *Escherichia coli* . . 216
 —, metabolism of D-glucuronolactone in normal and pentosuric human subjects 645
 L-Serine, enzymic equilibration with O-phospho-L-serine 222
 Sialic acids, hog pancreas 444
 Sperm, fish, spectrophotometric procedure for analysis of purines and pyrimidines of nucleic acids 550
 —, properties of flagella obtained by sedimentation 636
Staphylococcus aureus, release and analysis of intracellular amino acids 402
 Streptococci, group-A, biosynthesis of hyaluronic acid by cell-free extracts 453
Streptococcus faecalis, an effect of drying isolated cell walls 445
 Sulfide, oxidation by rat-liver preparations, some aspects 567
 Sulfide, oxidation to thiosulfate by metalloprotein complexes and ferritin . . . 573
 Thromboplastic activity, fatty acid composition of active phosphatidyl ethanolamines 81
 —, phosphatide fraction active in recalcified normal human plasma . . . 71
 Thymus, calf, nuclear and cytoplasmic ribonucleic acids 271
 Thyroglobulin, correlation of $N \rightleftharpoons \alpha$ reaction with type of breakdown produced by papain 294
 Thyrotropin, studies on purification . . . 434
 Thyroxine, cellular protein fraction binding — 91
 —, uncoupling of oxidative phosphorylation by —, ultrasonic extracts of liver mitochondria 662
 L-Thyroxine, intracellular localization of enzymic deiodination, rat brain and skeletal muscle 95
 Tipula iridescent virus, see Virus
 Tissue culture, plant —, effects of selected nitrogen compounds on growth of — 308
 Tobacco mosaic virus, see Virus
 3:3:5'-Triiodo-L-thyronine, intracellular localization of enzymic deiodination, rat brain and skeletal muscle 95
 Triiodothyronine, uncoupling of oxidative phosphorylation by —, ultrasonic extracts of liver mitochondria . . . 662
 Tropomyosin A, relationship between myosin and —, study 656
 Tryptophan, biosynthesis in *Neurospora crassa*, exclusion of free indole as an intermediate 640
 Tumour, ascites —, effect of D₂O on survival of mice with — 58
 —, Ehrlich ascites —, conservation of RNA by cells of — 45
 —, —, enzymes of uracil metabolism in — 376
 Tyrosine, isolation of a — - activating enzyme from baker's yeast 134
 Ultracentrifugation, analytical —, optical fine-structure of a meniscus in relation to molecular weight determinations using Archibald principle . . 417
 Uracil, metabolism, enzymes in Ehrlich ascites tumour and mammalian liver 376
 Uridine pyrophosphoglucuronic acid, formation from uridine pyrophosphoglucose, extracts of non-capsulated strain of pneumococcus 211
 Virus, dissociated polio —, ultracentrifugal examination 442
 —, from barley, form and length . . . 650
 —, purified mahoney polio —, structure of crystals 241
 —, Tipula iridescent —, polyhedral form of — 464
 —, tobacco mosaic —, isolation of acetyl-peptide from enzymic digests

- of protein 184
 Virus, tobacco mosaic —, nucleic acid
 fiber of particle 457
 Vitamin B₁₂, and protein biosynthesis, site
 of action and its inhibition by a B₁₂
 antagonist. 215
 Vitamin K-dependent nitrate reductase, in
Escherichia coli. 452
 Vitamin K₁, component of mitochondrial
 oxidative phosphorylation system . 663
 Xanthine oxidase, mammalian, end-pro-
 duct of enzymic oxidation of pteri-
 dines 613
 —, —, oxidation of kinetin by — . 100
- Yeast, amino acid composition and some
 other properties of cytochrome *c*,
 comparison with horse-heart cyto-
 chrome *c* 108
 —, baker's, fumarase, a thiol enzyme . 654
 —, —, isolation of a tyrosine-acti-
 vating enzyme 134
 —, inhibition of metabolism and hexo-
 kinase activity by glucosone . . . 127
 —, intact —, cell permeability and
 decarboxylation of α -keto acids. . . 120
 —, kinetics of potassium-activated alde-
 hyde dehydrogenase 218
 —, oxidation of pyruvic acid by — . 333
