

SUBJECT INDEX

- Actin, enzymic interactions of bound nucleotide of —, studies 436
- Adenine, effect on ATP regeneration and shape transformation in long-stored erythrocytes 564
- [8-¹⁴C]Adenine, *in vitro* uptake by isolated nuclei, effect of X-rays and u.v.-light 147
- Adenosine monophosphate, transphosphorylation between — and nucleoside triphosphates 422
- Adenosine polyphosphate, baker's yeast phosphopyruvate carboxylase requiring — 284
- Adenosine triphosphatase, activities in mitochondria, participation of flavin in — 1
- , effects of promazines on mitochondrial — reaction 11
- , evidence in support of two — pathways in rat-liver mitochondria 588
- Adenosine triphosphate, effect of inosine and adenine on — regeneration and shape transformation in long-stored erythrocytes 564
- , estimation of inorganic phosphate in presence of — 357
- , labeling of pH-5 enzyme with labeled — 287
- , transphosphorylation between — and nucleoside monophosphates 406
- Albumins, serum — of rat, rabbit and guinea-pig, molecular weights 283
- Amino acids, impaired concentrating mechanism for — in mutants of *Escherichia coli* resistant to L-canavanine and D-serine 582
- , incorporation and activation by disrupted protoplasts of *Escherichia coli* 18
- , uptake in relation to protein synthesis in cells growing in tissue culture 58
- Ascites tumour, see Tumour
- L-Ascorbate, enzymic conversion of L-gulonate to — by rat-liver enzymes 290
- Azotobacter vinelandii*, isolation of coenzyme Q from — 492
- Bacillus megaterium*, action of RNase on phage protein synthesis by induced lysogenic culture 106
- , action of RNase on sensitive and non-induced lysogenic cells of — 99
- Bacteria, nephelometric determination of cell count in synchronously dividing cultures 261
- Bacteriochlorophyll, oxidized — an intermediate bacterial photosynthesis? 278
- Bacteriophage, action of RNase on — protein synthesis by induced lysogenic *Bacillus megaterium* culture 106
- Bacteriophage T₂, effects of chloramphenicol on RNA metabolism of *Escherichia coli* infected with — 449
- Bone, some theoretical considerations concerning crystals with relevance to physical properties of — 194
- Brain, distribution of catechol compounds in human — 586
- L-Canavanine, impaired concentrating mechanism for amino acids in mutants of *Escherichia coli* resistant to — 582
- Carbohydrate, assimilation in actively growing *Saccharomyces cerevisiae* 470, 480
- α -Casein, a phosphatase from spleen able to hydrolyze completely the phosphorus of —, further purification and properties 349
- Catechol, demonstration of free radical of — after photochemical or enzymic oxidation 499
- , distribution of — compounds in human brain 586
- Cellulose ion exchangers, use for chromatographic separation of nucleotides, observations 554
- Cerebrospinal fluid, succinyl adenosine, a new substance in human — 566
- Chloramphenicol, effects of — on RNA metabolism of T₂-infected *Escherichia coli* 449
- Chlorella*, new peptide-nucleotide compounds from — 298
- Chloroplasts, photosynthesis by isolated — 32, 47
- [¹⁴C]Choline, *in vitro* incorporation into phospholipids of rat-liver mitochondria 293
- Chondroitin sulphate, effect of chondroitin on uptake of radioactive sulphate into — 559
- Chromatography, behaviour of haemoglobins 258
- , luteinizing hormone from sheep pituitary glands 305
- , observations on use of cellulose ion exchangers for separation of nucleotides 554
- , paper —, an assay for RNases using cyclic mononucleotides as substrates 551
- Chromatophores, *Rhodospirillum rubrum*, photooxidation of cytochrome *c* by illuminated — under anaerobic conditions 589

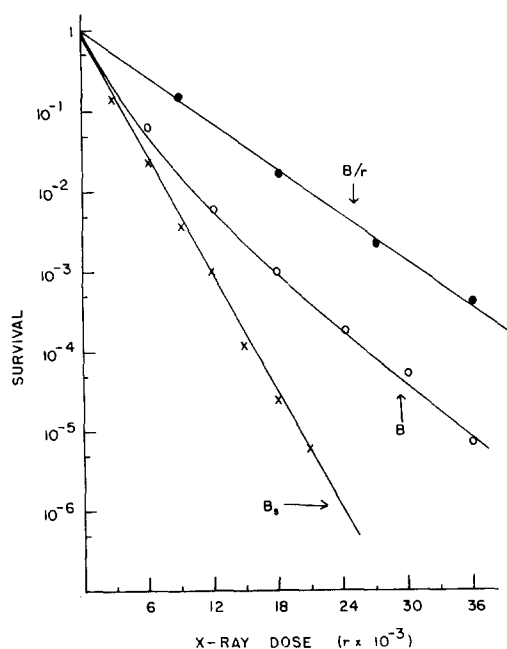

- Chymotrypsin, effect of — on molecular weight of DNA preparations . . . 504
 —, with a homologous series of *n*-fatty acid esters as substrates, kinetics . . 182
 Chymotrypsinogen, beef —, N- and C-terminal residues 256
Cipridina hilgendorffii, diffusion constant of luciferase from — 176
 Coenzyme Q, isolation from beef heart and beef-heart mitochondria 73
 Convection, electromagnetically engendered — in electromagnetophoresis 535
 —, thermal — and similar types of fluid streaming, suppression of — 538
 Cytochrome *c*, net synthesis in calf-heart mitochondria 597
 —, photooxidation by illuminated chromatophores of *Rhodospirillum rubrum* under anaerobic conditions 589
 Cytochrome oxidase, electrophoretic studies on — 543
 Desoxyribonucleic acid, see Nucleic acid
 Desoxyribose, degradation by cell-free extract of *Escherichia coli*, isolation of 2-desoxy-D-ribose-5-phosphate . . . 117
 —, enzymic degradation of derivatives for determination of isotope distribution 124
 2-Desoxy-D-ribose-5-phosphate, isolation of — after degradation of desoxyribose by cell-free extract of *Escherichia coli* 106
Desulfovibrio desulfuricans, purification of hydrogenase of — 592
 Diaphorase, role in ketoglutarate oxidation 286
 Electromagnetophoresis, electromagnetically engendered convection in — 535
 Electron transport system, isolation of coenzyme Q from *Azotobacter vinelandii* and *Torula utilis* 492
 —, isolation of coenzyme Q from beef heart and beef-heart mitochondria . 73
 Electrophoresis, paper —, zone-sharpening in —, a method allowing application of dilute protein solutions 531
 —, studies on cytochrome oxidase . . . 543
 pH-5 Enzyme, labeling with labeled ATP 287
 Erythrocytes, effect of inosine and adenine on ATP regeneration and shape transformation in long-stored — . 564
Escherichia coli, degradation of desoxyribose by cell-free extract, isolation of 2-desoxy-D-ribose-5-phosphate . . 117
 —, effects of chloramphenicol on RNA metabolism of T₂-infected — . . . 449
 —, incorporation and activation of amino acids by disrupted protoplasts of — 18
 —, mutants resistant to L-canavanine and D-serine, impaired concentrating mechanism for amino acids in — . 582
 —, preparation, characterization and properties of RNA from — . . . 320
 —, separate permeases for accumulation of methyl- β -D-galactoside and methyl- β -D-thiogalactoside in — 599
 Estrogen, mucopolysaccharides of chick oviduct stimulated by — 315
n-Fatty acid esters, kinetics of chymotrypsin with a homologous series of — as substrates 182
 Flavin, participation in mitochondrial ATPase activities 1
 Folic acid, studies on — reductions . . 273
 Glucose, uptake in relation to protein synthesis in cells growing in tissue culture 58
 [¹⁴C]Glucose, metabolic pathways for utilization by *Saccharomyces cerevisiae* during aerobic fermentation . 470
 [1-¹⁴C]Glucose, synthesis of polysaccharides from — by *Saccharomyces cerevisiae* 480
 L-Gulonate, enzymic conversion to L-ascorbate by rat-liver enzymes . . . 290
 Haemoglobins, chromatographic behaviour 258
 HeLa cells, alteration of RNA metabolism resulting from poliomyelitis virus infection of — 572
 Heparin, transfer of radioactive sulfate from phosphoadenosine phosphosulfate to — 291
 Histidine and methylhistidine, observations on catalyzed hydrolysis of *p*-nitrophenyl acetate by peptides of — 267
 Hormone, luteinizing — from sheep pituitary glands, chromatography . 305
 Hyaluronic acid, influence of ionic strength on sedimentation and diffusion properties 155
 Hydrogenase, *Desulfovibrio desulfuricans*, purification 592
 Indole, mammalian hydroxylation in 6-position of — ring 566
 Inosine, effect on ATP regeneration and shape transformation in long-stored erythrocytes 564
 Inositol, conversion to carbon dioxide by rat-kidney preparations 265
 Iododesoxyuridine, analog of thymidine, synthesis and biological activities . . 295
 Keratin, cross- β modification in wool —, structural features as suggested by its mechanical properties 596
 α -Ketoglutarate, role of diaphorase in oxidation of — 286
 Lactic dehydrogenase, partial modification of baker's yeast — 593
 β -Lactoglobulin, kinetic study of proteolysis by trypsin 510
 Lactonases, microsomal and soluble — . 253
 [¹⁴C]Leucine, incorporation into proteins of isolated rat-liver mitochondria, role of cell sap in — 270
 Liver, dietary necrotic degeneration of —, *in vitro* effect of tocopherol metabolites on respiratory decline in — 484

- Luciferase, *Cipridina* —, diffusion constant of — 176
- Luteinizing hormone, see Hormone
- β -Mercaptopyruvate, a copper enzyme cleaving —, isolation and properties 338
- O-Methylisourae, reactivity towards protein of TMV 557
- Methyl- β -D-galactoside and methyl- β -D-thiogalactoside, separate permeases for accumulation of — in *Escherichia coli* 599
- Mitochondria, beef-heart —, isolation of coenzyme Q from — 73
- , calf-heart, —, net synthesis of cytochrome *c* in — 597
- , effect of phosphate on respiratory inhibition caused by thiol reagents in preparations of — 276
- , effects of promazines on ATPase reaction of — 11
- , isolated rat liver —, role of cell sap in incorporation of [14 C]leucine into proteins of — 270
- , participation of flavin in ATPase activities of — 1
- , rat-liver —, effects of substrates on the swelling and loss of pyridine nucleotides from — 576
- , —, evidence in support of two ATPase pathways in — 588
- , —, *in vitro* incorporation of [14 C]-choline into phospholipids of — 293
- Mucopolysaccharides, of estrogen-stimulated chick oviduct 315
- Muscle, response of — to long chain quaternary ammonium ions 375
- Mycobacteria, further studies on pyruvic dehydrogenase system. 80
- Myoglobin, deuterium exchange between water and — 579
- Myosin, further experiments on heat coagulation of — 189
- Myosin B, flow-birefringence properties of various preparations 263
- Nerve fiber, frog —, action of lipid-soluble quaternary ammonium ions on resting potential of myelinated — 381
- , squid —, chemical investigations on giant — 362
- Neuraminic acid, linkage of — in orosomucoid 584
- Nitrogen fixation, by nodules formed on isolated bean roots 274
- p*-Nitrophenyl acetate, catalyzed hydrolysis by peptides of histidine and methylhistidine, observations 267
- Nuclease, ribo —, action on phage protein synthesis by induced *Bacillus megaterium* culture 106
- , —, action on sensitive and non-induced lysogenic cells of *Bacillus megaterium* 99
- , —, paper chromatographic assay for — using cyclic mononucleotides as substrates. 551
- , —, spectrophotometric titration of two derivatives of — 574
- Nuclei, cytological characteristics of protein and nucleoprotein fractions of cell — 301
- , effect of X-rays and u.v.-light on *in vitro* uptake of [$8\text{-}^{14}\text{C}$]adenine and [$3\text{-}^{14}\text{C}$]phenylalanine by isolated — 147
- Nucleic acid, alterations in turnovers of — in subcellular components during tryptophan peroxidase induction 430
- , desoxyribo —, effect of chymotrypsin on molecular weight of preparations of — 504
- , —, pneumococcus transformation during period between incorporation of — and appearance of streptomycin resistance, studies 464
- , interaction with Mg-ions 233
- , liver —, kinetics of turnovers during enzyme induction in rat. 133
- , ribo —, alteration in metabolism of — resulting from poliomyelitis virus infection of HeLa cells. 572
- , —, effects of chloramphenicol on metabolism of — in T_2 -infected *Escherichia coli*. 449
- , —, from *Escherichia coli*, preparation, characterization and properties. 320
- , —, infective — isolated from TMV, some physical properties. 519
- , —, prepared by phenol extraction, evidence for peptides in —. 297
- , —, 5-ribosyl uracil, a carbon-carbon ribofuranosyl nucleoside in — 569
- , —, studies on isomer of uridine isolated from — 393, 406
- , structural differences in — of some TMV strains. 386
- Nucleoprotein, fractions of cell nuclei, cytological characteristics 301
- Nucleoside monophosphate kinases, studies. 406, 422
- Nucleoside monophosphates, transphosphorylations between ATP and — 406
- Nucleoside triphosphates, transphosphorylations between AMP and — 422
- Nucleotide, enzymic interactions of bound — of actin, studies 436
- Nucleotides, observations on use of cellulose ion exchangers for chromatographic separation of — 554
- , peptide —, new compounds obtained from *Chlorella* and yeasts 298
- , pyridine —, effects of substrates on the swelling and loss of — from rat-liver mitochondria. 576
- Oligonucleotides, optical changes accompanying enzymic breakdown of — 578

- Orosomucoid, linkage of neuraminic acid in — 584
- Oviduct, mucopolysaccharides of estrogen-stimulated chick — 315
- Papain, effect of residual peroxide on enzymic digestion of oxidized — 561
- Peptide-nucleotides, new compounds obtained from yeasts and *Chlorella* 298
- Peptides, absorption of — 69
- , evidence for — in RNA prepared by phenol extraction 297
- Permeases, separate — for accumulation of methyl- β -D-galactoside and methyl- β -D-thiogalactoside in *Escherichia coli* 599
- [3-¹⁴C]Phenylalanine, *in vitro* uptake by isolated nuclei, effect of X-rays and u.v.-light 147
- Phosphatase, Fe⁺⁺-dependent alkaline — of yeast 95
- , from spleen, able to hydrolyze completely the phosphorus of α -casein, further purification and properties 349
- Phosphate, inorganic —, estimation in presence of ATP 357
- Phosphoadenosine phosphosulfate, transfer of radioactive sulfate from — to heparin 291
- Phospholipids, rat-liver mitochondria, *in vitro* incorporation of [¹⁴C]choline into — 293
- Phosphopyruvate carboxylase, from baker's yeast, adenosine polyphosphate requirement of — 284
- Phosvitin, a dielectric study of — 514
- Pituitary gland, sheep —, chromatography of luteinizing hormone from — 305
- Pneumococcus, transformation of — during period between incorporation of DNA and appearance of streptomycin resistance, studies 464
- Poliomyelitis virus, see Virus
- Polymetaphosphate, a dielectric study of a — 514
- Polyriboadenylic acid, influence of various factors upon structural transition at acid pH's 166
- Photosynthesis, bacterial —, oxidized bacteriochlorophyll an intermediate in —? 278
- , by isolated chloroplasts 32, 47
- Photosynthetic phosphorylation, and generation of assimilatory power 47
- , vitamin K and riboflavin phosphate as cofactors of cyclic — 32
- Promazines, effects of — on mitochondrial ATPase reaction 11
- Protein, and nucleolus, fractions of cell nuclei, cytological characteristics 301
- , cell interferometry and specific refraction increment of a crystalline — 228
- , method allowing application of dilute solutions in paper electrophoresis by zone-sharpening 531
- , of isolated rat-liver mitochondria, role of cell sap in incorporation of [¹⁴C]leucine into — 270
- , phage —, action of RNase on synthesis by induced lysogenic *Bacillus megaterium* culture 106
- , proteolytic enzymes as probes of secondary structure of fibrous — 303
- , reactivity of O-methylisourea towards TMV — 557
- , synthesis in cells growing in tissue culture, amino acid and glucose uptake in relation to — 58
- X-Protein, scattering of light by TMV and — from infected tobacco plants 555
- Proteolytic enzymes, as probes of secondary structure of fibrous proteins 303
- Protoplasts, disrupted — of *Escherichia coli*, incorporation and activation of amino acids by — 18
- Pyridine nucleotides, effects of substrates on the swelling and loss of — from rat-liver mitochondria 576
- Pyruvic dehydrogenase system, mycobacteria, further studies 80
- Quaternary ammonium ions, lipid-soluble —, action on resting potential of myelinated nerve fibers of frog 381
- , long chain —, muscle response to — 375
- Rhodospirillum rubrum*, photooxidation of cytochrome *c* by illuminated chromatophores under anaerobic conditions 589
- Riboflavin phosphate, cofactor of cyclic photophosphorylation 32
- Ribonuclease, see Nuclease
- Ribonucleic acid, see Nucleic acid
- 5-Ribosyl uracil, a carbon-carbon ribofuranosyl nucleoside in RNA 569
- Saccharomyces cerevisiae*, metabolic pathways for [¹⁴C]glucose utilization during aerobic fermentation 470
- , synthesis of polysaccharides from [1-¹⁴C]glucose 480
- D-Serine, impaired concentrating mechanism for amino acids in mutants of *Escherichia coli* resistant to — 582
- Steroids, enzymic mechanism of 12 β -hydroxylation 269
- Streptomycin, pneumococcus transformation during period between incorporation of DNA and appearance of resistance to —, studies 464
- Succinyl adenosine, a new substance in human cerebrospinal fluid 566
- Sulphate, effect of chondroitin on uptake of radioactive — into chondroitin sulphate 559
- , reduction to sulphite by tobacco leaf 457
- Thermal convection, and similar types of fluid streaming, suppression of — 538
- Thick white, of hen's egg, mechanical

- properties 237
- Thiol reagents, effect of phosphate on respiratory inhibition in mitochondrial preparations caused by — . 276
- Thymidine, synthesis and biological activities of the analog: iododesoxyuridine 295
- Tipula iridescent virus, see Virus
- Tobacco mosaic virus, see Virus
- Tocopherol, *in vitro* effect of — metabolites on respiratory decline in dietary necrotic liver degeneration. . . . 484
- Torula utilis*, isolation of coenzyme Q from — 492
- TPNH-neotetrazolium diaphorase, a microsomal — 568
- Trypsin, kinetic study of proteolysis of β -lactoglobulin by — 510
- Tryptophan peroxidase, alterations in nucleic acid turnovers in subcellular components during induction of — 430
- Tumour, structural factors involved in control of metabolism in cells of ascites — 281
- Uracil, methylation studies on various derivatives of — 406
- Uridine, isomer isolated from ribonucleic acids, studies 393, 406
- Uridine diphosphate-glucose pyrophosphorylase, distribution in rat liver . 251
- Virus, poliomyelitis —, alteration of RNA metabolism resulting from infection of HeLa cells with — . . . 572
- , tipula iridescent —, crystal structure as determined by Bragg reflection of visible light 203
- , tobacco mosaic —, di- and trinucleotides in RNase digests of — 386
- , —, immunochemical studies of structure 140
- , —, reactivity of O-methylisourea towards protein of — 557
- , —, scattering of light by — and X-protein from infected tobacco plants. 555
- , —, some physical properties of infective RNA isolated from — . 519
- Vitamin K, cofactor of cyclic photophosphorylation 32
- Yeast, baker's —, adenosine polyphosphate requirement of phosphopyruvate carboxylase 284
- , —, partial modification of lactic dehydrogenase of — 593
- , Fe⁺⁺-dependent alkaline phosphatase of — 95
- , new peptide-nucleotide compounds from — 298
- , *Saccharomyces cerevisiae*, carbohydrate assimilation in actively growing — 470, 480
