

- valerate aminotransferase activity in, (NEUBERGER, TURNER) 342
- Ribitol dehydrogenase, see Dehydrogenase
- Ribitol-5-phosphate dehydrogenase, see Dehydrogenase
- Ribonuclease, inactivation of, by γ -radiation; effect of oxygen and *N*-ethylmaleimide on, (BRIDGES) 331
- Ribonuclease, reduced —; enzymic reactivation of, (VENETIANER, STRAUB) 166
- Saccharomyces, α -glucosidases of, produced in response to non-allelic maltose genes; comparison of, (HALVORSON, WINDERMAN, GORMAN) 42
- Serine, reactive — in alkaline phosphatase; amino acid sequence around, (MILSTEIN) 171
- Serum, native and sialidase-treated human — cholinesterase; isoelectric point of, (SVENSMARK, KRISTENSEN) 441
- Sialidase, —-treated human-serum cholinesterase; isoelectric point of, (SVENSMARK, KRISTENSEN) 441
- Sodium, potassium and — ions; ATPase stimulated by, in microsomal fractions from rat liver (SCHWARTZ) 329
- Soybeans, separation of *Tribolium*-protease inhibitor from, on calcium phosphate column (BIRK, GERLER, KHALEF) 326
- Streptococcus faecium*, localization of arginine dihydrolase system in, (TRENTINI, CHESBRO) 511
- Sulfatase, aryl —; action of, on vitamin K₂ disulfate (HOSKIN, VON ESCHEN) . 669
- Sulphur, enzymatic synthesis of cysteine from, and phosphoserine (SENTENAC, CHAPEVILLE, FROMAGEOT) 672
- Synthetase, acyl-CoA — of mucous membrane; subcellular localization of, (AILHAUD, SAMUEL, DESNUELLE) . . 150
- Terpenes, biosynthesis of, (LOOMIS, BATTAILLE) 54
- Tetrathionate reductase, see Reductase
- D-Threonine dehydrogenase, see Dehydrogenase
- Thymidine kinase, see Kinase
- Thyroid hormone, effect of, on bacteriolytic action of muramidase *in vitro* (LITWACK) 501
- Tissue, white adipose —; hexokinase of, (DIPIETRO) 305
- Transamidinase, occurrence of, in decidua and its repression by dietary creatine (WALKER, GIPSON) 156
- Transaminase, mitochondrial aspartate — of rat cerebral cortex; latency and solubilization of, (SELLINGER, RUCKER) 504
- Transcarbamylase, aspartate — partially purified from rat liver; inhibition by pyrimidines of, (BRESNICK) 425
- Transferase, choline acetyl —; estimation of, in small samples of nervous tissue (BULL, HEBB, RATKOVIC) 138
- Transferase, γ , δ -dioxovalerate amino — activity in *Rhodospseudomonas spheroides* (NEUBERGER, TURNER) 342
- Transferase, D-glutamyl —; mechanism of repression of, in mammalian cells (PAUL, FOTTELL) 334
- Transferase, UDP glucuronyl — of liver; solubilization and activation of, by EDTA (HALAC, BONEVARDI) 498
- Tribolium*-protease, see Protease
- Triosephosphate dehydrogenase, see Dehydrogenase
- Triphosphopyridine nucleotide oxidase, see Oxidase
- Trypsin, digestion of fibrinogen by; characterization of large fragment obtained by, (MIHALYI, GODFREY) 90
- Trypsin, digestion of fibrinogen by; kinetic studies of, (MIHALYI, GODFREY) 73
- Tryptophan pyrrolase, see Pyrrolase
- UDP-glucuronyltransferase, see Transferase
- Vitamin K₂ — disulfate; action of arylsulfatase on, (HOSKIN, VON ESCHEN) 669
- Xanthine oxidase, see Oxidase
- Yeast, acid phosphatase of; localization and secretion of, by protoplasts (MCLELLAN, JR., LAMPEN) 324
- Yeast, aerobic —; D(—)-lactic cytochrome *c* reductase from, (GREGOLIN, SINGER) 201
- Yeast, — extract; enzymic formation of ATP with acetyl phosphate as donor in, (KREIL-KISS, HOFFMANN-OSTENHOF) . 168
- Yeast, localization of some phosphatases in, (TONINO, STEYN-PARVÉ) 453
- Zinc, — flavoprotein of aerobic yeast; D(—)-lactic cytochrome *c* reductase as, (GREGOLIN, SINGER) 201

ERRATA

BIOCHIMICA ET BIOPHYSICA ACTA, VOL. 65 (1962)

- p. 203, paragraph 4, line 5: change "Distilled" into "To the precipitate, distilled".
- p. 348, lines 11 and 12: omit "(activity even in presence of DFP)".

BIOCHIMICA ET BIOPHYSICA ACTA, VOL. 67 (1963)

- p. 334, ref. 9: change "*Scient. Rep. Ist. Super. Sanita*, in the press" into "personal communication".
- p. 346, footnote, line 3: change " $53\ 000 \times g$ " and " $112\ 000 \times g$ " into, respectively, " $53\ 000\ g$ " and " $112\ 000\ g$ ".
